	<i>Description: Install the OWTS exactly as depicted in the JVA Inc design dated, stamped and signed on January 30th, 2024 by Simon A Farrell, PE. This system is designed to accommodate the maximum daily flows for a 5 bedroom residence.</i>						
	<i>The system consists of a Valley Precast 1,500 gallon, single compartment septic tank with an effluent filter and high water alarm placed on the outlet tee, followed by a 2,000 Valley Precast three-compartment recirculating/dose tank which will send waster to two Orenco Advantex Series AX20 pods for nitrification using an Orenco PF500512 pump. Nitrified effluent flows to the splitter valve for recirculation to the 1,500 gallon first tank for denitrification then is dosed using an Orenco PF500512 pump to 1,728 square feet of soil treatment area via 2 beds consisting of 4 rows of 18 Infiltrator Quick4 Plus Standard chambers for a total of 144.</i>						
	<i>Distribution lateral details, along with orifice size, spacing and orientation are on the design drawing. The contractor must verify that all electrical components and inspections are covered under the electrical permit associated with the Orenco Vericom control panel (Model VCOM-AX20B2) and pump connections. The alarm must be connected to a separate circuit. Additional pump details are on the design drawing. Advantex systems must conform to the CDPHE technology approval letter dated May 1, 2018, including configuration in mode 3 for treatment level 3N.</i>						
	<i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i>
