Attention:  Mr. David M. Murphy, City Manager

Re: Fire & Police Parking Lot Rehabilitation
Proposal for Professional Engineering Services

Dear Mr. Murphy:

Hubbell, Roth & Clark, Inc. met with the representatives of the City of South Lyon Fire and Police Departments to review the limits of the proposed Fire & Police Parking Lot Rehabilitation project. We understand that the City wishes to upgrade the existing pavement cross-section, improve traffic flow, increase parking and address drainage improvements as necessary per the City per South Lyon Standard Engineering Specifications. A preliminary schematic of the improved parking lot configuration is attached. Up to nine (9) additional parking spaces may be accommodated with the reconfiguration, thereby increasing the total available parking at the site from 24 existing spaces up to 33.

We have prepared a preliminary construction cost and total project cost estimate that includes the following major items of work:

1. Pulverize and reshape the existing bituminous pavement cross-section.

2. Overlay the pulverized section with a bituminous pavement section that meets the South Lyon Standard Engineering Specifications Standards.

3. Stripe the new bituminous pavement and add signage to delineate the new traffic flow patterns and parking space layout.

4. Add storm sewer improvements to address areas of insufficient drainage collection.

5. In order to address areas of failing sub base conditions a cost has been budgeted for the removal and replacement of a portion of the existing sub base section with undercutting. Final quantities will be calculated during the design phase.

Based upon our preliminary project cost estimates, the following Table 1 is a summary that reflects the preliminary apportionment of costs that will be incurred to each of the City budgets for streets, water and sewer improvements, respectively.

Attached herewith, please find the itemized preliminary apportionment and project cost estimates for construction of the improvements as illustrated herein.

Our fees for this project would be based on providing preliminary engineering, design, bidding and construction engineering services, as well construction observation. A staff hour projection and rate table is attached. Our tasks can be summarized as follows:

- Develop preliminary engineering evaluation of the most cost-effective method of construction.
- Collect field data of the existing street, sewer, water main, sidewalk, and adjacent topographic information necessary to prepare construction drawings.
- Prepare construction drawings and specifications.
- Prepare a final estimate of construction cost for the Owner’s review.
- Prepare applications for necessary Oakland County Soil Erosion Control permit.
- Prepare applications for necessary Road Commission for Oakland County permit.
- Distribute plans for bidding, review bids, and make recommendation of award to the City.
- Provide field layout including street grade stakes and cut sheets.
- Provide construction engineering services including review of contractor pay estimate requests, change orders, interpreting the construction documents for the contractor, and keeping the City informed of the progress of the work.
- Provide materials testing services for quality control including compaction testing for road subbase and subgrade, utility bedding, bituminous density and extraction testing and reports, concrete curb and gutter compressive strength and mix design verification.
- Provide a field observer to observe the construction of the work and to report to the City on the progress of the work.
Fees for these services would be as follows:

The cost for Resident Representation is based on an estimated 10 days for a construction observer to be on the site. We will include in the construction bid an item for “Field Observation Crew Days.” This item will make the contractor subject to additional resident representative costs incurred due to delays caused by the contractor. The fees for as-built construction drawings are not included since the scope of this project is currently limited to roadway surface improvements.

Fees will be invoiced monthly and based on our contract with the city. The total fee for the design and construction engineering services as described herein is $32,220 and will not exceed that amount without your prior authorization.

If this proposal is deemed acceptable to the City, please sign and return one copy to this office and retain one for your files. Thank you for the opportunity to serve the City on this project.

If you have any questions or require any additional information, please feel free to contact our office at (586) 569-5000.

1. Sidewalk removals and replacement (R & R) quantities are for the walks along Whipple and Ten Mile Road. The entire walk along Whipple is estimated to be removed. Approximately 1/2 of the Ten Mile walk is estimated for R & R.

2. In order to improve the drainage in the Police Station parking bay a quantity for storm sewer improvements has been added to the estimate. The proposed storm sewer system would connect into the existing sewer in Whipple.

3. The dumpster screen wall is a 6' tall 3-sided split face block screen wall with gate to enclose the trash receptacle. The receptacle will be located adjacent to the parking at the Fire Station in the existing grassed area.

4. The parking lot striping and signage covers all the new parking space striping, ADA symbols and hatching, directional traffic arrows and warning signage per MMUTCD to designate the 1-way and 2-way areas.

5. The proposed MDOT joint repairs are for the existing concrete approach at the Fire Station. There are several deteriorated joints which need repair.

 Subject: Trading in Department Weapons

To: Chief Collins

From: Lt. Chris Sovik

Date: July 1, 2013

Chief,

Attached are two quotes we received from two vendors that are willing to trade equipment for equipment:

Michigan Police Equipment $2015
6521 Lansing Road
Charlotte, MI 48813
(517) 322-0443

Gander Mountain $3100
43825 West Oaks Drive
Novi, MI 48154
(248) 380-4000

After receiving the quote from Gander Mountain, Sgt. Baker called and asked MPE if they would be willing to match the offer from Gander Mountain. The best they were willing to offer was $2200.

During his conversation with Al from Gander Mountain, Sgt. Baker felt that Al would be willing to offer more than his original quote of $2920. Sgt. Baker called Al and discussed the offer. Al was willing to increase his offer to $3100 which is attached.

Also attached is the list of department firearms.
I firmly believe that Sgt. Baker's knowledge of these weapons, as well as the time he took to clean all sixteen weapons was instrumental in receiving the highest value for these weapons. It was his initiative that prompted this action.

I propose that we move forward and come to an agreement with Gander Mountain pending City Council Approval.
To Sgt Baker, South Lyon PD

Gander Mountain #167 will give you $3100 for the purchase of 13 hand guns, and 3 shotguns. We will give you this in the form of a Store Credit.
