Table 1: CDC Indicators		
Indicator	Butler County New Cases over 7 days	Status Level According to CDC
Community Level	-	Low
Positivity Rate	15.33% of tests performed in Butler County	High Positivity (over 9.99% of tests)
Incidence per 100,000 population	132.96 per 100,000	High Spread (over 99.99 per 100,000)

The Butler County General Health District will continue to monitor transmission levels based on previous CDC indicators; however, generalized guidance will now be based on the CDC's Community Level indicators.

Cases declined by over 10% and positivity rates saw a fair decrease as well. Other indicators have remained stable. The changes in the central measurements of age have increased. These figures have moved downward except for brief periods since the beginning of the pandemic. The median age went up by a year and the average age went up by a tenth.

Figure 1. Cases by Date of Event Since February 1, 2022

All figures show reported cases of COVID-19 in Butler County as of 0800 EDT 06/17/2022. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

*Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 06/17/2022 at 0800 EDT.

**Deaths are now reconciled to the Ohio Department of Health's available data to avoid discrepancies between the state and local numbers. ODH's protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. This is a lagging indicator and will be multiple weeks behind.
