*Description: Install the new system exactly as depicted in the CBO Inc design dated, stamped and signed on May 14th, 2023 by Kachayla R Cronk, PE. This system is designed to completely replace the system originally permitted under ISDS 1794-98 and ISDS 2559A-06. This system is designed to accommodate the maximum daily flows for 5 bedrooms.*

*The OWTS consists of two sewer lines, one from the barn and one from the main residence. Cleanouts will be located every 100 feet. A 1,500 gallon, two compartment, Infiltrator poly septic tank with an effluent filter in the outlet tee followed by a 500 gallon, single compartment Infiltrator poly pump chamber with an Orenco PF3005 pump will be used. The pump will be set to dose 78 gallons per dose. The STA consists of 6 gravelless trenches, each with 17 Infiltrator Quick4 Plus Standard chambers for a total of 102. An ADV will be placed at the high point of the system.*

*Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.*
