

Living Well Calhoun

February 2022 Initiative

Step It Up Challenge

Complete this initiative to get a point on your ticket to wellness.

- Climb at least 10 flights of stairs, at least 5 times a week.
- 1 flight should be between 10 to 20 stairs. (No! Going down does not count!!!)
- There are four different exercises to complete as you climb. You must complete each one of them every week.

*** If stairs are not your thing, you can walk at least 30 minutes 5 times a week, while completing all four exercise during the week.**

Skip a step: Always use handrail for support. Maintain an upright posture while climbing. It's very important to stay upright while climbing the stairs. It helps engage the core muscles more.

If you are walking instead of climbing, try adding lunges during your walk. Go only as deep as you can. You can also hold your balance by placing one hand against a wall.

Squat: Complete this exercise on a landing. You can also use wall for balance. Stand as tall as you can with your feet shoulder-width apart, toes slightly pointed outward. Keep arms in front of you at chest height to help maintain balance. Drop your hips and sit back as low as you can. Pause, then drive through the heels and lift body upwards back to the starting position, squeezing the glutes at the top of the movement.

Calf Raises: Stand on the balls of your feet. Lift heels until you're standing on your tippy toes.

Abductors: Hold the handrail or place your hand on the wall for balance. Stand with one foot (support leg is slightly bent) and the working leg free to move. Lift working leg away from support leg as high as it will go while maintaining a flexed foot.

1 set = 10 reps. Repeat on other leg.
