Description: Install the new system exactly as depicted in the Kumar and Associates design dated March 15, 2022, stamped and signed on March 16, 2023 by David A. Young, PE. This system is designed to accommodate the maximum daily flows for a 4 bedroom residence.							
The OWTS consists of one sewer line from the residence. A 1,500 gallon, three-compartment, Valley Precast septic tank with a total volume of 2000 gallons and an effluent filter in the outlet tee will be used. An Orenco PF3005 high head pump assembly will be installed in the third compartment. The pump will be set to dose 70 gallons per dose.							
The STA will consist of five trenches with 25 Infiltrator Quick 4 Plus Standard chambers placed in each trench (125 chambers total) on the natural soils. Install distribution lateral orifice size, orifice shields, spacing, and flushing assemblies should be completed as designed. Inspection ports should be present at each corner of the bed.							
Do not dig in wet or frozen ground. Maintain well, utility, storm drain and ditch setback distances as shown.							
A licensed installer has not been identified. No person shall install, renovate, or repair an OWTS in Eagle County (EC) without a valid EC Systems Contractor License. Any person that conducts a business as a systems contractor without having obtained a valid license section commits a Class 1 petty offense as defined in section 18-1.3-503, C.R.S. Please notify the department when an installer is identified, prior to installation of the OWTS.							
Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.
