# CHARLEVOIX

Dear Mr. Ridenauer (Dove),

I heard there is a plan to block the road to the beach from cars and likely motorized carts. I hope the powers that be won't do that. It was tried in the 70s to stop the Indians from launching their fishing boats. That didn't work. It would just prevent people like me from diving to the water's edge or back a ways from the edge.

while

While the park is public I guess it belongs to the township who is responsible for its upkeep + protection. As such it should benefit

generally the township first followed by the general public. In any event nature will have the final say.

emergencies

In my opinion the bike trail should pass by the highway where emergencies can better be addressed than at private residences or in remote areas.

Sincerely, Elizabeth

Mulberry
