What's New?

WI Neg Results: 551,607

WI Case Count: 29,199

Menasha: 74

Winnebago County: 683

Outagamie County: 491

Calumet County: 111

- The WIAA released guidance and recommendations for members grades 6-12 to resume summertime athletics programming beginning July 1, 2020. It will be the decision of each school's administrator and local health department to determine if and how athletics may operate. View the guidance here.

- The Department of Public Instruction (DPI) has released "Education Forward" and accompanying guidance documents to aid in school districts' decision making for the 20-21 school year.

City of Menasha Closure Updates: PWF, Menasha Utilities, Library and Senior Center remain closed to public. The Library is offering curbside service for picking up ordered materials and for material drop off. City Hall is open to the public.

Happy 4th of July

Please remember to enjoy the holiday weekend safely. Celebrating only with people you live with is the safest option. If you choose to celebrate outside of your home, remember to: avoid groups of greater than 10 people, always maintain 6ft of physical distancing, wear a face covering when out in public, cover your coughs and sneezes, and wash your hands!

What about potlucks?

Even if the potluck is outside, this is a high-risk activity because sharing commonly touched surfaces with other people makes it easier to spread the virus. Suggest everyone brings their own dishes for themselves or order a separate dish for each person from a local restaurant.
DHS has launched a new data dashboard

The data dashboard consists of maps and tables that toggle between counties and Healthcare Emergency Readiness Coalition (HERC) regions. The counties and regions are color-coded to indicate overall COVID-19 activity status: low, medium, or high.

Overall activity status is a summary indicator based on two data points: the burden of cases and the trajectory of cases.

- Burden, also defined as case rate, is the total number of cases a county or region has per 100,000 Wisconsin residents in the past two weeks, and is described as low, moderate, moderately high, or high.

- Trajectory, also defined as case change, refers to the percent change of cases in the past two weeks, and is described as shrinking, growing, or having no significant change.

View the dashboard here.

DATA → KNOWLEDGE → ACTION

COVID-19 FAQ

Can I end my 14 day quarantine early if I have a negative COVID-19 test?

- No. It may take up to 14 days for the illness to surface. Also, if a test is taken immediately after exposure, it will most often show up negative.

Resilient Wisconsin

Children may respond to stress in different ways such as being more clingy, anxious, withdrawing, angry or agitated, bedwetting etc.

Click here for tips from the World Health Organization to help children cope during this time.
