Will be metal roof will look similar to the pictures provided and if not able to build out of steel can he build it out of wood. It will be built into the house. Gail Averitt stated the house already has a 2 car garage and what would be the need for a carport. Jerry stated it is for additional vehicles. There are no other carports on the block. Edward Saldivar asked if building in the backyard would be more feasible. Steven Gallier stated these lots are small and not enough room to build in the back. Gail Averitt stated the long term plan for the City and what the City adopted states if there are no other carports on the same block then try and discourage of that happening. It would affect the value and appearance of the property and the cohesiveness of the neighborhood. MOTION TO DENY

The shop has already started construction and contractor did pull his building permit but height was not discussed with the building inspector who assumed since he has built other shops he knew the regulations on height. Once the height was figured out construction was stopped and now they are here to request the height variance. This would be for an RV. We had 1 response from a neighbor and they were for the request. This house is on 1 acre and near 1 house. The height would not be affecting neighbors.</p> <p>MOTION TO APPROVE</p> <p>THERE BEING NO FURTHER BUSINESS, THE MEETING ADJOURNED AT 7: 12 P.M</p>
