The Butler County Mental Health and Addiction Recovery Services Board is a county government organization that oversees the community mental health and addiction service system in Butler County. Mental health and addiction services are available to Butler County citizens through local certified mental health and addiction recovery provider agencies.

**Mission Statement**

The mission of the Butler County Mental Health and Addiction Recovery Services Board, in partnership with the community, is to provide a comprehensive recovery oriented system of care and prevention. In addition, the Board will continue to improve the quality of life of Butler County citizens through the support of addiction and mental health recovery services.

**Vision Statement**

The vision of the Butler County Mental Health and Addiction Recovery Services Board is to ensure a system of care that is best practice based, financially stable and publicly funded. Butler County residents will be provided services and support that are preventative, impactful and measurable.

**Funding**

Public mental health and addiction recovery services in Ohio are funded by a combination of federal, state and local tax dollars.

Butler County Mental Health and Addiction Recovery Services Board
Funding Fiscal Year 2021

**Please Note:** Not all services listed in this guide are supported by Board funding.

*Only at the Butler County Jail
** Only Court-ordered evaluations

Contact the Butler County Mental Health & Addiction Recovery Services Board
For more information at (513) 960-9240
**Ambulatory Detoxification** – Face-to-face interactions with an individual who is suffering mild to moderate symptoms of withdrawal, for the purpose of alcohol and/or drug detoxification.

**Assessment** – The evaluation of an individual to determine the nature and extent of his/her mental illness and/or abuse, misuse and/or addiction to alcohol and/or other drugs.

**Case Management** – Activities provided to assist and support individuals in gaining access to needed medical, social, educational and other services essential to meeting basic human needs.

**Community Psychiatric Supportive Treatment (CPST)** – Provides a number of services delivered by community-based, mobile individuals or multidisciplinary teams of mental health care professionals and trained others. Services address the individual needs of clients and focus on an individual’s ability to succeed in the community; to identify and access needed services, and to show improvement in school, work and family and contributions in the community.

**Diagnostic Assessment** – Is a clinical mental health and/or substance misuse evaluation provided by an eligible professional at the beginning of treatment or in response to treatment, or when significant changes occur. It is a process of gathering information to assess client needs and functioning in order to determine appropriate service/treatment based on identification of the presenting problem, evaluation of mental status, and formulation of a diagnostic impression.

**Education/Consultation/Prevention Services** – Education services indicate formal educational presentations made to individuals or groups that are designed to increase community knowledge of and to change attitudes and behaviors associated with mental health and addiction problems, needs and services. Consultation services are formal and systematic information exchange between an agency and a person other than a client, which is directed towards the development and improvement of individualized service plans and/or techniques involved in the delivery of mental health services. Finally, prevention services indicate action oriented programs either toward reducing the incidence, prevalence, or severity of specific types of mental illness and/or addiction disorder.

**Emergency Services** – Includes both Crisis Intervention & Behavioral Health Hotline services. Crisis intervention is the process of responding to emergent situations and may include: assessment, immediate stabilization, and the determination of level of care in the least restrictive environment in a manner that is timely, responsive, and therapeutic. Behavioral health hotline services are an agency’s twenty-four hour per day, seven days per week capability to respond to telephone calls, often anonymous, made to an agency for crisis assistance. The person receiving emergency services may or may not become a client of the agency providing these services. These services are usually rendered face-to-face at a person’s home, at a mental health agency, or via telephone.

**Employment/Vocational Service** – Is to promote recovery and secure/maintain employment by providing training and skill development that is goal-oriented, ability-based, and incorporates individual choice. The outcome of employment/vocational service is that the individual will obtain
and maintain employment, learn new job skills, increase self-sufficiency, and contribute to the community.

**Family Counseling** – The utilization of special skills in sessions with individuals and their family members and/or significant others under the guidance of a counselor to address family and relationship issues related to mental health, alcohol and other drug abuse and/or dependence for the purpose of promoting recovery from addiction.

**Forensic Evaluation Services** – An evaluation resulting in a written expert opinion regarding a legal issue for an individual referred by a criminal court, domestic relations court, juvenile court, adult parole authority, or other agency of the criminal justice system or an Ohio Department of Mental Health and Addiction Services (OhioMHAS) operated regional psychiatric hospital. Forensic evaluation service also assists courts and the adult parole authority to address mental health legal issues.

**Group Counseling (Therapy)** – Services are typically provided through a counselor-client therapeutic relationship in which special skills are utilized to assist the client with mental illness and/or alcohol and other drug problems to achieve treatment objectives. Treatment occurs in a group setting with two or more individuals/clients facilitated by one or more counselors.

**Housing/Residential Services** – These are considered “other” mental health and/or substance misuse services which support persons/clients with mental illness to find affordable residential living placements and/or to assist in meeting their physical need for shelter.

**Individual Counseling** – Same as group counseling except treatment occurs in an individual setting, a counselor and one client only.

**Information, Screening & Referral Services** – Includes responses, usually by telephone, to inquiries from people about services in the community. Referrals may include contacting an agency or a provider in order to secure services for the person requesting assistance.

**Intensive Outpatient** – Structured individual and group alcohol and drug addiction activities and services that are provided at a certified treatment program site for a minimum of eight hours per week with services provided at least three days per week.

**Medical or Medication/Somatic (Psychiatric Services)** – A pharmacologic management service is a psychiatric/mental health/Medication Assisted Treatment (MAT)/medical intervention used to reduce/stabilize and/or eliminate psychiatric symptoms and/or the impact of substance misuse on individuals with the goal of improved functioning. These services should result in well-informed individuals and in decreased/minimized symptoms.

**Medication Assisted Treatment (MAT)** – The services of a medical professional directly related to the use of medications to provide a whole patient approach to the treatment of substance abuse disorders.

**Non-Medical Community Residential Treatment** – A twenty-four-hour rehabilitation facility, without twenty-four-hour-per-day medical/nursing monitoring, where a planned program of
professionally directed evaluation, care and treatment for the restoration of functioning for persons with alcohol and other drug problems and/or addiction occurs.

**Outreach** – A planned approach to reach a target population within their environment. The purpose of this approach is to prevent and/or address issues and problems as they relate to the use/abuse of alcohol or drugs.

**Partial Hospitalization/Day Treatment** – An intensive, structured, goal-oriented, distinct and identifiable treatment service that utilizes multiple interventions that address the individualized mental health and/or addiction recovery needs of a client. The environment at this level of treatment is highly structured, and there should be an appropriate staff-to-client ratio in order to guarantee sufficient therapeutic services and professional monitoring, control, and protection of the identified client.

**Peer Recovery Services (Peer Support)** – Community-based services for individuals with a mental illness or substance use disorder; and consist of activities that promote recovery, self-determination, self-advocacy, well-being and independence. Peer recovery services are individualized, recovery-focused and based on a relationship that supports a person’s ability to promote their own recovery.

**Social & Recreational Services** – Includes structured and non-structured activities and supports to enhance the quality of life of the person served. These services occur, whenever possible, in facilities used for social and recreational purposes by other members of the community.

**Subacute Detoxification** – Detoxification services are provided with twenty-four-hour medical monitoring.

**Urinalysis** – The testing of an individual’s urine specimen to detect the presence of alcohol and other drugs.

For more detailed descriptions of these and other mental health services please visit [http://codes.ohio.gov/oac/5122-29](http://codes.ohio.gov/oac/5122-29)

The Mental Health and Addiction Recovery Services Board may subsidize certain services and specialized programs for individuals that meet qualification requirements. The following information provided by our Service Providers contains descriptions of services and programs not necessarily covered by public mental health and addiction recovery services funds. Please contact each agency or the Mental Health and Addiction Recovery Services Board for additional information.

Mental Health Services:

- Counseling (Individual & Group)
- Diagnostic Assessment
- Pharmacological Management (Medication)
- Emergency (Crisis Intervention)
- Education
- Community Psychiatric Supportive Treatment (Case Management)
Addiction Recovery Services Offered

- **Substance Abuse Treatment (Adults):** It is the philosophy of this program that individuals benefit most from a holistic biopsychosocial approach to care which includes attention to physical, emotional, social, interpersonal, and spiritual well-being. All of our groups require 12 step group participation; coordination with a physician for medical care; random drug screens; family participation; referrals to other appropriate community resources as needed; and individual case management to monitor progress in all major life areas along with abstinence from all mood altering chemicals. Target populations are 18 and older.

- **Substance Abuse Treatment (Adolescents):** The Seven Challenges® program is designed specifically for adolescents with substance abuse issues, to motivate a decision and commitment to change – and to support success in implementing the desired changes. The Program simultaneously helps young people address their drug problems as well as their co-occurring life skill deficits, situational problems, and psychological problems. The Seven Challenges is listed as an evidence-based program in the SAMHSA National Registry of Evidence-Based Programs and Practices (NREBPP).

Prevention/Education Services Offered

- **Incredible Years Program:** The program is designed to promote emotional and social competence and to prevent, reduce, and treat aggression and emotional programs in young children 0-12 years old.

- **The Seven Challenges®:** As described above, has a prevention component within the program.

Specialized Mental Health & Support Programs:

- **School Based Treatment:** Provide on-site mental health therapy in various schools, for example Middletown elementary, middle and high schools, to Medicaid eligible children.

- **Substance Abuse Treatment (Adults):** It is the philosophy of this program that individuals benefit most from a holistic biopsychosocial approach to care which includes attention to physical, emotional, social, interpersonal, and spiritual well-being. All of our groups require 12 step group participation; coordination with a physician for medical care; random drug screens; family participation; referrals to other appropriate community resources as needed; and individual case management to monitor progress in all major life areas along with abstinence from all mood altering chemicals. Target populations are 18 and older.

- **Play Therapy:** Play Therapy has increasingly become the choice of treatment for children dealing with emotional and behavioral disorders. The understanding of play as the natural mode of communication and self-expression for children has become the norm. Play therapy is utilized to treat a multitude of behavioral problems including adjustment issues, anxiety, attachment problems, Attention Deficit Hyperactivity Disorder (ADHD), autism, depression, disruptive behavior problems, and self-esteem issues. It is also used to help children process through difficult life circumstances such as death or loss, divorce, domestic violence, personal illness, traumatic experiences such as physical and sexual abuse, and natural disasters. Most importantly children, as well as their families and significant others, benefit and grow through the healing powers of Play Therapy.
• **Dialectical Behavior Therapy (DBT):** DBT for adults and adolescents is a therapy designed to help people suffering from disorders such as depression, bipolar and anxiety as well as those who need to change patterns of behavior that are not helpful, such as self-harm, suicidal thoughts and drug abuse. This approach works towards helping people increase their ability to self-regulate their emotional and cognitive triggers that lead to making choices that make the situation worse. It also helps to assess which coping skills to apply in the sequence of events, thought, feelings, and behaviors to help avoid undesired reactions and consequences. DBT assumes that people are doing their best but lack the skills needed to succeed, or are influenced by their environment that interferes with their ability to function appropriately.

• **Trauma Focus:** We have a trauma team that has Certified Trauma Practitioners (CTP) that specializes in treating trauma for both adults and children. In addition, we have therapists that can provide the following treatments:

  o **Cognitive Processing Therapy (CPT):** CPT is a cognitive-behavioral treatment for posttraumatic stress disorder (PTSD) and related problems. The overall goals of CPT are to reduce PTSD symptoms, and associated symptoms such as depression, anxiety, guilt and shame. It also aims to improve day-to-day living; CPT consists of 12 individual (one-on-one) therapy sessions. Each session lasts 50 – 60 minutes. If conducted in a group, the 12 sessions will last 90 minutes each. In these sessions, participants will learn about the symptoms of PTSD and why some people develop them.

  o **Eye Movement Desensitization and Reprocessing (EMDR):** EMDR is an evidenced based integrative psychotherapy approach that has been extensively researched and proven effective for the treatment of trauma. EMDR is a set of standardized protocols that incorporates elements from many different treatment approaches. To date, EMDR therapy has helped millions of people of all ages relieve many types of psychological stress.

  o **"Structured Sensory Interventions for Traumatized Children, Adolescents and Parents" (SITCAP®):** SITCAP® is an evidence-based, structured sensory program utilizing interventions that teach how to apply mind body skills while focusing on the primary themes of trauma including safety, worry, hurt, fear, anger, revenge and moving from victim to survivor thinking. Helping clients understand how trauma impacts brain functions of memory, emotional regulation, behavior, and learning. Clients learn and practice mind-body skills for emotional regulation and how to develop strategies to foster resilience and enable clients to not just survive but thrive.
Specialized Addiction Recovery Programs

- **Dually Diagnosed Treatment (Adolescents and Adults):** The purpose and goals of this program is to provide intensive outpatient mental health/substance abuse services to clients who suffer from mental illness and substance abuse and to gear mental health and substance abuse services and topics to better meet the needs of the mentally ill, accounting for the client’s life condition and mental condition in her/his recovery. The target populations are adolescent and adult males and females who receive a primary severe mental health diagnosis and a substance abuse/dependency diagnosis and who would benefit from dual diagnosis treatment.

- **Medicated Assisted Treatment (MAT):** Medication-Assisted Treatment (MAT) is the use of medications, in combination with counseling and behavioral therapies, to provide a “whole-patient” approach to the treatment of substance use disorders. Research shows that a combination of medication and therapy can successfully treat these disorders, and for some people struggling with addiction, MAT can help sustain recovery. MAT is primarily used for the treatment of addiction to opioids such as heroin and prescription pain relievers that contain opiates. The prescribed medication operates to normalize brain chemistry, block the euphoric effects of alcohol and opioids, relieve physiological cravings, and normalize body functions without the negative effects of the abused drug. Medications used in MAT are approved by the Food and Drug Administration (FDA), and MAT programs are clinically driven and tailored to meet each patient’s needs.
Specialized Mental Health & Addiction Recovery Programs:

- **Inpatient Psychiatric Treatment:** If you or a loved one age 18 or older has a mental health crisis, our inpatient behavioral health services can help you. Our professional team of psychiatrists, nurses and social workers provides you with a safe, welcoming atmosphere and well-tested therapies to help you get through the crisis and return safely home.

  We accept patients with a wide range of mental and behavioral disorders, but we primarily treat people who have: bipolar disorder, depression, schizophrenia, schizoaffective disorder.

  We customize a structured, holistic program for you and each patient on our unit to include individual psychotherapy, group therapy and problem solving, family therapy, education and medication.

  As a patient on our unit, you’ll work with a team of psychiatrists, nurses and social workers. They will assess you and assist you in setting goals for a healthier, more balanced mindset. We’ll measure your progress frequently and be alert to any setbacks.

  Medication is an important part of your care. It can help you feel better, improve your mood, lessen anxiety, and decrease suicidal thoughts or hearing voices. We’ll manage it closely with the goal that you receive the maximum benefit.

  We encourage you to attend classes and activities that will help you better understand how to improve your overall physical and mental health: how medications work, proper nutrition, coping skills and life skills, recreational activities.

  A thorough medical examination is also an important part of your treatment. Our doctors may order lab work, imaging tests or other tests to help identify physical conditions that are contributing to or worsening your illness. We can treat these conditions while you are in the hospital.

  Our team will make recommendations for when you leave the hospital. They will talk to you about outpatient resources and community agencies.

  We treat alcohol and chemical dependency only as they affect your mental health disorder. We do not offer detoxification or alcohol and drug rehabilitation on site, but are happy to refer you to appropriate facilities or programs.
Beckett Springs Hospital

**Mental Health Services:**
- Integrated Care Management for adults and youth
- Crisis Intervention
- Diagnostic Assessment
- Education/Consultation/Prevention
- Information & Referral
- Intensive Home Based Treatment
- Mental Health and Substance Use Disorder Counseling (Individual & Group)
- Pharmacological Management (Medication)
- School Based Therapy
- Uplift Senior Services
- Vocational/Employment
**Specialized Mental Health & Support Programs:**

- **Crisis Consultation & Intervention (CCI):** The purpose of the CCI program is to provide a safety-net for any individual in the county who is experiencing an acute mental health emergency.
  
  - Mobile, county-wide service providing pre-hospital screening, crisis intervention, crisis consultation, post-crisis follow-up services, critical incident stress management and referral/linkage services. Available 24/7 for all ages.
  
  - Consultation/educational services to schools, juvenile detention, homeless shelters and other facilities that frequently serve individuals during a mental health emergency.

  **Butler County Consultation & Crisis Center:** (513) 881-7180
  
  - Monday – Friday: 8:00 AM – 5:00 pm
  
  - After hours, Weekends & Holidays: 1-844-4CRISIS (1-844-427-4747)

- **Mobile Response and Stabilization Services (MRSS):** Families with youth and young adults up to the age 22 who are experiencing difficulties or distress can receive assistance within 60 minutes after contacting MRSS. MRSS services are also available for 45 days of intensive, in-home services and linkage to ongoing supports. Services provided may include:
  
  - Safety Assessments
  
  - De-escalation
  
  - Peer Support
  
  - Skill building and others.

  **Access through the County Hotline:** 1-844-4CRISIS (1-844-427-4747)

- **Health Now Integrated Care Management:** Health Now is an integrated care management designed to improve the physical and behavioral health of children, adolescents and adults with serious and persistent mental disorders. *Health Now* staff supplements the behavioral health and medical services each client receives in order to promote excellent care coordination among providers, to advocate for state-of-the-art medical care, to teach each client health self-management skills and to promote healthy lifestyle choices. *Note: Health Home services are limited to individuals with qualifying diagnoses and who are current recipients of Ohio Medicaid.*

  **Hamilton/Southern Butler County:** (513) 645-9550
  
  **County-wide Services:** (513) 896-7887

- **Uplift Senior Services:** Uplift is an evidence-based program designed for adults (60+) experiencing symptoms of depression and anxiety. Uplift consists of eight one-on-one sessions that take place in the comfort of home over the course of 5-6 months. Uplift utilizes the PEARLS model (Program to Encourage Active, Rewarding Lives). Focus is on development of problem solving skills and activity planning to help improve overall mental health.

  **County-wide Services:** (513) 896-7887

- **WINGS Intensive Home-based Treatment:** The mission of the WINGS Intensive Home-Based Treatment program is to improve the psychological functioning of youth ages 0-18
years old that are at risk of out-of-home placement and facilitate their continued placement with their family and their inclusion in mainstream community & school life.
-Serves as a step-up for youth who fail to benefit from outpatient behavioral programs
-Serves as a step-down from residential programs.
-Offers intensive, non-traditional services with frequent therapeutic interventions per week and a team of providers who have low caseloads.
County-wide Services: (513) 896-7887

- **Workplace Associates Program:** The mission of Workplace Associates is to help individuals with disabilities to gain and retain employment in the community. Workplace Associates has been helping to “Quietly Create Taxpayers” since 1993, providing career services to people with various disabilities and barriers.
- Provides vocational case management & career counseling to severely emotionally disturbed youth between the ages of 16 – 18.
- Provides supported employment services including Career Assessment, Job Try-Outs, Individualized Job Placement, Job Coaching (at or away from the work site), and Job Retention Services for adults.
- Service hours vary depending on work site and includes evening and weekend hours.
  (513) 867-5400

- **Harbor House Clubhouse:** The mission of Harbor House Clubhouse is to improve the quality of life of adults with severe, persistent mental disorders by helping them to expand their social support, community living skills and to help their fellow members do the same. Staff facilitates this self-help, peer support process. Clients may also receive psycho-educational services designed to teach self-advocacy, promote healthy lifestyle choices, expose clients to new community resources, teach computer literacy and prepare for completion of GED. The Harbor House is also the site for integrated medical care provided by *Primary Health Solutions.*
  (513) 896-7880

- **School Based Treatment:** School-based Treatment (SBT) is to provide year round counseling services within the educational setting of the child when circumstances or needs limit access to services in an outpatient setting. The SBT program strives to include parents in the treatment process and to provide access throughout the year.

### Mental Health Services:
- Diagnostic Assessment
- Individual Counseling
- Pharmacological Management (Medication)
- Education, Consultation & Prevention
- Housing
- Community Psychiatric Supportive Treatment (Case Management)
- Community Linkage
- Mental Health and Case Management Groups

### Specialized Mental Health & Support Programs:
- **Mental Health Counseling Services:** A program designed to treat clients with mental health disorders utilizing evidence-based interventions, such as cognitive behavioral therapy, client-centered therapy, solution-focused therapy and DBT-skills. Mental Health counselors also provide couples and family therapy sessions.

- **SAMI Court Services:** This is a court ordered program that provides Integrated Dual Diagnosis Treatment (IDDT) for offenders supervised under community control by the Butler County Court of Common Pleas. The program serves both male and female clients ages 18 and over that have been convicted of a felony offense and diagnosed with both a mental illness and a drug and/or alcohol problem. The program provides dual assessments, pharmacological management, community psychiatric supportive treatment, counseling/therapy (individual and group) and consultation services.

- **Case Management Program:** A voluntary program that serves adults ages 18 and over by providing CPST and TBS services for those with persistent, chronic, and severe mental health disorders. Many case management clients have co-occurring problems with substance use/abuse. Case Managers primarily serve clients in community settings.
• **Connections**: Provides a short-term program to assist Butler County residents with accessing mental health care. The program assists residents who have been taking a prescribed psychiatric medication within the last 45 days and do not have a long-term mental health provider. Often these individuals are being discharged from a hospital or released from jail. The goal of Connections is to ensure Butler County residents have access to their psychiatric medications to prevent decompensation. To accomplish this goal, Connections provides interim medication management and case management while identifying and connecting the client with appropriate long-term mental health services.

• **Mental Health Housing**: Offers apartments throughout Butler County for individuals who have mental illness, are receiving CPST (Case Management) services, and have the ability to pay rent.

• **Probate Monitor**: Provides clinical oversight and court liaison services for consumers who are civilly probated to the Butler County Mental Health and Addiction Recovery Services Board by the Butler County Probate Court.

• **Forensic Monitor**: Provides clinical oversight and court liaison services for consumers involved with the criminal court and, due to their mental health status, are found to be incompetent to stand trial or cannot be convicted due to their mental status at the time of the criminal defense.

• **Chief Clinical Officer Designee (CCOD)**: Represents the Butler County Mental Health Addictions Recovery Services Board providing clinical oversight of Butler County mental health consumers residing in a hospital or in a community group home subsidized by the Board. The CCOD provides on-going assessments of consumers that are ordered to be monitored by the forensic monitoring process to safeguard the community while maintaining the integrity of the most appropriate level of care.

• **Sex Offender Individuals and Group Program**: This program provides evidence-based treatment to clients with a history of sex offense charges. County Probation, State Probation, and Parole primarily refer this program, though other referrals are welcome.
Addiction Recovery Services:

- **Ambulatory Detox**: This program offers detox services to clients with opiate use disorders on an outpatient basis. This program assists clients with opiate withdrawals utilizing over-the-counter and prescribed medications in a comfortable outpatient setting. Treatment typically lasts 5 to 7 days.

- **Partial Hospitalization**: This outpatient program meets five days a week for four hours a day. Client therapeutic treatment utilizes evidence-based interventions and curriculum. Clients also receive individual counseling, case management, and urinalysis testing within this treatment program.

- **Intensive Outpatient (IOP)**: The groups meet 3-4 times a week for three hours a day, depending on the severity of client’s illness. Client therapeutic treatment utilizes evidence-based interventions and curriculum. Clients also receive individual counseling, case management, and urinalysis testing within this treatment program.

- **Outpatient Treatment**: The groups meet 2 times a week for 2 hours. Client therapeutic treatment utilizes evidence-based interventions and curriculum. Clients also receive individual counseling, case management, and urinalysis testing within this treatment program. Seeking Safety and CBT specific groups available.

- **Relapse Prevention**: This group is once a week for 2 hours. Clients learn relapse prevention strategies based on evidence-based interventions and curriculum. Clients also receive individual counseling, case management, and urinalysis testing within this treatment program.

- **Jail Services**: Offers assessment, IOP, individual, and case management services to inmates located at the Butler County jail.

- **Jail Outreach Program**: A program that helps with re-entry for individuals with substance use disorders coming out of the jail system. The program will focus on linkage to services back in the community.

- **Treatment Alternatives for Safer Communities**: Offers assessment, case management, and linkage services to clients who are chemically dependent and involved in the legal system.

- **Peer Support Services**: Provide peer support services to individuals referred for services or transitioning out of the jail system to help adjust and connect in the community.

Education Services:

- **Men and Women’s Anger Management**: This group is for clients who have difficulty managing their anger, and who may have previous arrests caused by anger responses. This program provides group education for a length of time, depending upon each client’s individualized recommendation. Education consists of evidence-based interventions and curriculum. Individual sessions are offered in conjunction with group sessions. These groups are gender specific.

- **Batterer’s Intervention Program**: This program is for clients with a history of physical abuse towards an intimate partner. This program provides group education for a length of time, depending upon each client’s individualized recommendation. Education consists of
interventions and curriculum. Individual sessions are offered in conjunction with group session. These groups are gender specific.

- **New Perspectives**: This program is for victims of domestic violence. The program provides group education for a length of time depending on individual client needs. The program utilizes evidence-based interventions and curriculum. These groups are gender specific.

- **Corrective Thinking Group**: This program is for clients with a history of criminal or antisocial thinking patterns. The program lasts for a period of six weeks with each session lasting one and one-half hours. Group sessions consist of evidence-based curriculum, *True Thought*.

- **Theft Group**: This group provides evidence based interventions and curriculum for clients with a history of stealing or theft. There is a onetime seminar lasting 4 hours. If recommended, clients will then attend Corrective Thinking group focused on specific criminal thinking patterns that correlate to stealing.

- **Substance Abuse Education**: This program is for clients who do not meet criteria for a substance use disorder or who have a mild substance use disorders. Services provided in the form of a group and/or individual for a length of time based upon client need. Clients are drug screened and monitored for signs/symptoms of more severe abuse/use during attendance. If signs/symptoms or a positive drug screen occur, clients will be referred to the appropriate level of care.

- Pharmacological Management (Medication)
- Community Psychiatric Supportive Treatment (Case Management)
- Community Linkage
- Crisis Intervention

Addiction Recovery Services

- Withdrawal Management (WM): The withdrawal process is one of the first major hurdles on the road to recovery. We offer a private space for clients while staff members ensure that the withdrawal process occurs in a safe and comforting manner. During withdrawal management (WM), our interdisciplinary staff will ensure you are receiving the highest quality medical care along with safely making the transition to aftercare.
• **Intensive Outpatient (IOP):** The Intensive Outpatient Treatment program (IOP) is geared towards individuals who are new to treatment or have been struggling with substance abuse for an extended period. Using ASAM criteria, those eligible for this program receive intensive treatment while fulfilling other life commitments, such as school or work. Group counseling occurs 3 times per week along with individual counseling sessions and visits with our medical staff using a person-centered approach.

• **Outpatient (OP):** The Outpatient Treatment Program (OP) is generally a “step down” from a higher level of care and allows for individuals to continue in recovery while maintaining employment or while being enrolled in further education. This program utilizes Medication Assisted Treatment (MAT) therapies couples with a group and individual counseling to promote a successful recovery and personal approach to treatment.

• **Adult Corrections Collaboration (ACC):** This person-centered program meets required criteria for local and state probation and parole departments. Clients involved in this program attend Corrective Thinking and Anger Management groups after initial diagnostic assessment.

• **Opioid Treatment Program (OTP):** Operating as a SAMSHA certified Opioid Treatment Provider, clients can receive medications on-site while participating in IOP or OP structured groups.

• **Relapse Prevention (RP):** A follow up program to IOP and OP groups, focusing on effective ways to identify relapse warning signs and triggers. Clients utilize role-play to act out scenarios and maintain sobriety.

• **Medication-Assisted Treatment (MAT):** Our MAT program for opiate and alcohol addiction is designed in coordination with IOP or OP therapy while utilizing buprenorphine or Vivitrol as a complement to trauma focused-cognitive behavioral therapy (TF-CBT). Each patient’s treatment is individualized by a multidisciplinary team to promote holistic care and create a successful pathway toward recovery.

**Prevention/Education Services:**

• **Narcan Training:** In Collaboration with the Butler County Public Health District, DeCoach offers on-site Narcan trainings for any eligible providers and/or community members who may be interested.

**Specialized Addiction Recovery Programs**

• **Pregnant Women in Recovery:** This program focuses on providing and monitoring specialized medication dosage and neonatal care to both the expectant mother and unborn child. Coordination and linkage to outside OBGYN providers is priority in this program to overall safety for mother and child.

Prevention Services:

- **Substance abuse, behavioral health prevention, education and consultation:** A behavioral health risk reduction/strength based intervention and prevention approach for direct and indirect services.

- **Project Success:** A comprehensive/broad brush prevention program incorporating multiple prevention strategies that reach universal, selective and indicated populations (youth and adults). Includes: classroom based instruction; county and school wide prevention activities; teacher/staff training/in-services and consultations; informal screenings; problem ID/referral and parent education.

- **Butler County Youth & Community Development:** Expanding community resources and enhancing community group’s ability to organize, plan and network in an effort to prevent substance use and abuse in their own communities. Youth programs meet their clients’ key developmental needs by building assets. Community plays a vital role in behavioral health prevention advocacy efforts.

- **Adult Prevention Minimize Risk – Maximize Life:** Educate Butler County residents about the Low Risk Drinking Guidelines and the standard drink definition. Focus on direct service delivery, the goal is to know people intend to use the information to make low risk choices regarding their drinking decisions.

- **Butler County Gambling Prevention Project:** Utilize the current knowledge and understanding of the considerable impact of problem gambling on the health and well-being of the community. Priorities are to: Delay participation in gambling until legal age; Prevent the onset of gambling problems by reducing associated risks through public awareness and education.

- **Butler County Suicide Prevention Project:** Utilize the current data and understanding of the public health concerns of suicide in our county. Evidence-based suicide prevention programs are available for youth. Evidence-based suicide prevention training is available for adults who work with at-risk populations.
• **Community Presentations:** provide presentations to community groups to increase understanding of addiction/mental health conditions and their impact on the community, business, families and individuals. Developed for the needs of your group around 4 pillars of prevention: Substance Abuse, Gambling, Violence and Suicide.

• **Camp Mariposa:** we offer prevention and mentoring camps for youth who have been impacted by substance abuse in their families. Children ages 9 – 12 are eligible at weekend camps multiple times a year. Family activities add to the experience and success and are offered in between camps.

Specialized Mental Health Support Programs:

- **Representative Payee Program:** LifeSpan partners with the Social Security Administration to manage money and pay bills for those adults with disability or mental illness who cannot manage on their own, ensuring that bills are paid on time to keep rent and utilities current and lives stable. We also provide a Private Pay Payee Program for individuals who desire a payee service that can help them establish a budget and take over paying their bills with their deposited funds.

- **Guardianship Program:** LifeSpan court-appointed guardians have a dramatic impact on the quality of life of our community’s most vulnerable residents by providing stability, safety and companionship to adults 18 and up that need someone to manage life changes and decisions when they cannot manage them on their own due to mental illness or disability.

- **School Based Support Services:** LifeSpan’s School Based Support Workers (SBSW) reduce and/or remove the barriers to academic achievement and increase students’ social-emotional development and overall mental health. SBSW’s work every day in local high school buildings to provide support to students, families and school staff. This service takes many shapes, according to the identified needs of the students and families. The School Based Support Service Program is uniquely positioned to provide:
  - Prevention services that help engage students to build skills allowing for personal and academic success
  - Intervention services including assessment of student needs, goal driven achievement plans, individual face-to-face support, and support groups (anger management, life skills)
  - Crisis Intervention support during times of crisis and referral to an appropriate professional or service in the community
- Information and Referral Services including medical, food, housing, employment needs, educational opportunities, day care and positive community activities.
- Collaboration with school staff to support students as appropriate
NAMI Butler County

Populations Served: Families, friends and individuals who have been impacted by mental health issues. All services provided are free of charge.

See information at www.nami-bc.org for virtual programs and support groups

Programs and Services:

- **Family to Family Class**: Free 8 week evidence-based education program providing support and education to family members and friends of individuals who are living with mental illness. Trained volunteers who have experience supporting a loved one with mental health disorders teach classes. In addition to learning about treatment strategies, and how to more effectively communicate with loves ones, many participants also find the emotional support they receive crucial during their loved ones’ times of illness and stress. Registration required. See website (above) for class times and registration.

- **Family Support Group**: For family and friends of individuals struggling with mental health disorders. See website (above) for times and locations.

- **NAMI Basics Class**: Free 6 week program that fosters learning, healing and empowerment among parents and families of children with emotional/mental/neurobiological disorders. Registration required. See website (above) or call the office for more information.

- **NAMI Connection Recovery Support Group**: Peer-facilitated support group for adults living with mental illness. Group provides an opportunity to share challenges, strategies, and successes with others who understand. See website (above) for times and locations.

- **Educational Meetings**: Held the second Thursday of the month at 6:30 pm, NAMI Educational Meetings host speakers presenting on a variety of mental health educational topics. Adults welcome, no registration required. See website (above) for location and monthly topic.

- **Community Presentations**: NAMI staff and volunteers provide presentations to community groups to increase understanding of mental health conditions and their impact on the community, business, families and individuals. Please call the office for further information.
• **Lending Library:** Open before monthly Educational Meetings, classes and support groups held at the NAMI Butler County office. Library features fiction and non-fiction books on a variety of mental health topics.

• **NAMI Walk:** Single largest community awareness event for mental health in Butler County. Held the second Saturday of October at the Fitton Center for Creative Arts in Hamilton, Ohio.

• **Speakers’ Bureau /In Our Own Voice:** Volunteer speakers dedicated to promoting better understanding of mental illness, living in recovery, and living with a loved one with an illness.

• **Annual Awards Dinner:** An annual dinner held to recognize outstanding contributions in service to families and individuals in Butler County and the surrounding area who have been impacted by mental health disorders and/or addiction.

Mental Health Services:
- Case Management/Coordination and Support
- Counseling (Individual & Group)
- Psychiatric Diagnostic Assessment
- Psychiatric Services (Medication)
- Residential Treatment
- Information, Screening & Referral

Specialized Mental Health & Support Programs:
- PATH Homeless Outreach Program: Services provided to consumers from the PATH Team staff are outreach and engagement. Adults who are homeless or are at high risk for being homeless in the community, who have severe and persistent mental health needs make up the targeted population. The PATH Team provides outreach into the community to locations and areas that these individuals may be living or frequenting. Many of the referrals into this program are initiated by PATH staff; however, many referrals also come from community individuals, police & fire departments, churches, and other agencies that provide basic needs services to these individuals. The goal of the program is to engage these individuals into mainstream services such as housing, psychiatry, counseling, and other mental health services including medical treatment.

- Outreach Program: Aggressive outreach into the community through follow-up with area Courts, Common Pleas Courts, Municipal Courts, Jails, Police Departments as well as ride alongs with police in Butler County to improve referral accessibility for mental health services and other appropriate social service resources.
• **Treatment Alternative Court:** Our Mental Health Court Outreach Team works with the Fairfield Municipal Court in their Treatment Alternative Court Program as well as with the Hamilton Municipal Court, in their Mental Health Court program. These programs work with Butler County Residents who are charged with misdemeanor crimes and also have a diagnosis of severe and persistent mental illness. Individuals are referred to the program through the Judge, family members, attorneys, and often through the police. Individuals who qualify for this program would be eligible for specialized mental health services and programming, may be eligible to avoid jail time by participating in treatment in lieu of incarceration.

• **Treatment and Assessment Program (TAP):** This Residential Program provides 24-hour intensive supervision and skill building for Butler County residents ages 18 and older who have been diagnosed with severe and persistent mental health disorders. Residents are referred from community hospital psychiatric units, Summit Behavioral Healthcare, family, friends, or clients may refer themselves. The capacity is 25 residents. The program is designed to improve psychiatric stability, and provide support and training in the development of independent living skills. Medications are monitored by staff while the resident is on grounds, and staff work with residents on increasing their understanding of their medications. Throughout their stay at TAP, residents work closely with their other treatment providers, such as their Case Manager, Medical staff, or possibly a Therapist, since our TAP building is on the same grounds as our Administration building where these providers are located. Outings to the community are part of the schedule of activities. The TAP program works cooperatively with each resident and their treatment providers towards a goal of discharging to community housing at their highest level of functioning, or to determine the best long term residential setting.

• **Jail Services:** Provides crisis intervention, education/prevention, consultation, referral, discharge planning and case coordination to inmates identified as being in need of mental health services in the Butler County Jail.
### Hours of Operation:
24 hours a day, 7 days a week

### Payment Sources:
Project Based Voucher rental subsidy/other public housing subsidies, sliding scale for uninsured, and Medicaid. Clients are not required to have a source of income.

### Populations Served:
Individuals, and those who typically self-identify as Female, ages 18 and up, who are homeless, have chronic Homelessness, or at substantial risk of homelessness

### Special Populations Served:
Homeless, Disabled, Mental Health and/or Substance Use Disorder

### Mental Health Services:
- **Community Psychiatric Supportive Treatment (Case Management):** Community Psychiatric Supportive Treatment (CPST) is an array of services which address the individualized mental health and substance use disorder needs of the client. The purpose is to provide specific, measurable, and individualized services to each person served to help them reach their maximum potential and independence.

- **Housing/Residential Care:** Housing consists of each client having their own efficiency apartment. Each apartment has a full bathroom and kitchenette. Residential Care offers supportive services to help clients live successfully and independently. Each apartment is furnished.

- **Diagnostic Assessment:** A Diagnostic Assessment is a structured interview that gathers information to determine a client’s mental health diagnosis.

- **Life Skills Instruction:** Life Skills Instruction is completed in individual and group settings. Life Skills are skills that are necessary for full participation in everyday life. Life skills are abilities that enable clients to deal effectively with the demands and challenges commonly encountered in daily human life.

- **Direct and support services available from YWCA staff or partner service providers, include the following:**
  - Case management service coordination 24/7 on site
  - New tenant orientation, tenant rights education, and move in assistance
  - On-going education and support for “good neighbor” tenant expectations and apartment care (life and daily living skills education and support)
- Primary health (including OB/GYN OT/PT, pain management, home health services-visiting nurse care, dental/ophthalmology services), individual mental health/behavioral health, AOD treatment and supporting, including psychiatric services, medication assisted treatment and recovery, recovery readiness and relapse planning, harm reduction services
- Crisis intervention and conflict resolution/mediation education and support
- Support groups, including grief and bereavement groups, DV and SA recovery support groups
- Education/GED
- Job/employment training
- Income sources such as SSI/SSDI
- Financial literacy
- Assistance with Entitlement Program benefits such as Medicaid and Medicare benefits, food stamps
- Legal Assistance – legal aid
- Transportation support services
- Nutritional classes and access to supportive food sources and benefits
- Art therapy and recreational services
- Peer support groups
- Smoking cessation
# Anxiety Survey

**Generalized Anxiety Disorder (GAD-7) Anxiety Scale**

<table>
<thead>

Substance Abuse Survey

Self-Administered Screening Instrument

The questions that follow are about your use of alcohol and other drugs. Mark the response that best fits for you. Answer the questions in terms of your experiences in the past 6 months.

<table>
<thead>
<tr>
<th>Question</th>
<th>Y or N</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Have you used alcohol or other drugs (such as wine, beer, hard liquor, pot, coke, heroine or other opioids, uppers, downers, hallucinogens, or inhalants)</td>
<td></td>
</tr>
<tr>
<td>2. Have you felt that you use too much alcohol or other drugs?</td>
<td></td>
</tr>
<tr>
<td>3. Have you tried to cut down or quit drinking or using alcohol or other drugs?</td>
<td></td>
</tr>
<tr>
<td>4. Have you gone to anyone for help because of your drinking or drug use? (such as Alcoholics Anonymous, Narcotics Anonymous, Cocaine Anonymous, counselors, or a treatment program)</td>
<td></td>
</tr>
<tr>
<td>5. Have you had any health problems? For example, have you:</td>
<td></td>
</tr>
<tr>
<td>- Had blackouts or other periods of memory loss?</td>
<td></td>
</tr>
<tr>
<td>- Injured your head after drinking or using drugs?</td>
<td></td>
</tr>
<tr>
<td>- Had convulsions, delirium tremens (“DTs”)?</td>
<td></td>
</tr>
<tr>
<td>- Had hepatitis or other liver problems?</td>
<td></td>
</tr>
<tr>
<td>- Felt sick, shaky or depressed when you stopped using alcohol or drugs?</td>
<td></td>
</tr>
<tr>
<td>- Felt “coke bugs” or a crawling feeling under the skin after you stopped using drugs?</td>
<td></td>
</tr>
<tr>
<td>- Been injured after drinking or using?</td>
<td></td>
</tr>
<tr>
<td>- Used needles to shoot drugs?</td>
<td></td>
</tr>
<tr>
<td>6. Has drinking or other drug use caused problems between you and your family or friends?</td>
<td></td>
</tr>
<tr>
<td>7. Has your drinking or other drug use caused problems at school or at work?</td>
<td></td>
</tr>
<tr>
<td>8. Have you been arrested or had other legal problems? (such as bouncing bad checks, driving while intoxicated, theft or drug possession)</td>
<td></td>
</tr>
<tr>
<td>9. Have you lost your temper or gotten into arguments or fights while drinking or using other drugs?</td>
<td></td>
</tr>
</tbody>
</table>
Substance Abuse Survey

Self-Administered Screening Instrument (Continued)

10. Are you needing to drink or use drugs more and more to get the effect you want?  
   Y or N

11. Do you spend a lot of time thinking about or trying to get alcohol or other drugs?  
   Y or N

12. When drinking or using drugs, are you more likely to do something you wouldn’t normally do, such as break rules, break the law, sell things that are important to you, or have unprotected sex with someone?  
   Y or N

13. Do you feel bad or guilty about your drinking or drug use?  
   Y or N

The next questions are about your lifetime experiences:

14. Have you ever had a drinking or other drug problem?  
   Y or N

15. Have any of your family members ever had a drinking or drug problem?  
   Y or N

16. Do you feel that you have a drinking or drug problem now?  
   Y or N

Scoring: Questions 1 and 15 are not scored.  
Give yourself 1 point for every Yes circled and add sum of questions 2 through 14 and 16.
