GRAYLING, MICHIGAN, JULY 26, 1923

NUMBER 29

GUARD RESERVE CAMP FEATURE

TWO WEEKS' TRAINING AT GRAYLING TO BE GIVEN OFFICERS AND MEN.

From Detroit Free Press.—One of the big features in this year's Michigan National Guard training camp at Grayling will be the reserve. Under authority recently granted, the National Guard of the United States can recruit a reserve of officers and men who will not have any duties to perform except during the two weeks training camp. These officers and men will not have to turn out to the weekly drills or perform any other military duty during the year except the duty at camp unless there is a national emergency.

The National Guard reserve is an important part of the army, as it will give the commanding officers of the various units in the guard an opportunity to recruit their units to full war strength in time of peace, and have the units ready to be placed on a war-time basis on a moment's notice in case of a national emergency.

Club House for Men.

While the Michigan National Guard will not have as many reserve officers and men in camp this year, because recruiting for the reserve was started only a few weeks ago, it is expected that about 100 officers and men of the reserve will take advantage of this year's camp at Grayling. By next year, however, it is believed that every unit in the Michigan National Guard will be recruited to war-time strength with active officers and men and reserve officers and men.

Colonel John H. Shouten, commanding the 126th infantry, Thirty-second division, with headquarters at Grand Rapids, is going to furnish with a club house for their use during their stay at the two weeks' training camp at Grayling this summer.

mer. Major George L. Olsen, of the regiment, has been at Grayling and has selected one of the mess halls formerly used by one of the units of the regiment, and it is being furnished up as a club house for the men. There will be vaudeville, boxing matches, band concerts, moving pictures and other forms of amusements for the men every evening in the club house. Prizes have been collected for the various field day events which will be held the last day in camp this year.

Colonel Shouten has also sent out a memorandum to every commanding officer in his regiment instructing them to inform all the officers and men in their units that visitors will be welcomed in camp this year. Colonel Shouten is anxious to have the parents and other relatives of the officers and men in his regiment visit camp this year.

Camp Arrangements Complete.

The 125th infantry, Thirty-second division, many units of which are from Detroit, commanded by Colonel Milton L. Hinkley, have completed all arrangements for camp.

Lieutenant Cecil L. Fairchild, reserve corps, has been commissioned in the National Guard of Michigan and assigned to the Headquarters company, Sixty-third brigade, commanded by Captain James M. Southwick. Lieutenant Fairchild will accompany this unit to camp and take part in the annual field training.

Some records are being made at the Detroit Armory in obtaining recruits. Private Hardy, of Company C, 125th infantry, brought in 12 recruits to the company. Captain Newton, commanding Thirty-second division, Headquarters company, has organized his outfit as recruits and obtained 13 recruits last Friday.

The advance details to Grayling have been made and the following officers and men leave on the first of August for camp: Captain Thomas A. Newton with 25 men. Captain Bradley, Lieutenant Brand and Lieutenant Engwall with service company less the band. There will be two officers from the staff of the Sixty-third brigade who have not yet been designated. Lieutenant Rine from the Special Troops, Thirty-second division, and Major Hanna, from the 107th medical regiment, will go with the advance details.

SHARON MERCHANT SLAIN BY EMPLOYEE

QUARREL OVER SIMPLE MATTER LED TO FATAL SHOOTING.

Ernest F. Tidd, merchant and fishing resort owner, was shot and killed by Bruce Williams, an employee, at the former's home in Sharon, Tuesday evening, at about 9 o'clock. After the shooting Williams escaped into the country and is heavily armed and it is evident that he does not intend to be taken alive. Hundreds of men, under Sheriff Beaver of Kalkaska, are searching for him.

The shooting occurred in the yard between the general store and home of the victim, and is the result of a quarrel between the two men, when Tidd reprimanded Williams for having left the farm gate open allowing the pigs to escape out into the woods. Williams, who had been in the employ of Tidd for over two years, became angry and went into the house where he got a shotgun and came out and fired three shots at Tidd, striking him near the heart, in the abdomen and in the right side. Any one of the shots would have been fatal.

Tidd died instantly. Before Williams could be apprehended he went into the house and secured an automatic rifle and quantity of ammunition and escaped into the country.

Williams was seen at Riverview station Wednesday night, and close upon his heels was Sheriff Beaver and a large posse of searchers, the former, however, escaped before they arrived. Officers believe they will be able to apprehend the fugitive before night.

ond division, and Major Hanna, from the 107th medical regiment, will go with the advance details.

Clery to Make Inspection.

Lieutenant Colonel David E. Clery, inspector general, Eighty-second division, with one warrant officer, will leave for camp in advance of the troops for the purpose of making an inspection of arrival and training. The efficiency of troops is determined by the manner in which they detain and make camp as well as the work done after arrival.

First Sergeant Mueller, Company A, 126th infantry, leaves the company to go to Vienna, Austria, where he has won a scholarship in the Imperial College of Medicine. It is with regret that the company sees Sergeant Mueller go, but he has the best wishes for his success in his new field.

Captain William J. Niederpruem, U. S. army, will visit Detroit during the week and will be the guest of Major and Mrs. Max R. Baetcke. Captain Niederpruem was formerly the intelligence officer of the Thirty-second division and has also served with the 125th infantry.

CONG'N WOODRUFF COMING AUG. 2

ALSO SENATOR KARCHER AND OTHERS TO TALK GOOD ROADS.

Meet With Board of Trade at Noon and Speak at Court Yard in Evening.

—A telephone message from Senator Karcher of Rose City stated that he and Congressman Woodruff would like to have the chance to meet Grayling citizens on Thursday, August 2, to talk over matters pertaining to our general welfare.

Therefore it is arranged that these gentlemen meet with the Board of Trade at their regular Thursday noon luncheon at Shoppemagon Inn, and in the evening a meeting will be held in the Court yard where the visitors will discuss public issues.

All who so desire will be welcome to come to these meetings, and it is specially urged that there be a large attendance at the speaking in the Court yard. Congressman Woodruff hasn't visited Grayling for about three years and he says he is glad to have an opportunity to visit our people again. It is possible that Representative Nelson G. Farrier of Hillman will also be present.

MISSING SAGINAW MAN FOUND

WAS LOST IN WOODS NEAR BIG CREEK.

J. J. Tompkins Wanders Away From Whip-Poor-Will Club.

James J. Tompkins, Cadillac auto dealer of Saginaw who became lost in a swamp near Big Creek, Sunday forenoon, was found Tuesday afternoon. He had wandered away from Whip-Poor-Will club house, where he was a guest of Guy F. Garber, Buick dealer, also of Saginaw. This episode caused considerable excitement, not only in this vicinity but the whole of Michigan was stirred up over the affair.

There were about fourteen guests at Whip-Poor-Will for several days and the party was preparing to leave for home Sunday forenoon. Tompkins had loaded his baggage into his auto preparatory to leave and while waiting for the others started down to the river and along the edge of the swamp. The club house is located on Big Creek near the North Branch, of the AuSable river, about 20 miles east of Grayling. When the party was ready to leave Tompkins was missed. Search was made for him through the club house and surrounding premises but he was not found. Thinking he may have walked to one of the neighboring clubs, investigation was made but he was not to be located at any camp of them.

His friends began to be alarmed and searching parties were formed. Tracks were found in the nearby swamp that answered the description of the shoes worn by Tompkins. These were followed and it was found where he got out of the swamp and went into the pine plains regions. Here his tracks were lost entirely. By that time it was getting evening and watch parties were stationed about the woods to look for a signal fire but it did not develop. By the next morning people were getting pretty excited and a call for aid was sent out and joined in the search. The State Game department at Lansing ordered its game and fire wardens to extend every assistance; also a pair of blood hounds, were secured from Mason, hoping they would be able to track the man however the long ride by auto did not agree with them and they were too sick when they arrived here to be of any service.

By Tuesday the woods were full of searchers. It is reported that 34 men and friends of Tompkins who aided in the search. It was not until about four o'clock Tuesday afternoon that he was found.

It appears that Tompkins must have been mentally unbalanced, due possibly from the excitement of being lost, for he met several persons but did not inform them that he had lost his way and ask for help. He stopped at one farm and visited with the owner, asking how many acres he had and how the crops were growing, etc., but gave no indication of being lost. Had he done so he could easily have been directed back to the club house.

Monday afternoon it rained and he became soaked with wet and broke into a cabin where he took off his clothes and hung them up to dry and went to bed. The next morning he was too feeble to get up, and it was here that he was found by searching parties. He was taken to the Garber cottage where he completely broke down and cried like a baby, telling his story best he could in an incoherent manner. Dr. Pool of Grayling was called and reports that the patient is little the worse off for his exposure and his feet were badly swollen and there was a large blister on one heel.

Mr. Tompkins is about 45 years of age and is of a happy disposition and has hosts of friends as is attested by the way they hurried to his relief when they thought he was in trouble. He feels very badly over the affair and because of the trouble he caused his friends.

of weeks of his vacation in Wisconsin and Minnesota, and attended some clinic work in the Mayo brothers institution, at Rochester, Minn.

Mr. and Mrs. Edward Hagle and daughter Miss June of Vassar have been visiting at the latter's parents, Mr. and Mrs. R. D. Bailey, Miss Janice Bailey who had been visiting them at Vassar returned to Grayling with them. The party left Wednesday for Mullet Lake to spend a couple of weeks resorting.

COUNCIL PROCEEDINGS.

Held on the 9th day of July, 1923.
Present: C. A. Canfield, J. H. Wingard, C. O. McCullough, Dan Hoelsli, M. A. Atkinson, Frank Sales.

Absent: Eva E. Reagan.

Moved by Sales, supported by Atkinson that the president appoint a special committee of three to investigate and obtain any available information relative to the City Water Supply costs, and methods employed in the distribution of same, from such plants as are in practical operation or from any other source from which such information may be obtained, which shall be submitted by this committee to the council for further consideration.

Yes and Nay vote called. All members voting yeas. Motion carried.

Moved by McCullough, supported by Wingard that the Claims and Accounts on file be allowed as charged and the clerk be and is herewith authorized to draw orders on the Treasurer for the same in the amounts as herein stated.

Yes and Nay vote called, all members present voting yeas.

Motion carried.

Grayling Electric Co., May service and supplies	\$146.70

Miss Helen Westcott of Detroit is a guest of Mr. and Mrs. Marius Hanson at Lake Margrethe.

Mr. and Mrs. James Cassidy left Wednesday for Lapeer called by the death of the former's sister.

Miss Marion Paige of Traverse City is here visiting her father Mr. Morgan Paige for a few days.

Mrs. Peter Peterson is entertaining the Danish Ladies Aid society at Lake Margrethe this afternoon.

Some wonderful bargains in porch dresses at the Gift Shop. Come and see what you can buy for \$1.00.

Miss Margrethe Nelson returned Wednesday morning from a two weeks visit in Detroit and other places.

Mrs. Joseph Brosier of Afton is expected to come Sunday for a visit with her sister, Mrs. Thos. Trudo.

Mrs. Ruth Beck of Detroit arrived Tuesday to spend the summer with her parents, Mr. and Mrs. Victor Sorensen.

Mrs. Henrietta Phelps and son John left Thursday for Ortonville, called there by the illness of the former's father, John Coventry.

Peter McNeven, Alfred Hughes, Carl Peterson and Holger F. Peterson and their families enjoyed a motor trip to Petoskey Sunday.

Mrs. George Tobin and children Mabel and Jerry of Bay City visited her father John O. Goudrow and other relatives over last Sunday.

Miss Mollie Johnson returned the fore part of the week to Bay City after visiting her parents, Mr. and Mrs. C. B. Johnson since the fore part of July.

Mr. and Mrs. Charles Schreck, Mr. and Mrs. Charles Sullivan, Mr. and Mrs. A. W. McArthur and Mr. and Mrs. Neil Ford of Pontiac spent Wednesday at Gaylord.

Owen Cameron was in Grayling last Thursday coming from Kalkaska, and returned to that place the same day accompanied by Miss Beatrice Hoelsli who is visiting him this week.

Mrs. Esbern Hanson entertained with a tea Tuesday afternoon for the pleasure of Mrs. Holmes of Ypsilanti who is a guest in her home at Lake Margrethe.

Mr. and Mrs. Jonson Ziebell have returned from Niles, Mich. to make their home in Grayling. They are visiting the former's parents, Mr. and Mrs. Robert Ziebell.

To honor Miss Virginia Hanson of Los Angeles, Calif. who is visiting her father, T. W. Hanson, Mrs. Oscar Schumann entertained 12 girls and boys Wednesday afternoon.

Miss Bessie Brown accompanied my Henry Trudo left Saturday night for Saginaw, where the former is spending a couple of weeks visiting her sister Mrs. Bert Scholz. Mr. Trudo expects to return home today.

Mr. and Mrs. Charles Schreck are entertaining Mr. and Mrs. A. W. McArthur and children and Mr. and Mrs. Neil Ford of Pontiac. Mrs. McArthur is a daughter of Mr. and Mrs. Schreck and Mrs. Ford is a sister of Mr. Schreck.

Mr. and Mrs. Lloyd W. Masters of Detroit are guests of Mr. and Mrs. E. N. Darveau for a couple of weeks arriving Saturday. They were accompanied by the former's parents, Mr. and Mrs. W. C. Masters also of Detroit, who went on to Alpena Tuesday to visit relatives.

Grayling Board of Trade is endeavoring to hold their next annual meeting in Grayling. This will be in the latter part of August. This will be a fine compliment to our city and we are sure we can show the Editors a good time here.

Mr. and Mrs. Thomas Trudo, son Henry and daughter Beatrice, motor-ed to Cheboygan last Thursday. They were joined at Gaylord by Mrs. Harvey Trudo, who accompanied them.

Dr. Don M. Howell, formerly of Grayling but now of Detroit is spending the week here, visiting old friends and taking in some of the fishing. Before arriving here he spent a couple

of weeks of his vacation in Wisconsin and Minnesota, and attended some clinic work in the Mayo brothers institution, at Rochester, Minn.

Mr. and Mrs. Edward Hagle and daughter Miss June of Vassar have been visiting at the latter's parents, Mr. and Mrs. R. D. Bailey, Miss Janice Bailey who had been visiting them at Vassar returned to Grayling with them. The party left Wednesday for Mullet Lake to spend a couple of weeks resorting.

Arrangements have been made for placing this collection on exhibition at the G. A. R. hall before taking it to the fair, when the home people may witness the work of our home farmers. We are sure this is going to be a big fall feature in Grayling this year, and possibly be the forerunner of an annual exhibit.

NOW IS THE TIME TO BUY
FLOORING CLIPPINGS

During the next two weeks our mill will be working entirely on heavy lumber, which will produce the heavy clippings desired by so many. Anticipate your requirements and place your orders now for next winter's supply.

Daddy's Evening Fairy Tale by MARY GRAHAM BONNER

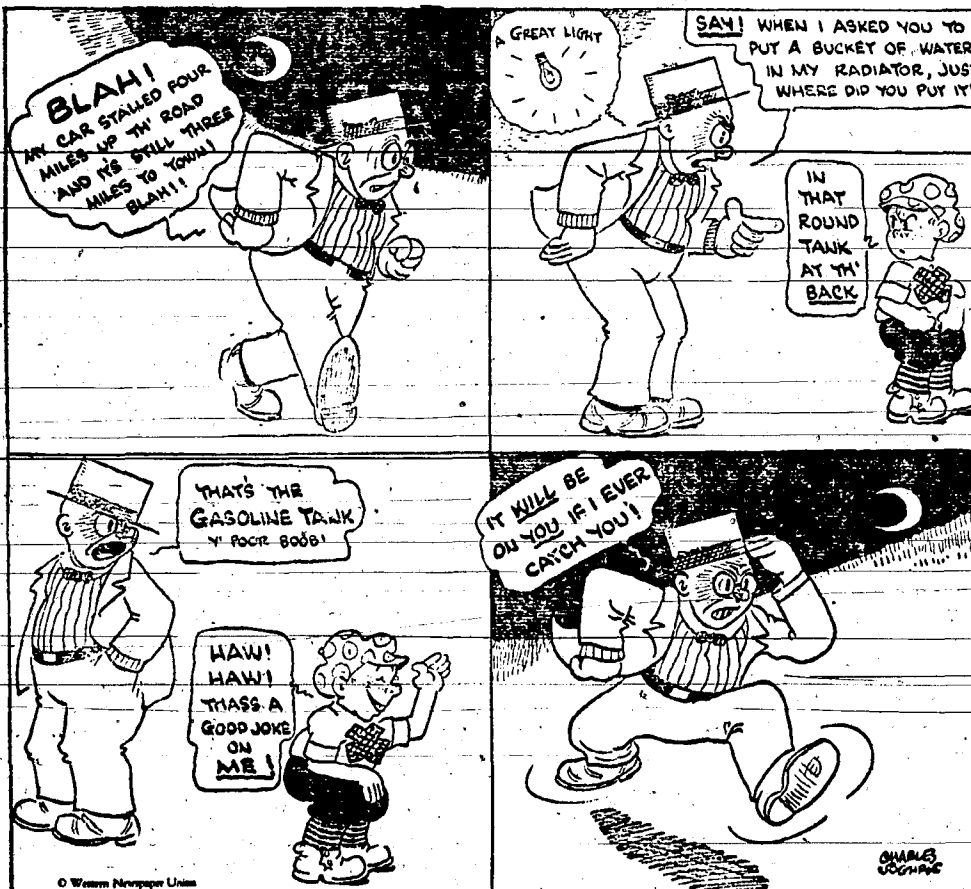

MIDDIE MOONBEAM

Billie Brownie had taken his ship and had gone up to have a talk with Middie Moonbeam. Middie Moonbeam loved to hear stories and she loved to tell stories and Billie Brownie liked to hear the news of Moonair as she liked to hear the news of Brownie-land. "Now I have told you lots of the Brownie-land news," said Billie Brownie, as he sat on the edge of Mr. Moon's crescent shape which turned up somewhat so that Billie felt safer than he would otherwise have felt.

The Kid Had a Comeback

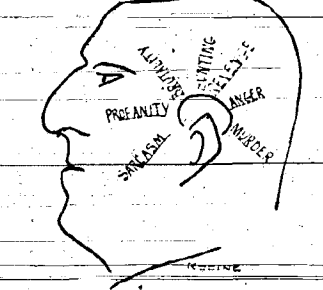

He Filled the Wrong Tank

WHY YOU ARE WHAT YOU ARE by EDNA PURDY WALSH

DANGER AREAS IN THE HUMAN HEAD

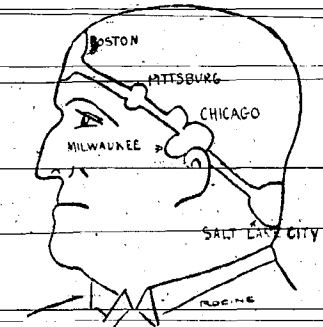

When there is a large development in the head at the top of the ear—the region of destructiveness—many characteristics automatically follow the growth of the brain in that area. If the upper forehead and front top head are not well developed, where the benevolence and honor, the man with large destructiveness is a danger to civilization. Murder, revenge, brutality and anger generate in destructiveness. When the higher faculties call out mental interests in an individual with such development, he is a great force for good, but when they are missing in his forehead, top head, a loveless

month, deceitful, half closed eyes, and a pointed ear at the top, he is the man who fills the jails and correctional camps. Many people have a greater talent for swearing and cursing. They take to it as does a duck to water from their earliest childhood days. The next time you hear an individual cursing for two minutes without a single repetition, look at his head at the tip of the ear. You will find it well developed, and the top head in the center, superior, will be pro- nounced. If destructiveness is well developed, but other faculties, such as construc-tiveness or good reasoning powers, combined with adaptability, are also present, the individual makes a pow-erful worker in the business world.

A PSYCHOLOGICAL RAILWAY

The late L. A. Vaughn, master char-acter analyst, built his pupils a psy- chological railway to impress upon their minds the location of faculties. The road starts out from animativ-ness in the back neck, for this is the region of polygamy, and he therefore named it Salt Lake City. In front of the ear is the faculty of attentiveness, the region of digestion and fondness for eating, and he named the station Milwaukee. Above, and in front of the ear at

top, the regions of destructiveness and acquisitiveness lie. Chicago, with its stock yards and money making, was given as a symbol. Above the outer eyebrow, approxi- mately two inches, is the region of constructiveness—invention, designing, manufacturing, are the work done by this faculty, and Pittsburgh is its ap- propriate station. Boston represents the intellectual re- gion where memory, comparison, cau- sality and observation lie in the fore- head. The intellect has no emotion, nevertheless it is the big driver, or un- derstanding, where all emotions must pass for cool judgment and application, and if it is weak, while the other fac- ulties are strong, the efforts of the in- dividual will not be directed or car- ried out with foresight, and are some- times more dangerous than useful.

CONTRAST THESE TWO HEADS

Fundamental character reading is founded on body construction and the leading elements in that body. The square-headed man has large bones. Bones are the strongest ele- ment of the body. They are made of calcium, and the square-headed man will be very fond of foods such as milk, cottage cheese, figs, etc., in which there is much calcium. Calcium gives

Her Own Words

"Coming to the end of his harangue, an English lawyer said, 'and what, gentlemen, did the poor woman say to the magistrate? I will read you her very words, and I think you will agree with me that they bear the stamp of conscious innocence.' He seized the depositions and turned them over. "Let me read you her exact words. 'Hah! Here we are. Oh! H'm! Well, gentlemen, this uneducated woman

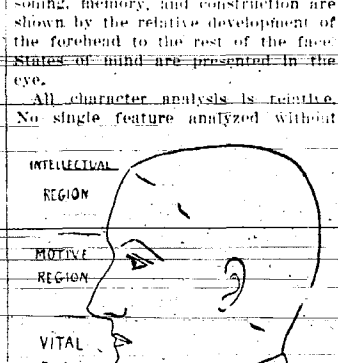

strength of mind and continuity of thought, and as a result the square-headed man invents, is able in science and heavy work. Engineering, physical science and mechanics interest him. He is never in a rush; and he does everything with mathematical ac- curacy. Contrast him with the round-headed man, large from ear to ear. He has a low top head where the reasoning faculties are located. He belongs to the vital temperament, where flesh pre- dominates over bones and muscles, and he will be found eating foods which contain carbon, hydrogen, nitrogen and oxygen. The vital man is the consumer—not the producer. Flesh-making foods he eats do not produce long con- tinued thought. He makes a good hotel keeper, butcher and dealer in food and drinks because his interest lies along those lines. Vital temperament people are good natured, mirthful, lovers of pleasure and entertainment. They are often good salesmen be- cause of their warm hands and cheer- ful dispositions.

HOW TO STUDY THE FACE

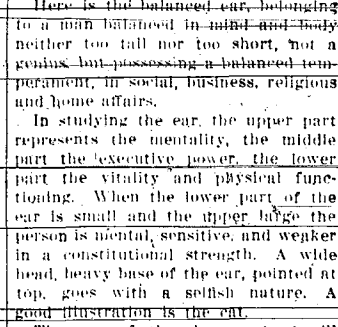

For practical character reading from the features the face may be divided into three sections. From the chin and jaw, mouth and upper lip the mus- cles are indicated, the affections, the appetites, the temper, etc., are in- dicated in the lower region of the face. The middle portion of the face indi- cates the executive region. A face long in the central region belongs to a powerful determination and strength in undertakings, while the short, cen- tral face is more feminine, emotional, and not as powerful as a leader in the business world. From the eyebrows to the top of the forehead is the intellectual re- gion. Observation, understanding, rea- soning, memory, and construction are shown by the relative development of the forehead to the rest of the face. States of mind are presented in the eyes.

YOUR EAR REVEALS YOU

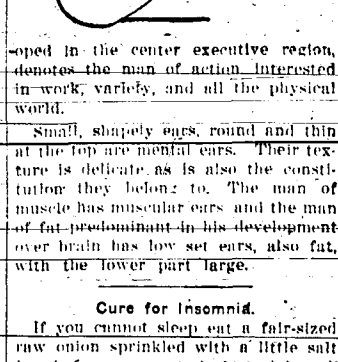

Here is the balanced ear, belonging to a man balanced in mind and body, neither too tall nor too short, not a genius, but possessing a balanced, con- siderable, in social, business, religious and home affairs. In studying the ear, the upper part represents the mentality, the middle part the executive power, the lower part the vitality and physical func- tioning. When the lower part of the ear is small and the upper large the person is mental, sensitive, and weaker in a constitutional strength. A wide head, heavy base of the ear, pointed at top, goes with a selfish nature. A good illustration is the ear.

reference to another development of the head or body should be judged arbitrarily, though it is generally a rule, for instance, that a weak mouth is placed in a head low at the point of firmness by the top of the head above the ears, etc. The features and hands conform to the head shape.

top, the regions of destructiveness and acquisitiveness lie. Chicago, with its stock yards and money making, was given as a symbol. Above the outer eyebrow, approxi- mately two inches, is the region of constructiveness—invention, designing, manufacturing, are the work done by this faculty, and Pittsburgh is its ap- propriate station. Boston represents the intellectual re- gion where memory, comparison, cau- sality and observation lie in the fore- head. The intellect has no emotion, nevertheless it is the big driver, or un- derstanding, where all emotions must pass for cool judgment and application, and if it is weak, while the other fac- ulties are strong, the efforts of the in- dividual will not be directed or car- ried out with foresight, and are some- times more dangerous than useful.

does not put it as you or I would put it, but I said I would read her words, and I will. What she says is: "How the — could I have the — boots when he was wearing them?" And, gentlemen," continued the lawyer, strik- ing the desk with his fist in a final burst of eloquence, "I ask you with some confidence, how the — could she?" Machine to Sell Milk. A London resident has invented a coin-in-the-slot machine to sell milk.

FRIENDS NOTICED IMPROVEMENT

Wonderful Results from Lydia E. Pinkham's Vegetable Compound

Beloit, Wis.—"My female trouble was brought on by overwork. I had worked in stores and had to do heavier work than my strength could stand, and had to be on my feet most of the time. Finally I had to give up this work entirely and stay at home. Doc- tor's medicine didn't give me much relief, and my mother wanted me to take Lydia E. Pinkham's Vegetable Compound. I took a couple of boxes of it, and it did not help me as much as it should, so I gave it up to try something else. Nothing I took helped me much, so I finally decided to give the Vegetable Compound another trial and to take enough of it to make sure it would help me. I have taken it over a year now and it has brought won- derful results. I have gained from 83 to 110 pounds and am keeping house now. My friends all notice the change in my health. I will be glad to answer all letters that women write to me about the Vegetable Compound."—Mrs. G. MONSON, 1515 Park Ave., Beloit, Wis. Mrs. Monson is willing to write to any woman suffering from such troubles.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots. There's no longer the slightest need of feeling ashamed of your freckles, as Othine double-strength is guaranteed to remove them. Simply get an ounce of Othine from any drug store and apply a little of it night and morning and you should soon see the worst freckles have begun to disappear, while the lighter ones have vanished en- tirely. It is seldom that more than a single application is needed to completely clear the skin and gain a beautiful clear complexion. Be sure to ask for the double-strength Othine, as this is the only one guaranteed of money back if it fails to remove freckles.

Celebration Committees!

I furnish all concessions for celebrations, either on percentage or will buy them outright. Write at once for proposition, stating dates to be held. GEO. W. BRINK, 1207 Washington Blvd., Detroit, Mich.

EYES HURT?

For burning or sore lids, and to relieve inflammation from excessive use of eye make-up. Eye Salve, according to direction. Satisfying relief. HALL & BUCKLE, 141 West 43rd St., New York.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected. Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp Root is soon realized. It stands the highest for its remarkable record of success.

Sure Relief FOR INDIGESTION

BELL-ANS INDIGESTION 25 CENTS. 6 BOTTLES HOT WATER Sure Relief BELL-ANS 25¢ AND 75¢ PACKAGES EVERYWHERE.

Piles

are usually due to straining when constipated. Nujol being a lubricant keeps the food waste soft and therefore prevents strain- ing. Doctors prescribe Nujol because it not only soothes the suffering of piles but relieves the irritation, brings comfort and helps to reg- move them. Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today. Nujol A LUBRICANT—NOT A LAXATIVE

Measles Many persons think of measles as a harmless disease and intentionally expose their children, yet measles kills more people in the United States every year than does smallpox. As most ex- perience mothers know, measles be- gins like a common cold with a slight sore throat and a slight running of the nose. After three or four days, the rash appears. The United States public health

issued a booklet which tells how to diagnose this disease and contains sug- gestions to prevent its spread. Readers may obtain a copy of this booklet free as long as the free edition lasts by writing to the United States Public Health Service, Washington, D. C., asking for "Reprint 780."

of the Stymphlian birds; cleaning of Augean stables; capture of the Cretan Bull; delivery of the horses of Diomedes; delivery of the girdle of Hippolyte; shipping of the cattle of Geryon; procuring the apples of the Hesperides; delivery of Cerberus in the upper world.

Terms of Automobiles. Dick, aged five, thinks in terms of automobiles rather than those of nat- ural history. Startled by a dog, run- ning swiftly and barking gruffly, he described the event vividly, exclaim- ing, "Tandy, he came tearing down the road with his cut-out open!" Broken Quiet. Little Bessie dropped an armful of her playthings. "Did you break any- thing?" asked her mother. "Only the outfit, mamma," she replied, "and that's mended already"

"Twelve Labors of Hercules." The destruction of the Nemean lion; destruction of the Lernean hydra; cap- ture of the Erymanthian boar; cap- ture of the Ceryneian stag; destruction

A Sign of Failure. When a man is forever talking about how people are trying to "down" him, that settles it; he's a failure.—Atch- son Globe.

THURSDAY, JULY 26, 1923.

LOCAL NEWS

Eastman Kodaks and films bring home the good pictures.

Central Drug Store.
Mrs. Katherine Loskos returned last Wednesday from Grand Rapids after a three weeks visit with relatives. Her daughter, Mrs. Edward Morrissey accompanied her home for a visit.

In the Base Ball game recently between Cheboygan and the Soo, the game ended in a 2 to 1 score. Cheboygan winning in the last frame bringing in two runs. The Soo Evening News described it as wonderful ball playing witnessed by 600 fans. "Babe" Laurent pitched for Cheboygan and The Soo Evening News says of him: "Babe Laurent, who is not a stranger to Sault fans, was on the hill for Cheboygan. Laurent pitched his best ball six years ago in the 33rd Infantry uniform where he was stationed at Fort Bragg. He worked like a Trojan yesterday and held the Sault to six hits and allowed but one run and outside of that only one Sault man reached third base. He fanned ten." Only one error was made during the whole game.

Large assortment of Bathing Caps of the famous Miller make.

Central Drug Store.
Mr. and Mrs. C. M. Morfit entertained a few friends at Bridge Friday evening. Mr. and Mrs. Oscar Schumann held the high scores.

Thirty-six ladies and gentlemen were guests at a beautifully arranged Bridge party at the home of Mr. and Mrs. A. J. Joseph Wednesday evening. The house had been made very attractive with flowers and ferns. Everyone present enjoyed the evening very much. High scores were held by Mrs. R. H. Gillett, Mrs. Holger Peterson, Dr. C. A. Canfield and Holger Peterson.

Get out your yard sticks and place your thumb on 22 1/2 inches and you can see just how long the green bass measured that was caught by C. W. Lydick at Lake Margrethe last week today. It was some bass—a small mouth green, and weighed six pounds and three ounces. Around the body it measured 12 inches. A three or four pound bass is considered a large one but they would only be "pickers" compared to the one caught by Mr. Lydick. It was a real beauty and would be the enjoy of any angler. Mr. and Mrs. Lydick reside in Dayton, O., and are guests at the J. E. Richards cottage on the west side of the lake. Next Sunday there will be a base ball game between the Rainbows, formerly the local high school team, and the Roundhouse crew, who last Sunday defeated the Switchmen. The game will be called at 2:30 o'clock. Everybody invited.

Each year the numerous relatives of Mrs. Katrina Fischer celebrate the occasion of her birthday and this year the whole party went to Houghton Lake, where Mrs. Fischer makes her home with her daughter, Mrs. Sorenson. This is always a happy event in the lives of the relatives and friends of Mrs. Fischer, and each birthday seems a little more enjoyable than the last one. Last Sunday the party from here took their dinner with them and left here at 10:00 o'clock to spend the day with this grand old lady, who was celebrating her 94th birthday. Among those who were present are Mr. and Mrs. P. C. Peterson, Ernest Larsen, Mr. and Mrs. Nels P. Olson, Ernest and Lester Olson, Mr. and Mrs. N. Schlotz, Mrs. Alged Olson and two children, Mr. and Mrs. Eberon Olson and two children, and Mrs. Holger Jansson of Grayling; Mr. and Mrs. Waldemar Olson and two children of East Jordan; Mr. and Mrs. Glen Robinson and six children of Michelson, and Mrs. S. S. Phelps and daughter Virginia of Detroit. All report a most enjoyable time.

A reunion of the Dutton family is being held this week, a number of out-of-town guests having arrived to take part in the festivities. Mr. and Mrs. E. F. Dutton reside in Grayling near the banks of the AuSable and their guests are enjoying a camping party while here pitching their tents near their home. Among those present are Mr. and Mrs. A. W. Pattinson and son Russell of Riverside, Calif., Mr. and Mrs. H. H. Walker and daughters Ethel and Florence of Chicago; Mr. and Mrs. N. B. Dutton, Mrs. William Dutton, Sr., and Mrs. Frank Wattier of Jackson; Mr. and Mrs. Clark Simmons and daughter Luella of Battle Creek; Dr. and Mrs. C. B. Wilcox and daughter Virginia of Grass Lake, Mich., Mr. and Mrs. Earl Dutton and son Mason of Roscommon, together with Mr. and Mrs. Len Isenbauer and family of Grayling. The party will give in honor of Mr. and Mrs. Pattinson's visit here from California, the latter being a daughter of Mr. Dutton. One of the pleasing features of the week's festivities was the celebration of the 10th birthday anniversary of Miss Mabel Isenbauer of this city, granddaughter of Mr. Dutton. She was the recipient of a nice gift of money, a birthday cake decorated with ten candles, and made happy with a birthday party Tuesday evening. The party are having a very enjoyable time in Grayling.

CERTO
(Surgall)

No reason now her tongue to tell That sad old story "It did not jell!" Her jam's now perfect—jelly, too She uses CERTO—so should you!

Hall's Catarrh Medicine

Those who are in a "run-down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that white Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by druggists for over 40 years. F. J. Cheney & Co., Toledo, Ohio.

POTATOES FOR SALE. Some good old potatoes, better than new ones. If ten or more bushels are wanted will deliver; if less, come and get them. Andrew Mortenson, Route 1, Grayling, Mich.

Red Crown

The High-Grade Gasoline Adds to the Joy of Motoring

THE spirit of the day is to be out in the open; to seek the by-places; to get closer to nature; here today, there tomorrow.

Hard roads and automobiles have made it possible for one to do all of these things in the companionship of his family.

The chief contributing factor to motoring is gasoline—the chief joy of motoring is to know you have a dependable gasoline in the tank. Red Crown, the High-Grade Gasoline, is dependable. The Standard Oil Company (Indiana) guarantees the uniformity of Red Crown.

With Red Crown in your tank your motor sings along the road; eager, purring, at a snail's pace or at high speed, as you please.

Red Crown is always the same, no matter where you get it, and you can get it everywhere—every few blocks in the city; every few miles in the country.

INTEGRITY SERVICE

Announcement

THE STUDEBAKER CORPORATION OF AMERICA is pleased to announce to its customers, friends, and the public generally, its complete line of new

1924 Model Studebaker Cars

Avoiding the superlatives frequently used in automobile advertisements, the Corporation desires to faithfully state the facts concerning these cars and the reasons why the public should buy them.

THE CARS

In design, quality of materials, standard of workmanship, durability, refinements, performance, freedom from repairs, and price, the Studebaker 1924 Model Cars are distinctly the greatest intrinsic values the Corporation has ever offered.

Every improvement the safety and practicability of which have been verified by engineering tests is embodied in these new cars.

The Big-Six

THE BIG-SIX LINE comprises four models, mounted on the standard 126-inch chassis with 60 H. P. 3 3/4 x 5 inch motor:
7-passenger Touring Car - \$1750 5-passenger Coupe - \$2550
5-passenger Speedster - \$1835 7-passenger Sedan - \$2750
all prices f. o. b. factory

Refinements and a few minor mechanical changes have been made in the Big-Six, which has established an enviable record for five years. Our large production accounts for its low price. It is a car of the highest grade, comparable to the best.

The Special-Six

THE SPECIAL-SIX LINE comprises four models mounted on the standard 119-inch chassis with 50 H. P. 3 1/2 x 5 inch motor:
2-passenger Roadster - \$1325 5-passenger Coupe - \$1975
5-passenger Touring Car - \$1350 5-passenger Sedan - \$2050
all prices f. o. b. factory

Radiator, hood, cowl, and body changes have been made in the Special-Six, with minor mechanical changes and refinements in the chassis. The Special-Six has for five successive years added luster to the name STUDEBAKER. It is one of the most satisfactory and finest cars on the market. It is as good in every respect as the Big-Six, except that it is smaller, and costs less to produce, and therefore sells for less.

The Light-Six

THE LIGHT-SIX LINE comprises four models, mounted on the standard 112-inch chassis with 40 H. P. 3 1/4 x 4 1/2 inch motor:
3-passenger Roadster - \$975 2-pass. Coupe-Roadster - \$1225
5-passenger Touring Car - \$995 5-passenger Sedan - \$1550
all prices f. o. b. factory

No body or mechanical changes except refinements have been made in the Light-Six. Over 130,000 Light-Sixes have been produced in the new, modern \$30,000,000 Studebaker plant at South Bend, Indiana, under most economical and

almost ideal manufacturing conditions. In our judgment, it stands out as the greatest value and the closest approach to mechanical perfection in moderate priced cars yet produced.

THE REASONS WHY

With \$90,000,000 of actual net assets and \$45,000,000 invested in plants, Studebaker has ample physical facilities to manufacture most economically.

Studebaker's organization of manufacturing executives, engineers, metallurgists, chemists, inspectors, and skilled mechanics is second to none in the industry. The design of Studebaker cars and the workmanship upon them conform to the highest principles of engineering standards and mechanical practice known to the industry.

Best of Materials Used

Studebaker cars contain the finest known grades of iron, steel, aluminum, tires, electrical equipment, glass, bearings, etc. No better materials for automobile manufacture exist. Sheet aluminum has but one-third the tensile strength of sheet steel, and consequently, Studebaker uses sheet steel for its bodies.

By the manufacture of drop forgings, castings, stampings and the machining, assembling and finishing of motors, axles, frames, transmissions, bodies, tops, etc., and the consequent elimination of middlemen's profits, coupled with lower overhead factory costs per car arising from quantity production and low commercial expenses, Studebaker's costs are kept at an economically low point possible of attainment only by manufacturers with vast physical and financial resources.

Bodies Unexcelled

The bodies of Studebaker cars are not excelled in quality of materials and craftsmanship, by any cars on the market. The Coupe and Sedan closed bodies are magnificent examples of the coach builder's art.

Merit Wins

The sales of Studebaker cars for the past six years have shown each and every year a progressive increase. 81,880 cars were sold in the first six months of 1923 as against 60,053 for the same period last year. Only products of merit can make such growth.

The Studebaker Corporation of America

Mr. Willy Peterson of Copenhagen, Denmark, arrived in Grayling last week, and has secured employment in one of the Salling Hanson company lumber camps. He says he wants to get acquainted with America and American people and expects to remain here some time.

Miss Marcella Sullivan, who has been visiting her grandparents, Mr. and Mrs. Frank Trudeau of Onaway for several weeks, returned home Sunday morning. She is entertaining her friend Miss Freida Clemens of that place who accompanied her home and who will remain for a week.

Mr. and Mrs. Lorne Douglas of Ann Arbor arrived Monday to visit relatives, the latter expecting to remain for an indefinite time. They are guests at the home of Mrs. Douglas' sister Mrs. Esbern Olson, and are also visiting her mother Mrs. Ellen Failing, who makes her home with her son Allen on his farm in Beaver Creek township.

An article entitled "Painters Made, Not Born, Chattanooga Artist Says" recently appeared in one of the newspapers of Chattanooga, Tenn., together with a photograph of our old friend Nemecius Neilson. Mr. Neilson, who left Grayling a few years ago operates a studio in Chattanooga, where he is making a successful business of his art of painting.

Word was received by Grayling friends yesterday of the death of Mrs. Ayers, wife of the late Frank Ayers railroad engineer, who lost his life in the recent Cannonball wreck near here. Mrs. Ayers was ill and in a Detroit hospital at the time of Mr. Ayers' death, and since that time has been in a feeble condition, in Ford hospital, Detroit. The news of her death will be received with regret by the many friends of the family in Grayling, they having been former residents of this place.

E. V. Smith, Piano Tuner, in town this week. Orders left at Sorenson & Sons, Phone 1054, will receive prompt and careful attention.

Try the small packages of Whitman's summer candy: Peanut Brittle, Mints, Caramels and many others. Central Drug Store.

A few wonderful taffetas and cotton crepe dresses at the Gift Shop, 1-4 off for next 10 days.

Mr. and Mrs. R. H. Gillett and Mr. and Mrs. O. P. Schumann enjoyed a motor trip to Charlevoix Sunday.

Mrs. Guy Peterson and twin sons of Johannesburg are visiting in Detroit where one of the twins, Guy Vandoran recently underwent a slight operation. The baby is getting along nicely.

Mr. and Mrs. Howard O. Scarlett and son Harold Owen of Detroit are visiting relatives and friends in Grayling, motoring here arriving yesterday afternoon. Mrs. Scarlett was formerly Miss Irene LaSprance.

Mr. and Mrs. Alfred E. Underhill, accompanied by their guests Miss Mae Underhill and Mr. James Bruskny of Rochester, New York, who have been spending several weeks here, left early Monday morning by motor for Charleston, W. Va., to visit relatives of the Underhills. Mr. and Mrs. Underhill who are here from Long Beach, Cal. for the summer, will return to Grayling after a two weeks visit in Charleston.

Ask your grocer for Grayling-made butter; fresh and pure.

Mr. and Mrs. Ernest Larsen left by motor Monday morning for Bad Axe to visit relatives for a week.

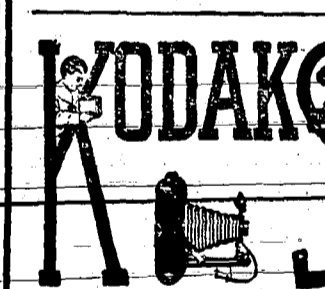

Russell Robertson is confined to his home with a badly sprained foot as the result of an accident last Sunday while driving his father's car. He with a couple of boy companions were driving to Higgins Lake, when the car hit a stump in the road and turned over. Russell's foot was caught so that it was badly wrenched and sprained. He was brot to Grayling by his companions and taken to Mercy Hospital where an X-ray revealed that no bones had been broken but later it was found that one of the bones of the ankles has been splintered. It will be three or four weeks before he will be able to be on his foot again.

The baseball game last Sunday played between the Roundhouse Rats and the Grayling Snakes (Switchmen) was a hard fought contest, the former winning by a wide margin, the score being 22 to 1. A number of followers of each side attended to root for their favorites, and they enjoyed many thrills. The battery for the Rats were Bennett and DeFrain, and for the

Snakes Cardinal, Nelson, and Cody. The Snakes had a number of chances to score but, were unable to get all the way around. The lone score of the Snakes was made in the ninth inning, when Cardinal hit the ball for one station, then stole two bases and came in on a pass ball.

Plan to Capture World Markets for America

"We'll sell the world!" said Dr. Julius Klein, director of the bureau of foreign and domestic commerce, shown here, third from left, with his assistant directors as they completed their preliminary work for the 1923-24 Hoover program for making the world America's market place. Left to right, they are: Thomas R. Taylor, Louis Domestzky, Dr. Klein, O. P. Hopkins and Robert A. Jackson.

SOME SHORTHAND WORK

Cherokee Princess Is a Seer

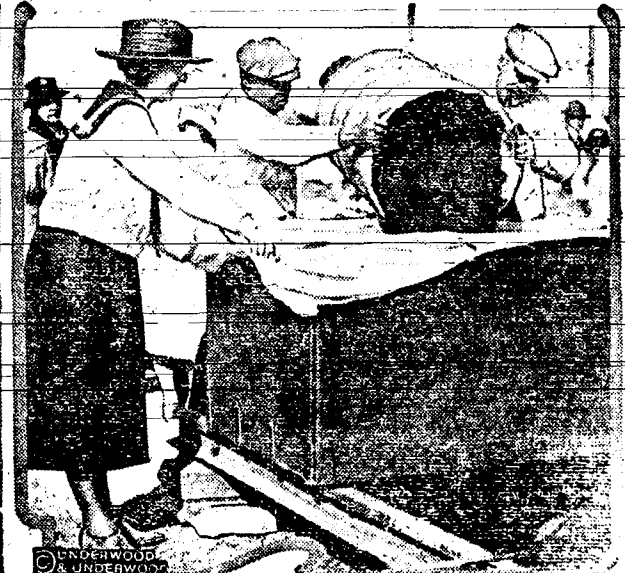

William M. Day of Washington, president of the Shorthand Reporters' association, standing beside 60,000 pages of shorthand which he personally recorded during the proceedings of the commission for the adjustment of foreign claims in London.

Princess Wabiaton, of the Cherokee nation, who is a half-breed, her father being a French Canadian and her mother a daughter of Spy Back o, the Cherokees, has just proved before such research workers as Dr. Walter F. Prince, director of the American Society of Psychological Research, Professor H. H. Dowd and others, that she possesses peculiar powers of seeing into the future and also delving into the past. Her ability to read minds is remarkable. She is seen here reading the mind of Mrs. John Westfield in New York.

Celebrating Green River Day

Starting with a pageant of the overland trail, in which pioneers, and anti-pony-express riders took part, the "Green River Day" celebration in Green River, Wyo., finished with a good old-fashioned western barbecue. Photograph shows "Doc" Frye, famous cook, making coffee for 5,000 ranchers, shippers and railroaders.

"SPIRIT OF MUSIC"

Here is the clay model by Albin Polasek, well-known sculptor, which is to be cast in bronze to adorn Michigan avenue in Chicago. It is called the "Spirit of Music." The statue is six feet high and will be placed on a granite platform five feet high. Polasek thinks music is a science and for this reason he has combined in his statue the strength of the male and the beauty and grace of the female form.

Curious Use for Ice.

Up to the present it has been possible to leave only small cavities in concrete, but a big advance has been brought about by a new foreign method. Pieces of ice that correspond to the measurements of the cavities required are embedded in the concrete mass, and small channels are left to allow the water to run off when the ice melts. The process is of particular advantage in reinforcing concrete with iron. The iron parts are not built during the stamping, but are attached to the blocks of ice before the work is begun. The repeated moistening usually necessary in concrete work is not required in this process, for the melting of the ice makes up the loss by evaporation.

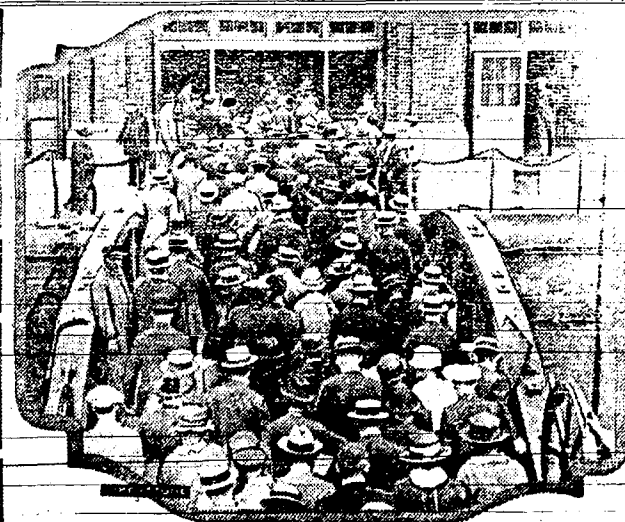

Fearful for the Earth.

It was in the midst of a nose dive and Reginald, who was making his first flight, tugged frantically at the pilot's sleeve. "We better get away from here," he shrieked, "the earth's swelling up like a balloon and it's liable to burst any minute."

Just the Same.

"The modern family's idea of too many children is one," remarks an exchange. Same as a bachelor's idea of too many wives. — Boston Evening Transcript.

Immigrants Thronging Into America

Already the new quotas of immigrants have been filled in the case of most foreign countries, and many will have to return to their native lands. Here are a lot of fortunate ones, who have passed the examination at Ellis Island and are going ashore at the Battery, New York.

ITEMS OF INTEREST

In 1920 France, Italy and Belgium imported 304,000 tons of beef.

Modern ice skating rinks have grinders to sharpen the skates while the users rest.

Wool is used for the manufacture of artificial silk, rope, carpets and other fabrics.

The birth rate in the United States for the first six months of 1922 was 22.7 for each 1,000 population.

Canadian manufacturing establishments produce \$450 worth of products per capita annually.

With the completion of a new cable way tourists will be transported in 90 minutes from summer heat to arctic cold on Mount Hinck.

The average time taken by a bird to build its nest is about a week; but if the first one is destroyed a second home may be built in a day.

Frocks of Knitted Fabric;

Dresses for Little Girls

ARE you casting about for the ideal gown for summer wear? Something refreshingly cool, yet not of the lingerie type, a frock that is apropos for any occasion, being dressy, yet not so Jessy but that it is suited to the time and the place; a dress that "looks like new" at every wearing? For those who have had the good fortune or forethought to acquire one of the ultra smart modes fashioned of some one or the other of the new knitted fabrics, "dreams have come true."

Just because knitted textiles are so likable, not only are we catering to our fondness for them in that our

trancing girl are points of interest in this costume. An outcome for the fashions for knitted fabrics is the overblouse and Jacquete made thereof. Even newer are the short loose coats of knitted yardage, which are so aptly finished in silk braid or bound with inch-wide self fabric.

The vogue of embroidery for the dress-up frocks of the very little miss is one that continues year after year. No other adornment seems to be quite so in keeping with the dainty materials and simple lines of youthful garments, and consequently the styles in summer dresses for 1923, being no

Two Smart Styles in Knitted Frocks.

loveliest summer frocks are being created therefrom, but rumour has it that fabrics of this genre will be very fashionable this fall.

Just now interest centers about white midsummer frocks made of knitted fabric, for the solid white ensemble is registered as the style de luxe for the moment. The accompanying picture illustrates two smart styles which owe their attractiveness to the handsome knitted textiles from which they are created.

The one to the right is made from drop-stitch tricosham, and exquisite

exceptions to this rule, feature embroidery in many new and interesting uses.

In the little white voile party dress illustrated below, French knots are used to finish the neck and sleeves. Fancy smocking at the front and back adds an attractive touch. Around the hem of the skirt is a garland of tiny flowers embroidered in French knots in pink, yellow and blue.

Colorful needlework is also being extensively used on nursery frocks of fine gingham, cotton crepe and black tulle. On these the decorative de-

White Voile Party Dress.

knitted fabric featuring the openwork effect which is quite the rage this season. The open stitch being in stripes, gives chance for clever play in combining horizontal with verticals. Notice the novel sleeves.

The companion frock in the picture takes on more of a tailored aspect in that it is developed from the plain tricosham, which is so firmly knit that it becomes as a rich, heavy, silk-lined material. However, it is truly a knitted fabric possessing all the virtues of being cool, just elastic enough to conform to grace, and for durable wear it has no peer. Plaited skirt, buttons idrotically placed, and an en-

slens are amusing. Animals, toys or familiar figures from fairy tales are embroidered, or appliqued, to ornament these otherwise very plain little garments. Dressier models are also colorful but use fine embroidered bouquets or garlands of fruits and flowers. Little tassetta dresses are shown with large rosettes or frills of the same material about the skirt, the center of each rosette being made of tiny silk flowers.

Julia Bottomley
(© 1922, Western Newspaper Union.)

Kid Flowers. Flowers of cloth painted in various colors are seen in unusual hats and gowns today. Kid flowers at the moment are having rather a vogue.

For Favors or Gifts. For favors or gifts, if one does not want to spend much money, there are attractive little shades or electric-light pulls of painted material.

Novelty in Voile. A new voile for this season has me-

tallic dots sprinkled over its surface. It has also a border design in metallic figure.

Sleeveless Coats. Sleeveless coats are to be popular this spring—particularly when worn with long-sleeved frocks on which there is much ornamentation.

Extremely dainty and inexpensive is the new lingerie of pastel tinted voile trimmed with very narrow, tan white tape.

The Quality Car

SUPERIOR 5-Pass. Sedan \$860 f.o.b. Flint, Mich.

Not alone for every-day utility does Chevrolet represent the world's lowest-priced quality car. It also meets the requirements of particular people for those social and sport occasions when artistic proportion, high-grade coach work, and handsome finish are in harmony with the time and place.

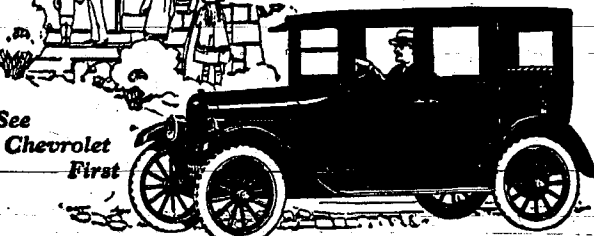

You can be proud of your Chevrolet, combining, as it does, a high degree of engineering efficiency with modern quality features that appeal to the experienced and the discriminating.

FOUR O'CLOCK IS TEA HOUR SLEEPING IN ESKIMO LAND

Almost Sacred Institution in Buenos Aires, and Practically Observed by All Classes.

Going to Bed Is a Simple Process and Sound Slumber Is Had Beneath Heavy Furs.

Ten is an institution in Buenos Aires. All offices swear off work temporarily at 4 o'clock each afternoon. White-coated porters bring steaming cups around to the employees—and employees gather in canes and derby hats and saunter forth for the nearest tea saloon. Because of the size of this fashionable promenade, Calle Florida, the Fifth Avenue of Buenos Aires, is closed to vehicle traffic from 4:30 to 7:30. The World Traveler magazine.

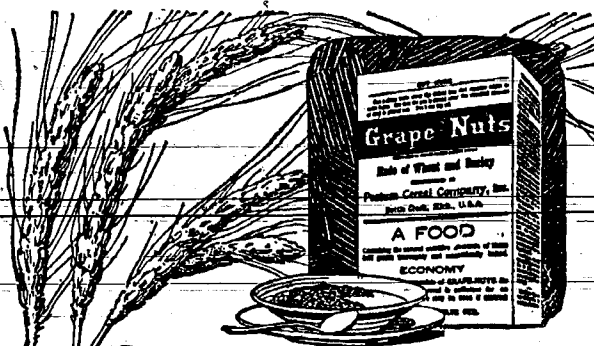

Going to bed in Eskimo land proves to be a very simple matter. A small suspension lamp which burns seal oil through a moss wick, is lit. This lamp is used for warmth as well as light. Nanook built a tiny igloo against the inside wall of the room for the July dogs, where they are packed away like two little muffs. Large polar bear and seal skins are placed on the snowy floor, everybody disrobes and cuddles down under great warm furs, and as the dim light of the oil lamp flickers against the snowy walls of the igloo, all that you can see of the Nanook family is a row of heads just showing beneath their great fur robes.

The city imbibes its coffee and tea publicly. In the mornings the streets are congested with waiters from bars carrying nickel pots of Brazilian coffee to tidy office clerks. The Avenida is swamped with other non alcoholic drinkers who, by paying for a 10-cent cup of coffee at a sidewalk table, get a peep of vantage for the purpose of ogling pretty women out on shopping expeditions.

Outside the wind is howling and the snow is drifting into huge hills, and the dogs, powdered with the blowing snows, are curled up sleeping, says Travel Magazine.

It is easier to be resigned when we pause to consider that our 70 years is only part of 70,000,000.

A Deceiver. "How intellectual that gentleman looks!" "Doesn't he?" But he isn't—he writes poetry."

The Meat of the Wheat

STARCH is the "meat" of the wheat berry. It is the great energy-producing element of the grain. But, in order to do you any good, it must be thoroughly digested, and it is right here that such a food as Grape-Nuts renders special service.

Grape-Nuts, made from wheat and malted barley, supplies the meat of the wheat in most digestible form.

That is because in the making of Grape-Nuts a large proportion of the starch is converted into dextrins and maltose—forms into which all starch elements must be changed before they can be assimilated by the system.

Grape-Nuts not only digests easily, but also aids in the digestion of other foods.

Crisp, delicious Grape-Nuts with milk or cream is a complete food. It supplies the life-essential vitamin-B; also iron, phosphorus and other important mineral elements for nerve, tooth, bone and other body structure.

The daily use of Grape-Nuts is a form of health insurance which has demonstrated its value for more than 25 years.

Grape-Nuts FOR HEALTH

There's a Reason. Your grocer has interesting details of our offer of over \$7500.00 for Grape-Nuts Recipes. Ask him about it; or write to Recipes Dept., Postum Cereal Co., Inc., Battle Creek, Mich.

FARM BUREAU NOTES
 County Agricultural Agent

Test—Don't Guess.
 (Another short chapter in the story: "Science and the Farmer.")
 One of the very weak and wasteful points in farming is our habit of doing almost everything by guess—without much idea how it will come out. This is one of the things that helps largely in keeping us poor, and from having many of the good things of life that are really within our reach.

Easy-going, shiftlessness is at the bottom of it. We guess that the oats will not be smutty. We guess that the potatoes seed is so clean that we will not need to treat with corrosive sublimate. We guess that worms and other pests will not bother the fruit, to save ourselves the trouble of spraying, and have a lot of diseased cider apples, and no good winter apples to sell in Grayling, while the supply for that town is shipped in from far distant points, and we holler because we can't sell our apples. We don't cull our hens, hence part of the

stock is kept at a loss. So on through the list. We make a lot of our own troubles.

The Babcock Tester.
 About a third of the cows of the United States pay a profit. A third barely pay their way. The other third are kept at a great loss. A farmer keeping six cows might easily have two that paid a profit; two that barely paid their way; and two that failed to pay. If so, he makes nothing by keeping those six cows. The two that failed to pay take the profit made by the two that paid. This disposes of four cows out of the six. The other two that barely paid their way, of course, make no profit. So there is no profit from the lot.

No man can really tell whether his cows pay unless he figures the value of feed, and frequently weighs and tests the milk in order to know how much butterfat the cow produces.

The statement: "Oh, well, you can't charge my cows up with their feed, for I raised it on the farm, and I didn't pay out a cent; so all I got out of the cows must have been gain."

Let's never use such an argument again, for the labor put on that feed; the rent of land, the taxes, the interest on investment, the depreciation of tools and building all give that feed

a high price. It took a lot of fertility out of the soil, too. That has a larger value than it seems to realize.

The Babcock test solved the problem of a simple, accurate, inexpensive, and simple method of testing milk and milk products for fat. No other test equally as good is known. It was invented by Professor S. M. Babcock, Chief Chemist of the Wisconsin Agricultural Experiment Station, made public in 1890, and not patented by the inventor, but generously donated to the world.

One eminent authority states that the invention has added more to the wealth of Wisconsin than the Agricultural College has cost the state.

Many are Testing.
 Many thousands of farmers are testing, and tens of thousands of cows are being tested for fat production, and many startling things are being found out about cows.

It is often found that what the farmer thought was his best cow is far from it, and what he thought was his poorest, when fed a proper ration, made the most profit.

This often happens here in Michigan. The Agricultural College, Dairy Department reported in May that the purebred Jersey Cow "Bow" that was offered for sale at \$50 last year and

received an offer of only \$25, was tested out by the Cow Testing Association at Parma, near Jackson, Michigan. When given proper care and feed, "Bow" made 13214 pounds of milk and 592.5 pounds of butterfat in the year. This butterfat is equal to 740.025 pounds of 80 per cent butter. Thus "Bow" did more than three times as well, both in milk and butter, as the average farmer cow.

Testing Helps.
 Cow testing furnishes the knowledge which enables the dairyman to cull wisely, feed properly, and cull the steps to success.

What Happened in Newago.
 In Newago County, Michigan, a member of the Cow Testing Association milked 11 grade cows. His check for February was \$394. A neighbor, but not a member of a Cow Testing Association, milked 23 cows. His milk on the same market brought \$354. Some men milk cows for profit, while other men strip cows for pleasure and never get to the profit.

How To Do It.
 You have a County Agricultural Agent. He has a Babcock Milk Test. He has sent every farmer in the county a return postal card offering to do all the cow testing you want

him to do, if you fill him the attached card and tell him you want him.

Better Use Your County Agent. Doan's Hurt The Cow.
 Testing for butterfat in milk does not hurt the cow. Don't be afraid. All we want of the cow for that test is half a tea cup of her milk.

Get Your Money's Worth.
 While the Agent is at your house testing, get your money's worth out of him, by talking about a plan for weighing the milk every so often; and about plans for more skillful feeding.

Some of the best dairymen in the world are doing this very thing, so you need not be ashamed to.

Use your County Agent.
 Prosperity Follows the Dairy Cow.
 Test—Don't Guess.

FARMERS' PICNIC SATURDAY AUGUST 18 AT CHARLES CORWIN FARM.
 Crawford County Grand No. 934 will hold their annual picnic at Oak Grove Farm on Saturday, August 18, at the home of Charles Corwin.

Everybody is invited; the farmers are invited to come and meet each other, and those that are not farm-

ers are invited to come and meet the man who helps feed the world.

A good lively program is being prepared. There will be a ball game between the married and single men, tug of war and races of all kinds.

But the best part will be the picnic dinner which will be at noon, (sharp) where you can enjoy the other "Yellows" cuts. So everybody bring a full basket of good things to eat, supper will also be served for those who wish to stay for the dance which ends a big day. Coffee, cream and sugar will be served free.

The officers and members of the Farm Bureau with their families are given a special invitation to come.
 7-26-4.
 Committee.

LOVELLS NEWS.

Mr. and Mrs. George Schuyler were Grayling visitors Thursday.

Mr. M. Touchout and a friend of his were out at K. P. Lake.

Albert Kochel and family were in

Grayling on business Wednesday.

Mr. and Mrs. Harry Simpson of Grayling are out at K. P. Lake. Mr. George Brand and friends were in Grayling on business Friday.

H. B.

JAMES McDONNELL THANKS PUBLIC.

I have sold my interests in the Grayling Dairy Products Market to Mr. Henry W. Klein and in retiring wish to thank the people of Grayling for the patronage they have given me. The consumers and the merchants all have been loyal in their support and made it possible for my business and financial success. I am specially grateful to the B. of T. who used their influence in helping to build up my patronage and in other ways. We have given the public a service that has long been needed here and we know the people fully appreciate it, and we trust the loyal support and patronage given me may be extended to my successor. Once more extending my sincere thanks, I am,
 Sincerely yours,
 James McDonnell.

Will Interest Readers of the Avante.

Those having the misfortune to suffer from backache, urinary disorders, gravel, dropsical swellings, rheumatism, or other kidney and bladder disorders, will read with gratification this encouraging statement by a Grayling man.

G. A. C. Hen upon, restaurant, Spruce St., says: "My back ached terribly through the small part and was sore. The kidney secretions were too frequent in action and highly colored, but a box of Doan's Kidney Pills, which I got at Lewis' Drug Store, proved sufficient to cure the complaint."

Mr. Collen gave the above statement October 11, 1918 and on April 28, 1920 he added: "Doan's Kidney Pills fixed me up in good shape after the cure has lasted. I am glad to again recommend Doan's."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Collen had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

MORTGAGE SALE.

Whereas, default has been made in the payment of the money secured by a mortgage dated the 20th day of August, 1912, executed by James I. Baer and Emily M. Baer, his wife, to the Roscommon State Bank, a corporation of Roscommon, Michigan, which said mortgage was recorded in the office of the register of deeds of Roscommon county, Michigan, in Liber 1 of Mortgages on pages 59 & 60 on the 5th day of September, 1912; and Whereas, the amount claimed to be due on said mortgage at the date of this notice is the sum of \$329.75 of principal and interest and the further sum of Fifteen dollars as an attorney fee provided for by statute, and which is the whole amount claimed to be unpaid on said mortgage; and no suit or proceeding having been instituted at law to recover the debt now remaining secured by said mortgage, or any part thereof, whereby the power of sale contained in said mortgage has become absolute.

Now, therefore, notice is hereby given that by virtue of the said power of sale and in pursuance of the statute in such case made and provided the said mortgage will be foreclosed by a sale of the premises therein described at public auction, to the highest bidder, at the front door of the court house in the village of Grayling, Michigan, on the 19th day of October, 1923, at one o'clock in the afternoon; which said premises are described as follows, to wit:

The northwest quarter of the southeast quarter and the northwest quarter of the southwest quarter of section four, township twenty-five north, range four, west, Crawford County, Michigan.

Roscommon State Bank Mortgage.
 Dated, July 20th, 1923.
 Hiram R. Smith,
 Attorney for mortgagee.
 Business Address:
 Roscommon, Michigan. 7-26-23

PRORATE NOTICE.

State of Michigan,
 The Probate Court for the County of Crawford.

In the matter of the estate of John C. Falling, township of Beaver Creek deceased.

Notice is hereby given that four months from the 15th day of July, A. D. 1923, have been allowed for creditors to present their claims against said deceased to said court for examination and adjustment, and that all creditors of said deceased are required to present their claims to said court, at the probate office, in the Village of Grayling in said county, on or before the 19th day of November, A. D. 1923, and that said claims will be heard by said court on Monday the 19th day of November, A. D. 1923, at ten o'clock in the forenoon.

Dated this 16th day of July, A. D. 1923.

George Sorenson,
 Judge of Probate.
