VII. VARIANCE PROCEDURE

The Director may apply for a variance as a result of a complaint from an employee or of his knowledge of certain hazards or exposures. The Director should definitely believe that a variance is needed before the application for a variance is submitted to the Commissioner of Labor.

The procedure for applying for a variance to the adopted safety and health standards is as follows:

a. The application for a variance shall be prepared in writing and shall contain:

1. A specification of the standard or portion thereof from which the variance is sought.

2. A detailed statement of the reason(s) why the employer is unable to comply with the standard supported by representations by qualified personnel having first-hand knowledge of the facts

The certification shall contain a description of the means actually used to inform employees and that employees have been informed of their right to petition the Commissioner of Labor for a hearing.

b. The application for a variance should be sent to the Commissioner of Labor by registered or certified mail.

c. The Commissioner of Labor will review the application for a variance and may deny the request or issue an order granting the variance. An order granting a variance shall be issued only if it has been established that:

1. The employer
   
   i. Is unable to comply with the standard by the effective date because of unavailability of professional or technical personnel or materials and equipment required or necessary construction or alteration of facilities or technology.
   
   ii. Has taken all available steps to safeguard employees against the hazard(s) covered by the standard.
   
   iii. Has as effective program for coming into compliance with the standard as quickly as possible.

No such interim order may be effective for longer than one hundred eighty (180) days.

f. The order or interim order granting a variance shall be posted at the worksite and employees notified of such order by the same means used to inform them of the application for said variance (see subsection (a)(5) of this section).

VIII. RECORDKEEPING AND REPORTING

a. Recording and reporting of all occupational accident, injuries, and illnesses shall be in accordance with instructions and on forms prescribed in the booklet, RECORDKEEPING REQUIREMENTS UNDER THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970 (Revised 1978) or as may be prescribed by the Tennessee Department of Labor.

a. The complaint should be in the form of a letter and give details on the condition(s) and how the employee believes it affects or will affect his health, safety,
or general welfare. The employee should sign the letter but need not do so if he wishes to remain anonymous (see subsection (h) of Section 1 of this plan).

b. Upon receipt of the complaint letter, the Director will evaluate the condition(s) and institute any corrective action, if warranted. Within ten (10) working days following the receipt of the complaint, the Director will answer the complaint in writing stating whether or not the complaint is deemed to be valid and if no, why not, what action has been or will be taken to correct or abate the condition(s), and giving a designated time period for correction or abatement. Answers to anonymous complaints will be posted upon bulletin boards or other places of common passage where the anonymous complaint may be reasonably expected to be seen by the complainant for a period of three (3) working days.

c. If the complainant finds the reply not satisfactory because it was held to be invalid, the corrective action is felt to be insufficient, or the time period for correction is felt to be too long, he may forward a letter to the Chief Executive Officer or to the governing body explaining the condition(s) cited in his original complaint and why he believes the answer to be inappropriate or insufficient.

d. The Chief Executive Officer or a representative of the governing body will evaluate the complaint and will begin to take action to correct or abate the condition(s) through arbitration or administrative sanctions or may find the complaint to be invalid. An answer will be sent to the complainant within ten (10) working days following receipt of the complaint or the next regularly scheduled meeting of the governing body following receipt of the complaint explaining decisions made and action taken or to be taken.

e. After the above steps have been followed and the complainant is still not satisfied with the results, he may then file a complaint with the Commissioner of Labor. Any complaint filed with the Commissioner of Labor in such cases shall include copies of all related correspondence with the Director and the Chief Executive Officer or the representative of the governing body.

f. Copies of all complaint and answers thereto will be filed by the Director who shall make them available to the Commissioner of Labor or his designated
representative upon request.

X. **EDUCATION AND TRAINING**

a. Director and/or Compliance Inspector(s):

1. Arrangements will be made for the Director and/or Compliance Inspector(s) to attend training seminars, workshops, etc., conducted by the State of Tennessee or other agencies.

2. Reference materials, manuals, equipment, etc., deemed necessary for use in conducting compliance inspections, conducting local training, wiring technical reports, and informing officials, supervisors, and employees of the existence of safety and health hazards will be furnished.

b. All Employees (including supervisory personnel):

A suitable safety and health training program for employees will be established for fitness or injury.

2. Instruct employees who are required to handle poisons, acids, caustics, explosives, and other harmful or dangerous substances in the safe handling and use of such items and make them aware of the potential hazards, proper handling procedures, personal protective measures, person hygiene, etc., which may be required.

3. Instruct employees who may be exposed to environments where harmful plants or animals are present of the hazards of the environment, how to best avoid injury or exposure, and the first aid procedures to be followed in the event of injury or exposure.

4. Instruct employees required to handle or use flammable liquids, gases, or toxic materials in
their safe handling and use and make employees aware of specific requirements contained in Subparts H and M and other applicable subparts of TOSHAAct standards (1910 and/or 1926).

5. Instruct employees on hazards and dangers of confined or enclosed spaces.

i. "Confined or enclosed space" means space having a limited means of egress and which is subject to the accumulation of toxic or flammable contaminants or has an oxygen deficient atmosphere. Confined or enclosed spaces include, but are not limited to, storage tanks, boilers, ventilation or exhaust ducts, sewers, underground utility accesses, tunnels, pipelines, and open top spaces more than four feet (4') in depth such as pits, tubs, vaults, and vessels.

ii. Employees will be given general instruction on hazards involved, precautions to be taken, and on use of personal protective and emergency equipment required. They shall also be instructed on all specific standards or regulations that apply to work in dangerous or potentially dangerous areas.

iii. The immediate supervisor of any employee who must perform work in a confined or enclosed space shall be responsible for instructing employees on danger of hazards which may be present, precautions to be taken, and use of personal protective and emergency equipment, immediately prior to their entry into such an area and shall require use of appropriate personal protective equipment.

XI. GENERAL INSPECTION PROCEDURES

It is the intention of the governing body and responsible officials to have an occupational safety and health program that will insure the welfare of employees. In order to be aware of hazards, periodic inspections must be performed. These inspections will enable the finding of hazards or unsafe conditions or operations that will need correction in order to maintain safe and healthful worksites. Inspections made on a pre-designated basis may not yield the desired results. Inspections will be conducted, therefore, on a random basis at intervals not
to exceed thirty (30) calendar days.

a. In order to carry out the purposes of this program, the Director and/or Compliance Inspector(s), if appointed, is authorized:

1. To enter at any reasonable time, any establishment, facility, or worksite where work is being performed by an employee when such establishment, facility, or worksite is under the jurisdiction of the employer and;

2. To inspect and investigate during regular working hours and at other reasonable times, within reasonable limits, and in a reasonable manner, any such place of employment and all pertinent conditions, processes, structures, machines, apparatus, devices, equipment, and materials therein, and to question privately any supervisor, operator, agent, or employee working therein.

b. If an imminent danger situation is found, alleged, or otherwise brought to the attention of the Director or Inspector during a routine inspection, he shall immediately inspect the imminent danger situation in accordance with Section XII of this plan before inspecting the remaining portions of the establishment, facility, or worksite.

c. An administrative representative of the employer and a representative authorized by the employees shall be given an opportunity to consult with and/or to accompany the Director or Inspector during the physical inspection of any worksite for the purpose of aiding such inspection.

d. The right of accompaniment may be denied any person whose conduct interferes with a full and orderly inspection.

e. The conduct of the inspection shall be such as to preclude unreasonable disruptions of the operation(s) of the workplace.

f. Interviews of employees during the course of the inspection may be made when such interviews are considered essential to investigative techniques.

g. Advance Notice of Inspections.

1. Generally, advance notice of inspections will not
be given as this precludes the opportunity to make minor or temporary adjustments in an attempt to create misleading impression of conditions in an establishment.

2. There may be occasions when advance notice of inspections will be necessary in order to conduct an effective inspection or investigation. When advance notice of inspection is given, employees or their authorized representative(s) will also be given notice of the inspection.

h. The Director need not personally make an inspection of each and every worksite once every thirty (30) days. He may delegate the responsibility for such inspections to supervisors or other personnel provided:

The Tennessee Occupational Safety and Health Act of 1972 provides job safety and health protection for Tennessee's workers through the promotion of safe and healthful working conditions. Under a plan reviewed by the Tennessee Department of Labor, this government, as an employer, is responsible for administering the Act to its employees. Safety and health standards are the same as State standards and jobsite inspections will be conducted to insure compliance with the Act.

Employees shall be furnished conditions of employment and a place of employment free from recognized hazards that are causing or are likely to cause death or serious injury or harm to employees.

Each employee shall comply with occupational safety and health standards and all rules, regulations, and orders issued pursuant to this program which are applicable to his or her own actions and conduct.

Each employee shall be notified by the placing upon bulletin boards or other places of common passage of any application for a temporary variance from any standard or regulation.

Each employee shall be given the opportunity to participate in any hearing which concerns an application for a variance from a standard.

Any employee who may be adversely affected by a standard or variance issued pursuant to this program may file a petition with the Director.

Any employee who has been exposed or is being exposed to toxic materials or harmful physical agents in concentrations or at levels in excess of that provided for by an applicable standard shall be notified by the employer and informed of such exposure and corrective action being taken.

Subject to regulations issued pursuant to this program, any employee or authorized representative(s) of employees shall be given the right to request an inspection.

No employee shall be discharged or discriminated against because such employee has filed any complaint or instituted or caused to be instituted any proceedings or inspection under, or relating to, this program.

Any employee who believes he or she has been discriminated against or discharged in violation of these sections may, within thirty (30) days after such violation occurs, have an opportunity to appear in a hearing before the City Administrator for assistance in obtaining relief or to file a complaint with the Commissioner of Labor alleging such
discrimination.

ACCIDENT REPORTING PROCEDURES

(1-15) Employees shall report all accidents, injuries, or illnesses directly to the Director as soon as possible, but not later than twenty-four (24) hours, of their occurrence. Such reports may be verbal or in writing. All fatalities or accidents involving the hospitalization of three (3) or more employees shall be reported to the Director and/or recordkeeper immediately, either by telephone or verbally, and will be followed by a written report within four (4) hours after their occurrence. The Director will insure completion of required reports and records in accordance with Section VIII of the basic plan.

(16-50) Employees shall report all accidents, injuries, or illnesses to their supervisor as soon as possible, but not later than two (2) hours after their occurrence. The supervisor will investigate the accident or illness, complete an accident report, and forward the accident report to the Director and/or recordkeeper within twenty-four (24) hours of the time the accident or injury occurred or the time of the first report of the illness.

(51-250) Employees shall report all accidents, injuries,
or illnesses to their supervisor as soon as possible, but not later than two (2) hours, after their occurrence. The supervisor will provide the Director and/or recordkeeper with the name of the injured or ill employee and a brief description of the accident or illness by telephone as soon as possible, but not later than four (4) hours, after the accident or injury occurred or the time of the first report of the illness. All fatalities or accidents involving the hospitalization of three (3) or more employees shall be reported to the Director and/or recordkeeper immediately, either by telephone or verbally, and will be followed by a written report within four (4) hours after their occurrence. The supervisor will then make a thorough investigation of the accident or illness (with the assistance of the Director or Compliance Inspector, if necessary) and will complete a written report on the accident or illness and forward it to the Director within seventy-two (72) hours after the accident, injury, or first report of illness and will provide one (1) copy of the written report to the recordkeeper.

(51-Plus) Employees shall report all accidents, injuries, or illnesses to their supervisors as soon as possible, but not later than two (2) hours after their occurrence. The supervisor will provide the administrative head of the department with a verbal or telephone report of the accident as soon as possible, but not later than four (4) hours, after the accident. The supervisor or the administrative head of the accident within seventy-two (72) hours after the accident occurred (four (4) hours in the event of accidents involving a fatality or the hospitalization of three (3) or more employees).

Since a Workers' Compensation Form 6A or OSHA NO. 101 Form must be completed, all reports submitted in writing to the person responsible for recordkeeping shall include the following information as a minimum:

1. Accident location, if different from employer's mailing address and state whether accident occurred on premises owned or operated by employer.
2. Name, social security number, home address, age, sex, and occupation (regular job title) of injured or ill employee.

3. Title of the department or division in which the injured or ill employee is normally employed.

4. Specific description of what the employee was doing when injured.

5. Specific description of how the accident occurred.

6. A description of the injury or illness in detail and the part of the body affected.

7. Name of the object or substance which directly injured the employee.

10. If employee was hospitalized, name and address of hospital.

11. Date of report.

**NOTE:** A procedure such as one of those listed above or similar information is necessary to satisfy Item Number 6 listed under **PROGRAM PLAN** in Chapter IV, Part IV of the Tennessee Occupational Safety and Health Plan. This information may be submitted in flow chart form instead of in narrative form if desired. These procedures may be modified in any way to fit local situations as they have been prepared as a guide only.

The four (4) procedures listed above are based upon the size of the work force and relative complexity of the organization. The approximate size of the organization for which each procedure is suggested is indicated in parenthesis in the left hand margin at the beginning, i.e., (1-15), (16-50), (51-250), and (251 Plus), and the figures relate to the total number of employees including the Chief Executive Officer but excluding the governing body (County Court, City Council, Board of Directors, etc.).

Generally, the more simple an accident reporting procedure is, the more effective it is. Please select the **one** procedure listed above, or prepare a similar procedure or flow chart, which most nearly fits what will be the most effective for your local situation. Note also that
the specific information listed for written reports applies to all three of the procedures listed for those organizations with sixteen (16) or more employees.
