

## Liberty Park Subdivision Water Improvement Project

### **\*\*PROJECT STATUS UPDATE\*\***

This letter is being sent to property owners within the Liberty Park Subdivision to provide an update regarding the status of a potential future water improvement project. The purpose of this project will be to bring Lake Michigan water into the Liberty Park Subdivision to replace the current water system. Currently, the Village of Westmont and DuPage County are completing the needed preliminary project analysis, design and cost estimate associated with the project. Once this analysis is completed, a townhall meeting will be held for residents so that the project specifics can be presented. It is anticipated that this meeting will be conducted in July or August with notice of the meeting given to all residents at least two weeks prior to the meeting.

After the specifics of the project are presented to the residents at this meeting, the process required to form a Special Service Area will then be described. Following the meeting, a survey will then be sent out to the Liberty Park residents to determine if continued interest exists to continue forward with the project. This entire process will be fully explained at the future public meeting. The entire meeting will be recorded and made available online shortly after completion for those residents unable to attend the meeting. There will not be a virtual option for attendance due to the anticipated number of attendees.

Please be aware that any information received or posted by anyone other than a joint statement from the Village of Westmont and DuPage County regarding this matter should not be considered accurate or reliable. This project is extremely complicated, and the Village and County are working with all of the stakeholders to make the whole process as transparent as possible. We understand that there will be many questions by homeowners as we move forward in the process. Please realize that we will make every effort to answer all questions at the future public meeting.

Please note that the project is being broken up into two (2) distinct project areas and meetings will be held for each project area separately. The two project areas are the community well properties and the private well properties. You will receive an invite to the meeting where your property is located. The community well area meeting will be the first held.

Should you have any immediate questions with regard to this information please call Gregory Phillips, DuPage County Public Works at 630-407-6679 or email any questions you have about the project or Special Service Area process to [LPWater@dupageco.org](mailto:LPWater@dupageco.org). We will do our best to answer each of these questions during the presentation.
