

**Butler County General Health District
Seasonal Influenza-Associated Hospitalizations Report
MMWR Week 10
03/05/2023 – 03/11/2023**

**Butler County
General Health District**

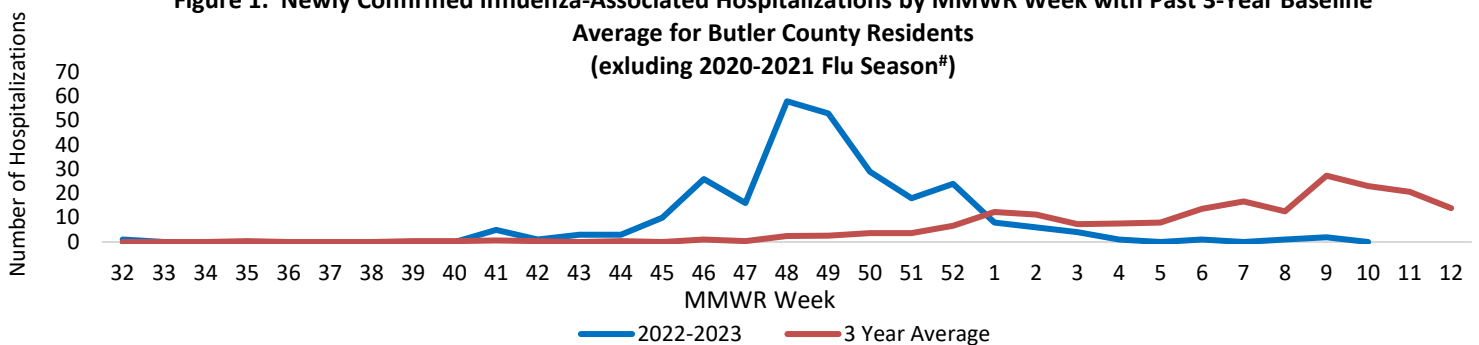

**Weekly Influenza-Associated Hospitalizations Activity Summary:
Butler County (MMWR Week 10, ending on 03/11/2023)**

Zero influenza-associated hospitalizations were reported in Butler County residents for the MMWR week ending 03/11/2023. The 3-year average for this time of year is 23 influenza-associated hospitalizations. Receiving the influenza vaccine is the best way to reduce the chance of illness and complications, including those resulting in hospitalization and death.

Sources of Influenza Surveillance Data

Influenza-associated Hospitalizations (ODRS): Influenza-associated hospitalizations are reported to local health departments for entry into the Ohio Disease Reporting System (ODRS). Hospitalizations can be used as an indicator of the severity of illness during a particular influenza season. This condition became reportable in 2009.

For further information or questions, please contact:
Butler County General Health District, 513-863-1770

Data is provisional and subject to change due to delays in reporting. Report reflects the period of 08/07/2022 – 03/11/2023 (MMWR Week 32 to Week 10 of 2023). Data accessed from the Ohio Disease Reporting System (ODRS) on 03/16/2023. *3 year average does not include the 2020-2021 flu season. *Southwest Ohio includes hospitalizations from the following counties and their respective jurisdictions: Adams, Brown, Butler, Clermont, Clinton, Hamilton, Highland and Warren.
