When all corrections have been made, notify this department to arrange for a final inspection so that a certificate of occupancy can be issued. All applicable permits must be obtained. This inspection of land use, exterior posture and interior accessories of the structure is limited to visual inspection only. The City does not guarantee or approve by inference any latent, structural, or mechanical defects therein, or such items that are not apparent by visual inspection. The City shall not assume any liability to any person by reason of the inspections required by this article or the code adopted in this article or the issuance of a certificate of review or a certificate of occupancy. The inspection is solely for the purpose of permitting the City to continually assess the condition of the City's housing stock, to monitor compliance with the building code, and to encourage owners to improve their properties.
