

### ADDENDUM NO. 3

TAYLOR ENGINEERING, INC.

### DREDGED MATERIAL MANAGEMENT AREA BV-4B CONSTRUCTION

BREVARD COUNTY, FLORIDA  
OCTOBER, 2022

### SUMMARY OF QUESTIONS AND RESPONSES

**Contractor:**

Please provide more info on the required aluminum anodizing. The specification states a clear class 3 coating. Please tell us what Type (I, II or III).

**Response:**

A41 Type II anodizing.

**Contractor:**

In reviewing the bid documents regarding the builder's risk requirements, it states that the policy will be written for the total contract value. In speaking with several insurance companies, we can only acquire builders risk on the structures/building portion of the project. Please clarify If this is acceptable, the way the specifications are currently written we will not be able to get a BR policy for the earthwork portion and thus unable to submit a bid.

#### 6.6 PROPERTY/BUILDER'S RISK

Contractor shall be responsible to maintain Builder's Risk and/or and Installation policy for all construction projects. The coverage limit shall be equal to 100% of the completed value of the project. Such coverage shall be written on "all-risk" including coverage for the perils of windstorm and flood. Such coverage shall be written on an "agreed value" basis and shall not be subject to a coinsurance clause. The maximum deductible for other than windstorm and flood shall be \$25,000. The maximum deductible for windstorm and/or flood shall be 2% of the value of the project at the time of the loss. District shall be included on the policy as a Named Insured and a loss payee.

**Response:**

\$1 Million builder's risk policy is required.
