NEW from the CDC!

Reopening Guidance for Cleaning and Disinfection Public Spaces, Workplaces, Businesses, Schools, and Homes

- This guidance is intended for everyone, whether you own a business, run a school or want to ensure the cleanliness and safety of your home. Reopening America requires all of us to move forward together. Check it out [here](#).
- [Cleaning & Disinfecting Decision Tool](#)

Cleaning Reminder: If you are using a bleach solution (see [link](#) for solution recipe), bleach solutions will be effective for disinfection up to 24 hours. Make sure to use new bleach solution after 24 hours.

New Data!

The Wisconsin Department of Health Services released new data on its website about COVID-19 facility-wide public health investigations and outbreaks in areas across the state. The State plans to update this data every Wednesday. You can check out the new data on this page: <https://www.dhs.wisconsin.gov/covid-19/investigations.htm>

A single case in the following setting initiates a facility-wide public health investigation:

- Long-term care facilities include skilled nursing facilities (nursing homes) and assisted living facilities (community-based residential facilities and residential care apartment complexes).

Two or more cases in the following settings initiate a facility-wide public health investigation:

- Group housing facilities include correctional facilities, homeless shelters, dormitories, and group homes.
- Health care facilities include hospitals, clinics, dialysis centers, hospice, and in-home care.
- Workplace (non-health care) settings include manufacturing and production facilities, distribution facilities, offices, and other indoor workplaces.
- Other settings include adult or child day care centers, restaurants, event spaces, and religious settings.

A case investigation and contact tracing is conducted with all people reported with COVID-19, regardless of setting.

Wisconsin long-term care facility total: As of April 29, 2020, among the 93 public health investigations in long-term care facilities, 20 facilities have single confirmed cases and 25 facilities have less than 5 confirmed cases. The median number of confirmed cases per investigation for long-term care facilities is 3, the average is 6, and the range is 1 to 54 confirmed cases.

COVID-19 FAQ

What is the current list of symptoms of COVID-19?

- People with confirmed infections have a range of symptoms, from little to no symptoms to people being severely sick and dying. Symptoms may include: fever, cough, shortness of breath, sore throat, headache, fatigue, body or muscle aches, nausea, vomiting, diarrhea, loss of smell, loss of taste.
- Not everyone with COVID-19 has all of these symptoms. For many, symptoms are mild, with no fever. It is important to know that you can still spread (transmit) the virus to others even if you have mild or no symptoms.
- The CDC believes that symptoms of COVID-19 appear in as few as two days or as long as 14 days after contact with someone who has COVID-19. This information is kept up-to-date on the [DHS COVID-19 Symptoms of Illness page](#).

Resilient Wisconsin Tip #10

Talk it out. Try talking about your experiences and feelings with loved ones, a trusted advisor, or a support group or mental health professional. It can help.
