

Ghost in the Graveyard

Ghost in the Graveyard is a super fun game that can be played anywhere! The “ghosts” try to sneak around the graveyard without getting caught by the ghost hunter. If indoors, it is especially fun to play with the lights off! You need at least 3 players, the more the better!

HOW TO PLAY

One player is chosen to be the Ghost Hunter! Their job is to catch all of the other ghosts (players). To do this, they have to catch a player moving around (laughing, talking and smiling counts!)

All of the other players want to move around as much as possible without getting caught. When the ghost hunter has their back turned, try to change poses, make a funny face, or move to a different area. Remember, ghosts are sneaky, and they are always trying to trick people and move around, so make sure you change places often!

The ghost hunter “catches” a ghost when they see them move, talk, laugh or break a smile. All the ghost hunter needs to do is point and say “I saw you move” and that ghost is out. The last ghost standing becomes the new ghost hunter in the next round!
