

Housing Affordability Report

City of Menasha

2020

Prepared by the
City of Menasha
Community Development Department

ABSTRACT

TITLE: Housing Affordability Report

CONTACT: Sam Schroeder, Community Development Director

AUTHORS: Kristi Heim, Community Development Coordinator
 Farrah Yang, Associate Planner

SUBJECT: Housing Development Fees

DATE: January 1, 2022

In 2018, the Wisconsin State Legislature approved new legislation which requires communities of 10,000 population or more to provide an annual report related to housing in an effort to shed light and foster change on affordable housing issues across the state. Specifically, reference Wis. Stats. 66.10013 (Housing affordability report).

HOUSING AFFORDABILITY REPORT

EXECUTIVE SUMMARY

In 2018, the Wisconsin State Legislature approved new legislation which requires communities of 10,000 population or more to provide two separate annual reports related to housing and housing fees in an effort to shed light and foster change on affordable housing issues across the state. The City of Menasha, along with 11 other communities in the region, elected to contract with the East Central Wisconsin Regional Planning Commission to prepare these reports. As such, a Housing Report Advisory Team was created so that input and feedback from all communities could be considered as the reports were prepared. Specifically, this document meets the requirements for Wis. Stats. 66.10013 (Housing affordability report).

HOUSING AFFORDABILITY REPORT REQUIREMENTS

Requirements of this report include the following elements:

- (1)** In this section, “municipality” means a city or village with a population of 10,000 or more.
- (2)** Not later than January 1, 2020, a municipality shall prepare a report of the municipality's implementation of the housing element of the municipality's comprehensive plan under s. 66.1001. The municipality shall update the report annually, not later than January 31. The report shall contain all of the following:
 - a.** The number of subdivision plats, certified survey maps, condominium plats, and building permit applications approved in the prior year.
 - b.** The total number of new residential dwelling units proposed in all subdivision plats, certified survey maps, condominium plats, and building permit applications that were approved by the municipality in the prior year.
 - c.** A list and map of undeveloped parcels in the municipality that are zoned for residential development.
 - d.** A list of all undeveloped parcels in the municipality that are suitable for, but not zoned for, residential development, including vacant sites and sites that have potential for redevelopment, and a description of the zoning requirements and availability of public facilities and services for each property.
 - e.** An analysis of the municipality's residential development regulations, such as land use controls, site improvement requirements, fees and land dedication requirements, and permit procedures. The analysis shall calculate the financial impact that each regulation has on the cost of each new subdivision. The analysis shall identify ways in which the municipality can modify its construction and development regulations, lot

sizes, approval processes, and related fees. to do each of the following:

- (1) Meet existing and forecasted housing demand, and;
- (2) Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent.

HOUSING AFFORDABILITY DATA & RESPONSES

Part 2A: The number of subdivision plats, certified survey maps, condominium plats, and building permit applications approved in the prior year (2020) for the City of Menasha is illustrated in Table 1.

Table 1: City of Menasha Approved Plats, CSM's and Building Permits

Subdivision Plats	Certified Survey Maps	Condominium Plats	Single Family Building Permits	2-Family Building Permits	Multi-family Building Permits	Mobile Home Building Permits
2	7	N/A	18	0	2	4

Part 2B: The total number of new residential dwelling units proposed in all subdivision plats, certified survey maps, condominium plats, and building permit applications that were approved by the municipality in the prior year (2020) for the City of Menasha is illustrated in Table 2.

Table 2: City of Menasha Proposed Residential Dwelling Units by Type

Residential Dwelling Units (Subdivision Plats)	Residential Dwelling Units (Certified Survey Map)	Residential Dwelling Units (Condominium Plats)	Single Family Building Units	2-Family Building Units	Multi-family Building Units	Mobile Home Building Units
19	0	N/A	18	0	67	4

Parts 2C/2D: A list and map of undeveloped parcels in the municipality that are zoned for residential development. A list of all undeveloped parcels in the municipality that are suitable for, but not zoned for, residential development, including vacant sites and sites that have potential for redevelopment, and a description of the zoning requirements and availability of public facilities and services for each property.

Maps for the City of Menasha were developed using a variety of GIS data sources. From a process standpoint, these maps were developed using the following methodologies:

Map 1 - Undeveloped Parcels Zoned for Residential Development

1. Map 1 was created by using current tax parcel data (circa Aug., 2020). A subset of “vacant” parcels was created by selecting all parcels which had no “improvement value” on the property.
2. Current zoning districts for the City were overlain on this subset of vacant parcels and additional parcels were removed as necessary (i.e. stormwater ponds, larger areas of institutional lands which have no development potential, etc.).
3. The final map was illustrates vacant parcels that contain “residential” zoning and those that are “non-residential” (i.e. commercial, industrial, institutional, etc.) in nature.
4. Table 3 was created which provides the listing of parcels along with additional property characteristics.

Map 2 - Undeveloped Parcels with Available Public Facilities/Services

Map 2 was created using the aforementioned data layers, plus the inclusion of municipal water and sewer line location data.

1. Municipal sewer and water line data was obtained, typically with service lines being located in the road rights-of-way.
2. A 100-foot ‘buffer’ was applied to either side of these service lines.
3. Any of the vacant residential/non-residential zoned parcels which fell partly within this 100-foot buffer were selected to produce a map showing which undeveloped parcels have services available.

Part 2E: An analysis of the municipality's residential development regulations, such as land use controls, site improvement requirements, fees and land dedication requirements, and permit procedures. The analysis shall calculate the financial impact that each regulation has on the cost of each new subdivision. The analysis shall identify ways in which the municipality can modify its construction and development regulations, lot sizes, approval processes, and related fees to: 1) Meet existing and forecasted housing demand, and; 2) Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent.

Plans & Regulations

The City of Menasha has a number of plans, policies, regulations and fee/permit requirements which guide land use and matters pertaining to residential housing development.

The City of Menasha's comprehensive plan, adopted in 2008 includes a future land use map, dated May, 2008. The future land use map illustrates the preferred land use and sets forth the broad policy decisions regarding the location and types of housing that are envisioned in the future. This document is of primary importance in that it sets the tone for addressing affordable housing opportunities and guiding development decisions (Map 3). This plan addresses many aspects of housing, including affordable housing and key aspects of the plan are shown in Table 5 below which were derived from a survey sent by East Central WI RPC to the City.

Table 5: City of Menasha Comprehensive Plan Summary

Question / Topic Regarding Comprehensive Plan	Response / Details
What year was your comprehensive plan adopted?	2008
Since its adoption, have amendments been made to the plan to accommodate residential development?	Yes
What year is next scheduled/planned 10-year update for the Comprehensive Plan?	2020
Were specific concerns about affordable housing brought up by your plan commission, business community or residents during the plan development process for your current comprehensive plan?	Yes
If yes, was affordable housing a community issue at that time, or was it alluded to as a future issue?	Yes
Were there any housing-related organizations or individuals involved in the development of the current comprehensive plan (or its housing element)?	Yes
Is there a dedicated municipal Committee responsible for implementing and monitoring all/portions of the housing element of the current comprehensive plan?	Yes
Does the housing element of the current comprehensive plan get referenced/reviewed formally during new housing development proposals (re-zonings, platting, etc.)?	Yes
Is there dedicated municipal staff which lead, or assist, in the implementation and monitoring of the current comprehensive plan's housing element?	Yes

Question / Topic Regarding Comprehensive Plan	Response / Details
Are there existing non-profit organizations involved in the implementation of the current comprehensive plan's housing element?	<i>Yes-Habitat for Humanity</i>
Were existing zoning ordinances, subdivision regulations or other codes/ordinances significantly modified after the plan's adoption to better align with the housing element?	<i>We conducted a downtown vision and Water Street Corridor plan to further refine the housing need in the downtown. From there a number parcels were rezoned to fit denser housing developments. Properties along our river front have been rezoned to C-2 to allow for dense multi-family housing. The city has passed a program called Strong Neighborhoods Menasha that will offer grants to residents that are in affordable housing to expand, update, and maintain their home. A number of housing plats were approved that allowed for more units per acre (Lake Park Villas).</i>
Please list specific goal/objective/strategy/recommendation/action items within the housing element that have been implemented or addressed to any degree (including planned/pending implementation).	<i>We have maintained a close working relationship with Habitat for Humanity. This has allowed us to get numerous rock the block events, including the largest rock the block the Fox Valley has ever had in 2019. Meeting goal 2.11 #23</i>
	<i>The City developed a first time home buyer program that was launched in 2020. Meeting goal 2.11 #26 (Program was removed in 2021*)</i>
	<i>We have started building 11 foot lanes in neighborhoods instead of our typical 15 foot lane. Helping us to meet goal 2.11 #29. In addition the City offers a deferred assessment program.</i>
	<i>We have actively been pursuing senior housing developments of the highest quality that meet all needs of disabled and senior individuals. Moving us toward completion of goal 2.11 #39</i>
	<i>We are activity encouraging mixed used development in our downtown. Moving us closer to meeting Goal 10: 1</i>
Are you a CDBG-Entitlement Community that has prepared an Impediments to Fair Housing study?	<i>No</i>
Have you completed other housing market or assessment studies?	<i>No</i>
What limiting factors are present which prevent your community from moving forward on further implementation of the current comprehensive plan's housing element? Please describe.	<i>Funding is an issue and incorporation of towns has cut off our ability to plan for future housing developments and made navigating new areas of the city exceedingly difficult.</i>

Additional plans, policies and regulations have been adopted by the City to address residential housing including:

- City of Menasha Zoning Code (Title 13) outlines basic land use requirements, lot sizes and property setbacks.
- City of Menasha Subdivision Regulations (Title 14) specifies site improvement requirements and land dedication requirements, if any.
- Plan Review & Building Permit procedures have been adopted by the City of Menasha and are reviewed periodically.
- The use of PUD zoning and zero lot line R-2A zoning have helped to decrease lot sizes and create more available housing lots. The City is land locked and the only way to increase our housing stock is to increase density.
- Fees have been adopted for various activities related to housing development. These fees are outlined in detail in the accompanying *Housing Fee Report*. The City of Menasha currently has several types of fees schedules published on its website which may apply to new housing development:
 - Zoning Fee Schedule
 - Residential Fee Schedule
- Tax Increment Finance Districts:
 - TIF District #7 located in the downtown area was created to support the development of Marina Place condominium/apartment project;
 - TIF#8 Broad Street area was created to support a condominium project in the 500 block of Broad Street; and
 - TIF#12 was created to stimulate development in the Lake Park Villas area at Lake Park Road. TIF 12 was amended in 2020 to allow for additional growth and development.
 - TIF #10 was amended to allow excess increment to support housing within a half mile radius of TIF 10. Allowing the city to promote affordable high quality housing developments and offering substantial financial incentives to both developers and home owners.
 - TID #13 was created to support the blighted areas and will also include the Brin redevelopment of mixed-use commercial and apartments when TID #10 closes.
 - The city is open to using TIF for mixed unit developments that encourage diversifying the city's housing stock. Future TIF districts are always a possibility.

Financial Impact of Plans & Regulations

The financial impacts of local regulations are outlined in the City of Menasha Housing Fee Report. Regulations enforced by federal and state government also contributed to the increase in costs for development, yet municipalities have no control over these regulations or the associated costs to enforce. Wisconsin has adopted a state-wide uniform building code, which establishes standards for residential dwelling units. In addition, the requirements of NR216 have substantially increased the cost of stormwater management. Under NR216, municipalities are required to reduce stormwater runoff by implementing stormwater management programs. These programs include construction site pollutant control, post-construction stormwater management, etc. Furthermore, restrictive covenants imposed by developers may also add cost to development by setting architectural guidelines, types of exterior building materials, structural design or dictating the size of a dwelling unit.

Modification of Construction & Development Regulations

This analysis identifies ways in which the municipality can modify its construction and development regulations, lot sizes, approval processes, and related fees in order to do each of the following: (1) Meet existing and forecasted housing demand, and; (2) Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent.

Housing demand for the City of Menasha has been calculated using accepted methodologies developed by the East Central Wisconsin Regional Planning Commission. In this case, two components were evaluated: a) forecasted housing and land use demands by unit type, and; b) existing housing cost burden.

Based on Wisconsin Department of Administration and U.S. Census data, Tables 6 and 7 illustrate the forecast household growth for the City and the corresponding demands by housing unit type using existing land use density information.

Table 6: City of Menasha Year 2040 Household Projections

Municipality	2010	2015	2020	2025	2030	2035	2040	Diff. 2010-2040

Table 8 illustrates the current “Housing Cost Burden” for City of Menasha households. For any particular household income category, the corresponding number which spent 30% or more of their income on housing costs is shown. In general, those with lower incomes are more burdened. However it is interesting to note that the City of Menasha’s numbers do not vary much from the urbanized area average as a whole.

Table 8: City of Menasha and Regional Housing Burden (2013-2017)

Household Income & percent spent on housing costs	Urbanized Area Regional Total (Fox Cities, Oshkosh & Fond du Lac)		C. Menasha	
	Totals	% of Total (30% or more)	Estimate	% of Total (30% or more)

Based on this information more affordable homes and rentals are needed within the City, particularly for those with lower incomes. However, providing affordable housing involves more than reducing costs imposed by municipalities or revising local policies. Policies imposed by others and limited funding also affect housing affordability. The U.S. Department of Housing and Urban Development provides housing choice vouchers for very low-income families to reduce the cost of housing. Yet, this program has not been expanded in years and does not supply a sufficient supply of vouchers to address housing affordability for renters. Other programs correspondingly provide assistance for low-income renters and homeowners but these programs likewise fall short of the needs. Banks and other financial institutions must also accept some of the responsibility since they must approve financing for affordable housing.

It is important to note that the City of Menasha has a number of housing initiatives that will be available in the year 2020. These initiatives are targeted at expanding the existing housing stock and maintaining and improving the existing housing stock. Both homeowners, renters, and developers qualify for many of the housing initiatives coming in 2020. In the next five years the city plans to substantially expand and diversify the City's housing stock. Numerous plans have been completed in 2019 that encourage the use of townhome style units and apartment complexes within the City's core.

Reductions & Time and Cost

In order to reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent, a number of things need to be taken into consideration.

- 1) Where exactly this burden should be placed? Should this burden be placed on the public sector entirely? Or should the private sector (homebuilders, realty professionals, etc.) share some of this burden? Housing style, design, size and materials choice make up a large portion of the cost of housing. When the development community places restrictive covenants on subdivisions, this inherently increases the costs for housing.
- 2) The cost of infrastructure and maintenance was not part of the State's requirement to analyze and include in this report yet is a critical factor for the costs associated with new housing development. Over the past decade inflation and the cost to construct has significantly increased and exceeded inflation rates. Solving this issue could cut costs for new construction by as much as 60%. Unfortunately municipalities have very little influence over the cost of materials to build. Furthermore, state imposed levy limits further impact the municipalities' ability to maintain or construct new infrastructure.
- 3) Lastly, as noted in the Housing Fee Report, a number of additional costs are imposed by County, State or local entities (sanitary districts) for things such as plumbing plan

reviews, utility assessments and the like. These items are not even considered in the statutory requirements for this report and not in the purview of the municipality to control.

- 4) The City of Menasha is landed locked and does not have the ability to acquire large swaths of open farm land for new subdivisions, like many other municipalities can. Increasing the city's housing stock takes a more creative approach and requires substantial city investment to prepare, clean, and market redevelopment sites.

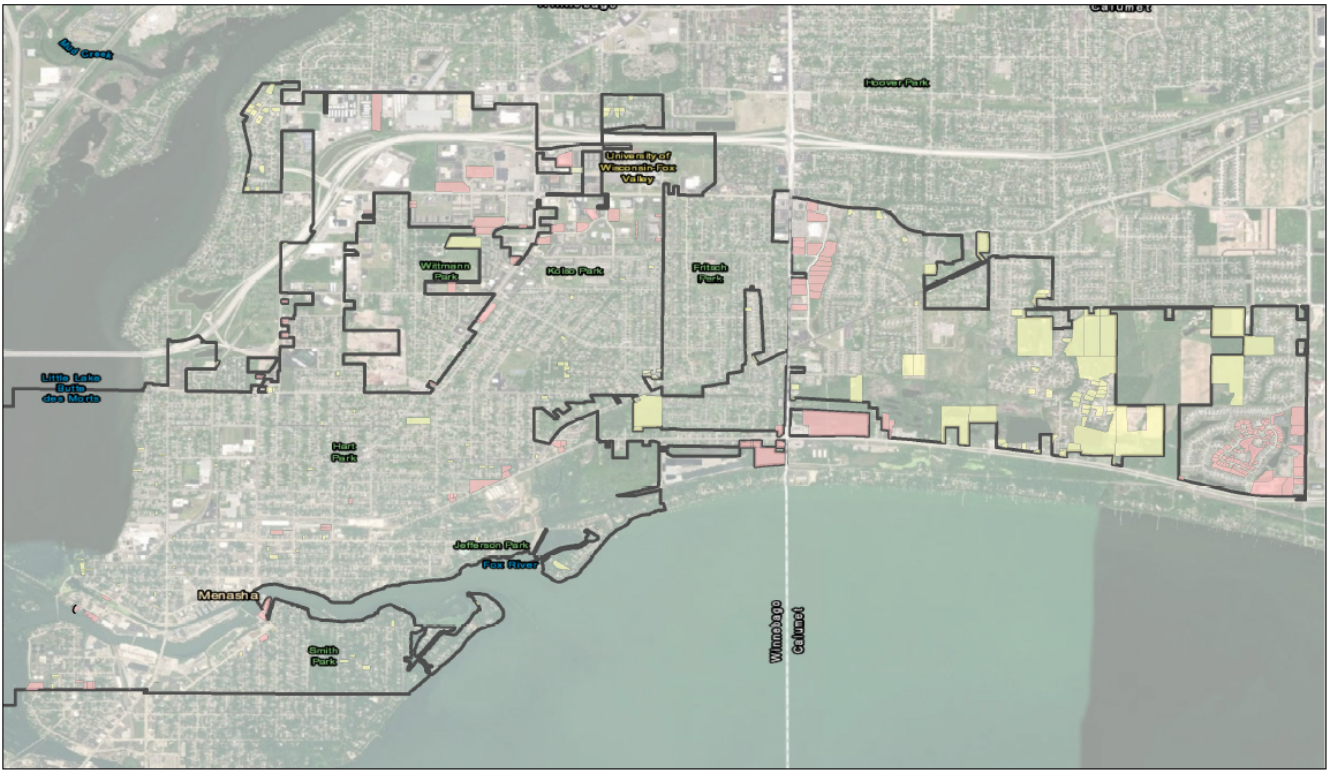

The City of Menasha could, of course, simply slash the costs of its various permits and fees by 20%, thereby reducing the amount of revenue generated (see Housing Fee Report). This revenue is used by the City to fund the necessary services and safety inspections that are required by State law and/or are simply good practice. By cutting fees 20%, it is likely that the plan review, approval and permit issuance processes will take longer due to reduced staffing and capacity.

The City could also reduce minimum lot sizes, but would this actually encourage smaller more affordable houses? Reducing parking requirements and street width could potentially reduce the cost to build and maintain infrastructure, making housing more affordable. The added benefit is that this would not only reduce infrastructure costs but would also reduce stormwater runoff from impervious surfaces. While the City could make a number of changes, ultimately it is whether or not the development community takes advantage of changes in order to create more affordable homes. Taking this a step further, new models of housing development such as Cottage-Style developments or Accessory Dwelling Units (ADUs), or new public-private financing partnerships could be looked at as a way to further reduce housing costs. Partnerships with non-profit organizations such as Habitat for Humanity have also proven successful.

Reductions in time could reduce costs; however, developers and the state also play a role in the process (cost) to approve a new residential subdivision. For example an incomplete application will necessitate additional time by the developer to submit further information. Plats must be approved following state statute 236, which clearly sets out procedures which must be followed by an entity approving a plat. If the proposed development is outside of a municipality, it must first be annexed into the community. Again the process to annex properties is also laid out in the state statutes (66.0217, 66.0219, 66.0221 and 66.0223), and municipalities must follow these procedures. Municipalities may be able to incorporate additional efficiencies in the subdivision review process which may impact the time necessary to approve a plat.
