The applicant is requesting one variance:

- This application is in an R-1-S zoning district along with being in the Ann Arbor Road Corridor. The applicant is requesting a variance in maximum fence height for a fence along the back property line. The ordinance allows a maximum four (4) feet, the applicant is proposing a maximum six (6) feet, the applicant is requesting a variance of two (2) feet in fence height

Mr. Robert Hovansian addressed the Board and answered questions. He indicated that behind his property they are building 16 condo units, a combination of single-story and two-story units. Directly behind him they will be building units 25 ft. high, which will be able to look directly into his back yard and pool area, leaving him no privacy. When the condo property was excavated for the installation of a cistern, fifteen 25-ft. spruce trees were destroyed 6 feet inside his property line. The current chain link fence is grandfathered and is 10 feet inside his property line. Children also travel along there, using it as a conduit from Isbister School.
The decks from the condos will be on a plane with his property, because a great deal of the earth was also removed and the grade changed when the trees were destroyed.

Mr. Sturdy noted the smaller spruce trees since planted on the condo property as part of a negotiated solution. He also clarified with Mr. Hovansian that the plan is to install the 6 ft. fence only on the rear property line, rather than enclosing the entire yard.

Mr. Sturdy commented that he was struck by the proximity to the rear lot line of the foundation for the condos, approximately only 35 feet. He also noted a couple of six-foot fences already in existence in the area which were not visible from the road. Immediately east is an area of dense brush, 8 to 10 feet high. With a fence installed there, it would not be visible except to the property owner on the north side. If there’s another two-story unit put in there 35 ft. from the property line, which would constitute exceptional circumstances. It’s not of a general or recurrent nature, and in this circumstance you cannot depend on landscaping. There’s also a safety issue with the proximity to Isbister and Pioneer Schools.

Moved by Mr. Sturdy, supported by Mr. Doroshewitz, to grant the variance requested in Application 1460, Robert & Mary Hovansian at 45475 Ann Arbor Road, to permit the two foot increase in maximum fence height from four to six feet for the rear lot line of the property for the reasons that there are exceptional circumstances and practical difficulties involved in this situation where all seven criteria of the Zoning Ordinance are met. Ayes all.

Moved by Mr. Jachym, supported by Mr. Zdanek, to adjourn the meeting. Ayes all.

Chairman Levengood adjourned the meeting at 6:40 p.m.

Respectfully submitted,

\textit{Raymond O. Sturdy, Jr.}

Raymond O. Sturdy, Jr., Secretary
Zoning Board of Appeals

\textbf{NOTE:} Upon granting a zoning variance, a building permit is required. If denied, the applicant may appeal to Circuit Court.
