- Retirement date trusts are designed to provide diversification
  and asset allocation across several types of investments
  and asset classes, primarily by investing in underlying trusts.
  Therefore an investor is indirectly paying a proportionate share
  of the applicable fees and expenses of the underlying trusts.

- These options use a strategy that reallocates equity exposure
  to a higher percentage of fixed investments over time. Like
  other funds, target date trusts are subject to market risk and
  loss. Loss of principal can occur at any time, including before, at
  or after the target date. There is no guarantee that retirement
  date trusts will provide enough income for retirement.

Plan Fees

- Administrative services are supported by an annual
  per-participant fee and an asset-based fee. The annual
  per-participant fee is $20, levied in two installments of $10
  in April and October of each year. The annualized asset-based
  fee is 3.5 basis points (or $0.35 for each $1,000 in a
  Participant's account) — levied in two installments of 1.75
  basis points in April and October. The asset-based fee is
  determined semiannually based on estimated expenses
