This illustration is a hypothetical compounding calculation assuming a rate of return of 7% on a \$30,000 annual salary. It is not intended to serve as a projection or prediction of the investment results of any specific investments. Investments are not guaranteed. Depending on the underlying investments, returns may be higher or lower. If costs and expenses had been considered in this illustration, the return would have been less. Interest compounded annually based on weekly contributions.

Investing involves market risk, including possible loss of principal. Actual investment results will vary depending on your investment and market experience, and there is no guarantee that fund objectives will be met.
