

City of Menasha COVID-19 Data Summary

Date: July 14, 2022

Summary/What's New

- On June 21, the WI DHS announced that children age 6 months and older are eligible to receive the COVID-19 vaccine. The Moderna vaccine is authorized for children 6 months through 5 years old and requires 2 doses, 28 days apart. The Pfizer vaccine is authorized for children ages 6 months to 4 years old and requires 3 total doses: the first 2 doses are given 3 weeks apart, followed by a third at least 2 months later. **The Pfizer vaccine for children 6 months to 4 years old is now available at the Menasha Health Department's weekly COVID-19 vaccine clinics.**
- The Menasha Health Department and Wisconsin DHS are following the CDC's updated [masking guidance](#) which correlates to COVID-19 Community Levels. Your county's [COVID-19 Community Level](#) helps determine which prevention measures are needed to protect yourself and your family.
- **Vaccination is the best tool to prevent serious disease, hospitalization, and death due to COVID-19.**
 - Wisconsin residents ages 6 months and older are eligible to receive the COVID-19 vaccine. COVID-19 vaccines are safe, effective, and free. You do not need an ID or insurance.
 - Adults age 50 years or older and people 12 years and older who are immunocompromised are encouraged to receive a second booster dose 4 months after their first booster dose.
 - Visit the Menasha Health Department's [COVID-19 vaccine webpage](#) for clinic information.
 - If you have questions about the COVID-19 vaccine, call: 211 or 877-947-2211. Language assistance is available. Visit [vaccines.gov](#) to find a place to get your FREE COVID-19 vaccine.
- COVID-19 testing is available in the community if you are in need of a test. Visit our [testing sites webpage](#) for more information. You may also order two sets of four free at-home test kits from the federal government [here](#).
- To help prevent the spread of the virus, follow [current isolation and quarantine guidance](#) if you test positive for COVID-19, have symptoms, or have been exposed.
- As of July 13, 62.2% of City of Menasha residents have received at least one dose of the vaccine and 59.6% are fully vaccinated. To read more about vaccine data, see [this dashboard](#).
- Currently in the City of Menasha the burden of confirmed and probable COVID-19 cases is high. The combined case rate for this 2-week period (June 29 – July 12) is 336.8 cases per 100,000 population, which is an increase from the case rate of 231.9 from the previous 2-week period (June 22 – July 5).

Background

This data summary provides preliminary data on the cases of COVID-19 in the City of Menasha from June 29, 2022 – July 12, 2022. Data included in this report is for lab-confirmed cases of COVID-19 and probable cases of COVID-19. A person is counted as a probable case of COVID-19 if they have a positive antigen test OR has symptoms of COVID-19 AND has a known exposure to COVID-19. Case counts utilized for all graphs and tables are based on the date public health staff received and recorded the test results. Numbers here may not represent final case counts for this reporting period.

Number and percentage of laboratory confirmed and probable cases of COVID-19 by age range, cumulative and past two weeks

Age Group	Cumulative Total Cases		Total Cases in the Past Two Weeks	
	Number of Cases	Percentage of Total Cases	Number of Cases	Percent of Cases in Past Two Weeks
0-9	456	8.3%	8	13.1%
10-19	753	13.7%	3	4.9%
20-29	884	16.0%	12	19.7%
30-39	1008	18.3%	9	14.8%
40-49	834	15.1%	7	11.5%
50-59	751	13.6%	10	16.4%
60-69	469	8.5%	4	6.6%
70-79	228	4.1%	6	9.8%
80+	130	2.4%	2	3.3%
Combined Total	5,513	100%	61	100%

Daily new cases (lab-confirmed and probable) in the City of Menasha and the 7-day average of total new cases

COVID-19 Metrics

	Metric	Current Status	Change from last reporting period
Case Incidence	Total confirmed and probable cases per 100,000 in the past 7 days	248.4 cases per 100,000 / 7 days	↑
Fox Valley HERC Hospital Capacity*	Percentage of hospital inpatient beds in the community that are occupied.	90.4% of inpatient beds occupied	↑
	Percentage of intensive care unit beds in the community that are occupied.	88.0% ICU beds occupied	↑
	Percentage of hospital inpatient beds in the community that are occupied by patients with COVID-19.	2.8% beds occupied by patients with COVID-19	↓

*Hospital capacity data is collected and reported at the Healthcare Emergency Readiness Coalition (HERC) level. The City of Menasha is part of HERC 6 (Fox Valley HERC). Hospital capability information can be found here: <https://www.dhs.wisconsin.gov/covid-19/hosp-data.htm#capabilities>

Case count, case rate per 100,000 people, and burden class in the City of Menasha for the past two weeks (June 29 – July 12)

	Case Count for Past 2 Weeks	Case Rate (per 100,000 people)	Burden Class*	Population
City of Menasha	61	336.8	High	18,114

*Burden Class is based on the case rate per 100,000 people in the past two weeks. See the table below for more information.

City of Menasha COVID-19 laboratory confirmed and probable case rate trend and burden by 2-week periods*

*Refer to the table below for more information on burden categories and thresholds.

Burden (lab-confirmed & probable case rate)

Burden Status	Case Rate per 100,000 residents in the past two weeks	City of Menasha number of cases in the past two weeks
Low	Case rate is less than or equal to 10.	Less than 2 cases.
Moderate	Case rate is greater than 10, but less than or equal to 50.	Greater than 1 cases, but less than or equal to 9 cases.
Moderately High	Case rate is greater than 50, but less than or equal to 100.	Greater than 9 cases, but less than or equal to 18 cases.
High	Case rate is greater than 100, but less than or equal to 350.	Greater than 18 cases, but less than or equal to 63 cases.
Very High	Case rate is greater than 350, but less than or equal to 1,000.	Greater than 63 cases, but less than or equal to 181 cases.
Critically High	Case rate is greater than 1,000.	Greater than 181 cases.
