<p><i>Description: This system is designed to replace the existing non-compliant septic system originally installed under Eagle County permit 1685-971S. The replacement system must be installed as depicted in the CBO Septic Consulting design dated July 12, 2023; stamped, signed and dated on July 12, 2023 by Kachayla Cronk, PE. The new system will be sized to accommodate the maximum daily flows for a 5 bedroom residence.</i></p> <p><i>This OWTS consists of one sewer line from the residence to a 1500 gallon Infiltrator IM-1520-2CP two chamber poly tank for primary treatment. Tees must be present and an effluent filter will be present on the outlet tee. Effluent will gravity flow to a 500 gallon Infiltrator IM-540-HH single compartment dosing tank with an Orenco Biotube Pump Vault and an OrencoPF3005 pump. The float will be set to dose 80 gallons per cycle. The STA will be pressure dosed through a 1.5" pump line to an Orenco ADV, installed at the high point in the system. 1.5" distribution lines will carry effluent to two 7' x 66' beds each consisting of 2' sand filter, two laterals with lateral and orifice spacing outlined in the PE design, and two 39" GeoMats and orifice shields. Cleanouts must be brought to grade at the distal end of each lateral and 4" inspection ports must be present in each corner of both beds. The existing septic tank should be abandoned per ECPHE OWTS Regulations #43.9.C.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system.</i></p>

<p><i>Description: This system is designed to replace the existing septic system originally installed under Eagle County permit 1535-951S. The replacement system must be installed as depicted in the CBO Septic Consulting design dated July 6, 2023; stamped, signed and dated on July 6, 2023 by Kachayla Cronk, PE. The new system will be sized to accommodate the maximum daily flows for a 4 bedroom residence.</i></p> <p><i>This OWTS consists of one sewer line from the residence to a 1500 gallon Infiltrator IM-1530-2CP two chamber poly tank for primary treatment. Inlet/outlet tees must be present and an effluent filter present on the outlet tee. Effluent from tank will gravity flow to a PolyLok distribution box with flow equalizers installed. Sched 40 PVC must be used where effluent line crosses under the driveway. The d-box and cover must be installed at grade. Effluent will leave the d-box in four 4" pvc lines, each going to a zone of 4" PVC header that will evenly split flow to two perforated 4" pvc distribution laterals. The four zones will be in three beds; one bed 12'bed and two 7' beds. 6' of undisturbed soil must be present between beds. Inspection ports will be installed at the proximal end of each bed and at the distal end of each lateral.</i></p> <p><i>The existing septic tank is to be abandoned or removed per ECPHE OWTS Regulations #43.9.C.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
<p><i>Description: Install the new system exactly as depicted in the Marcin Engineering design dated November 2, 2023 stamped and signed by Antonio Luiz Vazquez, P.E. This system is designed to accommodate the maximum daily flows for a 5 bedroom residence.</i></p> <p><i>The OWTS consists of a 4" sewer line from the residence. A 1500 gallon, two-compartment, septic tank with inlet tee and an effluent filter in the outlet tee will be used. The tank must be from the CDPHE approved list. Watertight risers must be installed to make tank accessible from grade. Effluent will leave the tank and flow to a distribution box, installed to be accessible at grade, to ensure non-preferential flow to the STA.</i></p> <p><i>The STA will consist of a 1200 sq ft, mounded pipe and rock bed. Four 3" headers from the D-box will lead to distribution laterals with orifice size and spacing as given in the approved plans. Laterals will be located 3' from the sides of the bed and spaced 2' on center. Maximum width of the bed is 12'. Gravel depths, geotextile fabric and soil cover must be placed as outlined in approved plans. 4" dia. inspection ports, perforated in the bottom 8" and extending to the infiltrative surface must be located at the 4 corners of the bed and must remain accessible at grade.</i></p> <p><i>Do not dig in wet or frozen ground. Maintain well, utility, storm drain and ditch setback distances as shown.</i></p> <p><i>Adaptive Underground has been identified as the licensed installer.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i></p>
