In consideration of the granting of this permit, the applicant agrees to defend, indemnify and hold harmless the City of Bellflower ("City") and each of its officers and employees from any liability or responsibility for any claim, personal injury, death property damage, judgment, award and cost, including reasonable attorney's fees and court costs arising, directly or indirectly, as a result of any work undertaken under the terms of this application and the permit or permits which may be granted in response hereto. It is further agreed, if any part of the installations, which are the subject of this application and permit, interfere with the future use, for any public purpose, of the subject right-of-way, then those installations must be removed or relocated, as designated by and to the reasonable satisfaction of the City's Manager or his/her authorized representative ("City Manager").

1. This permit provides for construction and maintenance of public improvement, utility installations and encroachments such as sidewalks, driveway approaches, wall, trees and drainage outlets appurtenant to the use of adjacent private property, within City right-of-way and property of the City.

2. This permit shall not establish any precedent, waive any right of the City or waive any obligation of the applicant.

3. Permit is void upon its expiration date and thereafter a new permit will be required and an additional fee will be assessed.

4. The applicant or the applicant's contractor and subcontractors performing the subject work are required to submit proof of valid commercial general liability insurance and automobile liability insurance, in a form satisfactory to the City. That insurance must maintain no less than the following limits: (a) commercial liability - minimum $1,000,000 single-limit per occurrence for bodily injury, personal injury or property damage, unless a higher minimum is determined necessary by the City during plan review. If a general aggregate limit is used, then the general aggregate limit shall apply separately to this project or the general aggregate limit shall be twice the required occurrence limit, (b) automobile liability - $1,000,000 combined single-limit per accident for bodily injury and property damage and (c) pollution liability - $1,000,000 per claim and aggregate when (i) the soil is disturbed below five (5) feet from original grade, or (ii) involves more than 250 linear feet of street frontage or (iii) involves more than 5,000 square feet of area within the public right-of-way, and (iv) is determined applicable by the City Manager. Those policies shall also (i) name the City, and its officers, agents and employees as additional insureds, (ii) include a severability of interests clause and (ii) not be changed, canceled or otherwise terminated as to the interest of the additional insureds named herein without first giving thirty-days' (30-days') written notice thereof to the City or be endorsed to provide the same provisions, except for non-payment which shall require at least ten-days' (10-days) notice as stated above. Insurance is to be placed with insurers with Best's rating of no less than A- (minus). Failure to submit the documentation before the start of work will void the permit.

5. Applicant acknowledges and assumes all responsibility for compliance with the requirements of other regulatory governing agencies, including, but not limited to, rules, regulations, ordinances and laws of the County of Los Angeles, State of California, City and others having regulatory control over the use granted herein.

6. If any damage or injury occurs to City works or property during use and/or as a result of this permit, then the applicant shall immediately, upon written demand of the City, restore such works or property to the same condition as on the date of the occurrence of said damage or injury at the applicant's cost or expense. The question of whether damage or injury has been caused to works or property shall be determined by the City and that determination shall be final. In the event repair by the City is required; applicant shall reimburse the City for the direct and indirect cost of repair.

7. All work shall be done in accordance with the approved plans and specifications and the recognized standards of the City and the current edition of the "Standard Specifications for Public Works Construction" to the reasonable satisfaction of the City.

8. All underground work requires "inquiry identification number" from underground service alert regional notification center. Applicant shall notify all affected utility companies and take the necessary precautions to avoid damage or interference with utility service lines, and be responsible for any damage.

9. No access work shall be performed in, on, over or under any City right-of-way or property without the full knowledge of the City’s Public Works Inspector, who shall be given not less than one working day advance notice. Failure of applicant to obtain inspection shall void this permit and necessitate reapplication. Emergency repairs by a public utility shall be reported to the City no later than the third business day after the start of work.

10. This permit may be immediately revoked for reasons in the best interest of the City, including violation of the permit requirements and provisions of other applicable rules and regulations or the creation of a nuisance upon notice given by the City Manager. Applicant shall immediately cease all operations and restore the City right-of-way or property as directed.

11. Dumpsters must have reflectors and reflectorized tape as specified by the City.

12. Traffic may only be restricted between the hours of 9:00am and 3:30pm and subject to the review of the City Manager. One lane of traffic in each direction shall be maintained at all times on major and secondary streets.

13. Construction activity is prohibited between the hours of 8:00pm and 7:00am on Monday through Saturday and all construction activity is prohibited on Sundays.

14. Adequate provision shall be made for the protection of pedestrian and vehicle traffic control will be provided per the CA MUTCD manual. All barricades must have portable flashers.

15. Adequate provision shall be made for emergency vehicle access and access to driveways, fire hydrants and utility valves.

16. Existing improvements and landscaping disturbed by work shall be restored to as good a condition as before work was started.

17. The right-of-way shall always be clean and presentable. When unattended and at the end of each work day, the site shall be properly cleaned, secured and barricaded to insure public safety. All excavations must be backfilled or plated with the exception of sidewalk and driveway approaches. The City reserves the right to plate open trenches in lieu of backfilling. No overnight storage of equipment or materials in public right-of-way is permitted. It shall be the applicant’s responsibility to locate any storage sites for material and equipment needed and such sites must be approved in advance by the City Manager.

18. Excavations for sidewalks may remain open for two days with proper barricades. Excavations for driveway approaches may remain open for two days with proper barricades and permission from the property owner.

19. Sidewalk and curb and gutter sections must be replaced scoreline to scoreline unless otherwise approved by the City Manager.

20. Permanent pavement repairs must be made within 25 calendar days after excavation work is complete. Final inspection and approval is required before permanent repairs are made.
