We acknowledge that a new swimming pool, spa or hot tub will be constructed or installed at the above referenced property and hereby affirm that one of the following methods will be used to meet the minimum requirements of Chapter 515, Florida Statutes.

Section A: Applies to all pools. (Choose one of the following)

The pool must be isolated from access from all areas by an enclosure (fence) that meets the pool barrier requirements of s. 515.29; (If this option chosen, see section B below)

The pool must be equipped with an approved safety pool cover; (Section B not required)

Section B: Applies if the home is being used as part of the pool barrier. (Choose one)

All doors and windows providing direct access from the home to the pool must be equipped with an exit alarm that has a minimum sound pressure rating of 85 dB A at 10 feet;

All doors providing direct access from the home to the pool must be equipped with a self-closing, self-latching device with a release mechanism placed no lower than 54 inches above the floor; or

A swimming pool alarm that, when placed in a pool, sounds an alarm upon detection of an accidental or unauthorized entrance into the water. Such pool alarm must meet and be independently certified to ASTM Standard F2208, titled "Standard Safety Specification for Residential Pool Alarms," which includes surface motion, pressure, sonar, laser, and infrared alarms. For purposes of this paragraph, the term "swimming pool alarm" does not include any swimming protection alarm device designed for individual use, such as an alarm attached to a child that sounds when the child exceeds a certain distance or becomes submerged in water.

I understand that not having one of the above installed at the time of final inspection, or when the pool is completed for contract purposes, will constitute a violation of Chapter 515, F.S. and will be considered as committing a misdemeanor of the second degree, punishable by fines up to \$500 and/or up to 60 days in jail as established in Chapter 775, F.S.
