### **Construction Project-South Henry Clay Blvd**

**Ashland, MO-** On 8/2/2023, pavement repairs are scheduled to begin along South Henry Clay Blvd. These repairs are necessary in order to prepare for Chip Seal Resurfacing, which will take place in the coming weeks.

Ashland Public Works staff, with the much appreciated assistance of Boone County Road and Bridge staff, will be milling out several heaves that were brought on by the excessive heat this summer. Crews will also be milling multiple potholes and depressions, prior to repairing them with hot mix asphalt.

These repairs are expected to take three days for completion. During this time, work zone signage will be placed throughout the area and flaggers will be directing traffic as needed. While the stoppage of traffic is expected to be minimal, we ask that drivers be patient as we make these improvements. Motorists are also encouraged to consider utilizing alternate routes during this time, in efforts to avoid delays and allow the repairs to be completed as efficiently as possible.

The Ashland Public Works Department is committed to providing the public with safe roads and infrastructure in our city. We would like to thank you for your cooperation in this matter. If you have any questions or concerns, please feel free to contact Ashland Public Works at 573-657-2568.
