

## Butler County General Health District's 80<sup>th</sup> COVID-19 Update (9/4/2021)

### Confirmed and Probable COVID-19 Cases Reported to Butler County\*

Butler County Residents, 2020-21

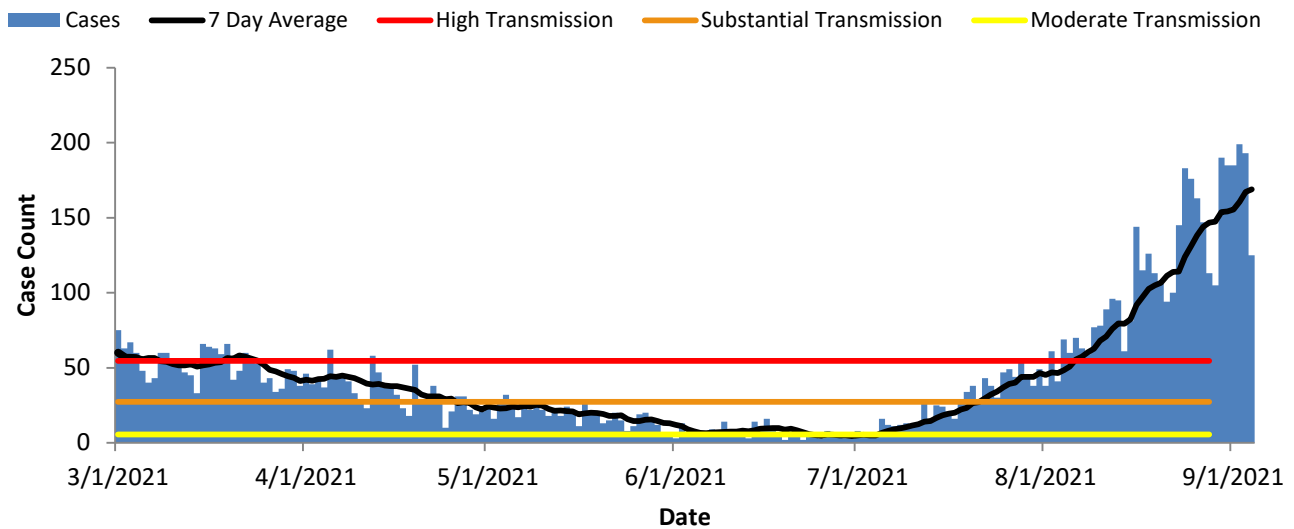

<b>Total # of Cases (9/4):</b>	<b>44,683*</b>
<b>ODH verified Deaths (9/4):</b>	<b>642**</b>
<b>Hospitalizations (9/4):</b>	<b>1,939</b>
<b>First Case Reported:</b>	3/11/2020
<b>Last Case Reported (so far):</b>	9/4/2021
<b>Confirmed Cases:</b>	<b>38,947</b>
<b>Probable Cases:</b>	<b>5,736</b>
<b>Age Range:</b>	<1-103
<b>Median Age:</b>	<b>39</b>
<b>Mean Age:</b>	40.1
<b>Incidence (thru 9/4):</b>	11,662.5 per 100,000
<b>Prevalence (thru 9/4):</b>	<b>11.7% of BC population</b>
<b>7-Day Positivity Rate (9/9):</b>	<b>11.9<sup>#</sup>% of tests performed in BC</b>

Table 1: CDC Indicators		
Indicator	Butler County New Cases over 7 days	Status Level According to CDC
<b>Incidence per 100,000 population</b>	<b>308.5 per 100,000</b>	<b>High Spread (over 100 per 100,000)</b>
<b>Positivity Rate</b>	<b>11.9% of tests performed in Butler County</b>	<b>High Positivity (over 10.00% of tests)</b>

This report has transitioned from using the target indicators that Governor DeWine and the Ohio Department of Health had previously set to the CDC's Community Transmission Indicators. The CDC has its own data tracker that is accessible at <https://covid.cdc.gov/covid-data-tracker/#datatracker-home>, which gives a good picture of how the nation as a whole is doing. They also have county tracking information, but as CDC mentions, local reports will be more up-to-date and should be considered more definitive.

Cases are rapidly rising in Butler County. Cases not only met the definition of a **community with high spread**, but continued to exceed it at a consistent rate. By the CDC's data tracker, Butler County met the definition of **high positivity**. Together these measures indicate that there is widespread transmission occurring in Butler County once again. Table 1 and Figure 1 compare Butler County with the new indicators. We are currently seeing case numbers that were around for Early February 2021 and Late October 2020.

**Figure 1. Cases by Date of Event Since March 1, 2021**

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 09/7/2021. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and **confirmed and probable case counts are likely to increase**. \*This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

\*Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 09/7/2021 at 1700 EST.

\*\*Deaths are now reconciled to the Ohio Department of Health's available data to avoid discrepancies between the state and local numbers. ODH's protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. **This is a lagging indicator and will be multiple weeks behind.**

Vaccination numbers were collected 1200 EDT 9/9/2021 from ODH COVID-19 Dashboard, Innovate Ohio Platform and the Ohio Hospital Associations Insight Analytic Tool. Vaccinations are considered started on the day an individual receives first dose of a COVID-19 vaccine. Vaccinations are considered completed on the day an individual receives the final recommended dose of a vaccine.

#Gathered from CDC's Data Tracker of Butler County 9/9/2021 0800 EDT accessible at <https://covid.cdc.gov/covid-data-tracker/#county-view>

Table 2: Total Reported* Cases by ZIP Code						
ZIP Code	Number of Cases	New Cases (8/22-9/4)	Change in cases from previous 7 days (8/15-8/21)	Transmission	% of Cases	
45011	7648	217	59 (↑37.3%)	High	17.1%	
45044	6107	184	22 (↑13.6%)	High	13.7%	
45013	5827	136	-5 (↓3.5%)	High	13.0%	
45069	5631	120	20 (↑20.0%)	High	12.6%	
45014	5488	124	17 (↑15.9%)	High	12.3%	
45056	3802	55	12 (↑27.9%)	High	8.5%	
45042	2999	91	28 (↑44.4%)	High	6.7%	
45067	1828	84	10 (↑13.5%)	High	4.1%	
45050	1382	39	-17 (↓30.4%)	High	3.1%	
45015	1192	45	1 (↑2.3%)	High	2.7%	
45241	626	14	-4 (↓22.2%)		1.4%	
45053	367	10	1 (↑11.1%)	High	0.8%	
45005	280	11	8 (↑266.7%)		0.6%	
45064	172	11	4 (↑57.1%)		0.4%	
45246	79	1	-3 (↓75%)		0.2%	
45062	69	3	2 (↑200%)		0.2%	
Cases lacking zip code information or from zip codes with too few cases	1,186	37			2.7%	
<b>Butler County (inclusive)</b>	<b>44,683</b>	<b>1182</b>	<b>155(↑15.1%)</b>	<b>High</b>	<b>100%</b>	

Zip-codes that have transmissions not rated have most of their populations outside of Butler County. Zip-codes with too few cases have been removed for privacy concerns.

**New Cases are determined by "Date of Event" which is when the case was ill/test was collected. CDC determines new cases by "Date of Report".**

Table 2 shows the zip-code level data that is new for this week. **All zip-codes** in Butler County now meet the conditions set to be declared a **community of high transmission**. Since individuals are rarely constrained by the relatively small borders of a zip-code in their day-to-day lives, these transmission indicators are for information only. For practical guidance, follow the county level indicators. Figure 2 shows the recent surge in cases and new indicator levels in context of the entire pandemic.

**Figure 2. Reported Cases of COVID-19 by Date of Event 2020-2021\***

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 09/7/2021. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and **confirmed and probable case counts are likely to increase**. \*This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

\*Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 09/7/2021 at 1700 EST.

\*\*Deaths are now reconciled to the Ohio Department of Health's available data to avoid discrepancies between the state and local numbers. ODH's protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. **This is a lagging indicator and will be multiple weeks behind.**

**Figure 3. Confirmed COVID-19 Deaths by date of death, 2020-21\*\***

Figures 3 and 4 show severe case outcomes. These are both lagging indicators since it typically takes time for a case to succumb to COVID and well over a month for a COVID-19 death to be verified. Deaths remain stable, and we are hopeful that they remain so due to the high vaccination rate amongst at-risk aged populations (Table 3). As evidenced by the 7 day moving average, deaths are now beginning the climb. As for hospitalizations, Butler County residents are being subjected to hospitalization at high rates once again. Additionally, unvaccinated individuals are making up the majority of hospitalizations and are driving the age of hospitalizations down.

**Figure 4. COVID-19 Hospitalizations of Butler County Residents by Week since the first week of March 2021**

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 09/7/2021. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and confirmed and probable case counts are likely to increase. \*This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

Figure 5 shows vaccines started in Butler County by their date of administration. Table 3 shows the counts of new immunizations over the last two week period as well as total estimates by age group.

After an initial surge in vaccine demand seen in late winter and through the spring, demand dramatically dropped off. However, beginning in late July, coinciding with the oncoming school year and rise in cases associated with the Delta variant, there was a slight, but steady increase.

**Table 3. Vaccination Statistics by Age Group and Recent Immunizations**

Age Group (Years)	Estimated Count of Population # (%)	Count of People Vaccinated (%) as of 8/24/2021	Count of People Vaccinated (%) as of 9/7/2021	Count of People Vaccinated During the last two weeks	Percent Change from 8/24-9/7	Estimated Count of People Unvaccinated
12-14	15,069 (5%)	5,261 (34.9%)	5,662 (37.6%)	401	7.6%	9,407
15-17	15,838 (5%)	6,316 (39.9%)	6,686 (42.2%)	370	5.9%	9,152
18-20	20,735 (6%)	7,904 (38.1%)	8,233 (39.7%)	329	4.2%	12,502
21-24	23,864 (7%)	9,998 (41.9%)	10,347 (43.4%)	349	3.5%	13,517
25-34	48,008 (15%)	21,213 (44.2%)	22,122 (46.1%)	909	4.3%	25,886

**Table 4. Cases Under Age of 17 by Zip –Code 07/01-9/4**

Zip Code	Cases since August 1st	Cases per 100,000 past week
45011	175	413.6
45069	105	185.3
45044	145	335.4
45014	100	378.3
45013	96	262.2
45050	47	604.0
45042	71	601.5
45056	30	434.3
45015	49	437.9
45241	15	
45067	78	653.8
45053	-^	505.9
45246	-^	

^Cases are below threshold to release. Population estimates from Ohio Hospital Association 2019

Table 4 shows cases that are ages 17 or younger by zip-code. The importance of this table is to demonstrate that though numbers remain small on an absolute level, relative to the population size it has actually been very high spread since the middle of summer. Were we to classify ages by zip-code in the same manner of the CDC’s definition, every zip-code in Butler County would be considered “high” transmission for school-age students. Within the recent weeks cases in this age have nearly doubled the amount of cases seen in July. It is true that children are less likely to develop severe illness, but they are not immune and they can spread it to others. **There have been pediatric hospitalizations of COVID-19 in Butler County.** Since the beginning of the pandemic, **pediatric hospitalizations of COVID-19 have nearly doubled the 5-year average of pediatric hospitalizations of influenza in Butler County.** That figure is not including children hospitalized with MIS-C associated with COVID-19, just those with acute COVID-19 infection.

The best ways to prevent your child from contracting COVID-19 and risking severe outcomes is to get your child vaccinated as soon as they are old enough, and to follow precautions such as wearing masks indoors- especially for those who are too young or cannot otherwise get the COVID-19 vaccination. Table 5 shows the vaccination rates among zip-codes by eligible populations.

**Table 5. Percent of the Eligible Population Vaccinated by Zip Code**

Zip Code	Vaccinated	Not Vaccinated Estimate	Vaccinated %
45056	11,373	15,054	43%
45067	5,749	7,208	44%
45064	1,277	1,606	44%
45015	4,821	5,018	49%
45042	11,594	10,916	52%
45053	1,564	1,243	56%
45013	25,503	19,826	56%
45011	36,768	27,244	57%
45044	25,824	18,563	58%
45050	6,021	3,173	65%
45014	25,467	13,396	66%
45069	33,601	11,314	75%

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 09/7/2021. Due to delays in reporting, the numbers of confirmed and probable cases on all figures are subject to change between reports and confirmed and probable case counts are likely to increase. \*This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health.

\*Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 09/7/2021 at 1700 EST.

\*\*Deaths are now reconciled to the Ohio Department of Health’s available data to avoid discrepancies between the state and local numbers. ODH’s protocol has changed to avoid reconciliation errors and now only includes those deaths that have been reconciled with Vital statistics and may not match what has been reported to the CDC which are provisional numbers. This is a lagging indicator and will be multiple weeks behind.

Vaccination numbers were collected 1200 EDT 9/9/2021 from ODH COVID-19 Dashboard, Innovate Ohio Platform and the Ohio Hospital Associations Insight Analytic Tool. Vaccinations are considered started on the day an individual receives first dose of a COVID-19 vaccine.
