

# Construction General Permit Modifications

*Request for public comment due October 12, 2020*

The Construction General Permit, COR400000, modification is available for public comment. The division modified the permit to clarify several areas of the permit based on a year of inspection data, including final stabilization requirements, signatures on individual corrective actions, addition of diversions as allowable non stormwater discharges, and more. All documents for the permits can be accessed at the [Public Notice Information webpage](#) or in our records manager database under [Construction General Permit Documents](#).

The Water Quality Control Division is piloting using a Google form for public comments. Please submit all your comments through the [COR400000 Public Comments Form](#).

Comments are due within 60 days on October 12, 2020. For more information about this new process, please refer to the [FAQ for New Public Comment Process](#). Any questions about the draft permit should be sent to the permit writer contact below. The division will respond to comments in the final fact sheet after the public comment period is over.

If you have any problems obtaining documents or information from the web site, please do not hesitate to contact the Permits Section Support Team at (303) 692-3517.
