

All CareFirst Urgent Care locations offer RT-PCR Monkeypox testing. We are open 8 AM - 8 PM, 7 days a week.

WHAT IS MONKEYPOX?

Monkeypox is a rare, but potentially serious, viral illness that can spread between people (monkeypox transmission). It can be spread through respiratory droplets (typically in a prolonged and close setting), through skin or mucous membrane contact with monkeypox sores, or through shared items that have been contaminated with fluids or sores of a person with monkeypox.

WHAT ARE THE SIGNS AND SYMPTOMS?

- **Rash** (can appear similar to blisters or pimples) that can occur on the hands, feet, chest, anus, genitals, mouth, and face. The rash has different stages before healing completely.
- **Fever**
- **Swollen lymph nodes**
- **Headache**
- **Chills**
- **Muscleaches**
- **Exhaustion**

WHAT SAMPLE TYPES ARE ACCEPTABLE FOR MONKEYPOX TESTING?

The only acceptable sample type for monkeypox testing is a swab of the lesion or sore. Blood, urine, saliva, etc., are NOT acceptable sample types.

WHEN CAN RESULTS BE EXPECTED?

Results can be expected 24-72 hours after sample collection.
