

2020 Generator Project

ADDENDUM 1

- To view the site, reach out to Brandon Shiflet (bshiflet@bridgewater.town). He is our electrician and will be glad to show you around.
- The best location for the generator is something we hope to see addressed in the proposal. In part, it depends on the fuel of choice. If practical, we would like to keep it across the parking lot from our building, and we also want it to be far enough away from residences that it doesn't create a nuisance.
- The building is served by natural gas.
- We hope that the location of the ATS will be part of any proposal submitted.
