

**Liberty Park Subdivision Water Improvements
Proposed Lake Michigan Watermain Service Extension**

*****SURVEY UPDATE*****

In July and August, DuPage County and the Village of Westmont conducted a survey to determine the level of interest among homeowners to learn more about the potential for the Village to provide Lake Michigan water service to your neighborhood. Of the nearly 400 respondents, 85% were in favor of the Village moving forward and developing plans and a cost estimate for this project. In September, the Village will enter into an agreement with an engineering firm to begin this investigation process. It is anticipated that the preliminary engineering will take several months to complete. At that time, the Village and the County will conduct a public meeting to present project specifics, including a more refined cost estimate, to the property owners for consideration.

Please be aware that any information received or posted by anyone other than a joint statement from DuPage County and the Village of Westmont regarding this matter should not be considered accurate or reliable. This project is extremely complicated, and the Village and County are working with all of the stakeholders to make the whole process as transparent as possible. We understand that there will be many questions by homeowners as we move forward in the process. Please realize that we will make every effort to answer all questions at the future public meeting.

Once the preliminary project information is prepared, we will then send out a meeting invite which will most likely include both in-person and remote attendance options. Residents should understand that the information that is now being prepared will be for presentation purposes only. Following the future presentation to the residents, we will then survey the property owners again to determine if continued interest exists to continue forward with the project. This entire process will be fully explained at the future public meeting.

Should you have any immediate questions with regard to this information please call Gregory Phillips, DuPage County Public Works at 630-407-6679
