**PERMITS APPLIED BY TYPE (02/26/2024 TO 03/01/2024)**

Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
<p><i>Description: Install the new system exactly as depicted in the JVA design dated February 22nd, 2024, stamped and signed on February 28th, 2024 by Simon A Farrell, PE. This system is designed to accommodate the maximum daily flows for a 4 bedroom residence.</i></p> <p><i>NOTE: Test pits must be conducted and reviewed by the Design Engineer, prior to installation, installation down-gradient and immediately adjacent to the proposed location of the soil treatment area (STA) to confirm soils. Any changes required to the design must first be reviewed and approved by the Design Engineer and Eagle County Environmental Health Specialist.</i></p> <p><i>The system consists of a Valley Precast 1,500 gallon, single compartment septic tank with an effluent filter and high water alarm placed on the outlet tee, followed by a 2,000 Valley Precast three-compartment recirculating/dose tank which will send wastewater to two Orenco Advantex Series AX-20 pods for nitrification using an Orenco PF500512 pump. Nitrified effluent flows to the splitter valve for recirculation to the 2,000 gallon first tank for denitrification then is dosed using an Orenco PF500512 pump to 720 square feet of soil treatment area via two feet of secondary sand consisting of 2 beds with 3 rows of 10 Infiltrator Quick4 Plus Standard chambers for a total of 60. An ADV will be located at the high point of the system.</i></p> <p><i>Distribution lateral details, along with orifice size, spacing and orientation are on the design drawing. The contractor must verify that all electrical components and inspections are covered under the electrical permit associated with the Orenco Vericom control panel (Model MVP-DAX) and pump connections. The alarm must be connected to a separate circuit. Additional pump details are on the design drawing. Advantex systems must conform to the CDPHE technology approval letter dated May 1, 2018, including configuration in mode 3 for treatment level 3N.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i></p>							
<b>OWTS-028889-2024</b>	OWTS Permit	New	62 Metheny Wy Eagle Area, CO	Eagle area	\$4,000,000.00	02/27/2024	02/29/2024

## PERMITS APPLIED BY TYPE (02/26/2024 TO 03/01/2024)

Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
----------	------	-----------	--------------	----------	-----------	----------	------------

*Description: Install the new system exactly as depicted in the JVA design dated, stamped and signed on February 26th, 2024 by Simon A Farrell, PE. This system is designed to accommodate the maximum daily flows for 6 bedrooms.*

*The system consists of a Valley Precast 2,000 gallon, single compartment septic tank with an effluent filter and high water alarm placed on the outlet tee, followed by a 2,000 Valley Precast three-compartment recirculating/dose tank which will send wastewater to two Orenco Advantex Series AX-40 pods for nitrification using an Orenco PF500512 pump. Nitrified effluent flows to the splitter valve for recirculation to the 2,000 gallon first tank for denitrification then is dosed using an Orenco PF500512 pump to 2,112 square feet of soil treatment area via 4 beds consisting of 4 rows of 11 Infiltrator Quick4 Plus Standard chambers for a total of 176.*

*NOTE: An additional test pit must be conducted and reviewed by the Design Engineer, prior to installation, installation down-gradient and immediately adjacent to the proposed location of the soil treatment area (STA) to confirm soils tested in test pits 1 and 2. Any changes required to the design must first be reviewed and approved by the Design Engineer and Eagle County Environmental Health Specialist.*

*A licensed installer has not been identified. No person shall install, renovate, or repair an OWTS in Eagle County (EC) without a valid EC Systems Contractor License. Any person that conducts a business as a systems contractor without having obtained a valid license section commits a Class 1 petty offense as defined in section 18-1.3-503, C.R.S. Please notify the department when an installer is identified, prior to installation of the OWTS.*

*Distribution lateral details, along with orifice size, spacing and orientation are on the design drawing. The contractor must verify that all electrical components and inspections are covered under the electrical permit associated with the Orenco Vericom control panel (Model VCOM) and pump connections. The alarm must be connected to a separate circuit. Additional pump details are on the design drawing. Advantex systems must conform to the CDPHE technology approval letter dated May 1, 2018, including configuration in mode 3 for treatment level 3N.*

*Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.*

<b>OWTS-028906-2024</b>	OWTS Permit	Major Repair	701 Red Canyon Creek Rd Edwards Area, CO	Edwards Area	\$0.00	03/01/2024	03/08/2024
-------------------------	-------------	--------------	---	--------------	--------	------------	------------

*Description: Install the new system exactly as depicted in the LKP Inc design dated, stamped and signed on January 12th, 2024 by Luiza Petrovska, PE. This system is designed to completely replace the system originally permitted under #IS-1774-98 and will accommodate the maximum daily flows for 7 bedrooms.*

*The OWTS consists of one sewer line from the residence. A Valley Precast, 2000 gallon, two compartment, concrete septic tank with an effluent filter in the outlet tee will be used. The STA consists of 8 rows of Infiltrator Quick4 Plus Standard chambers connected serially for a total of 88. The effluent line will be double encased with Sch40 where it crosses the creek. Cleanouts will be present every 100 feet in the effluent line. Abandonment of the existing tank must be completed in conformance with ECPHA OWTS Regulation 43.9.C.*

*Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.*
