PERMITS APPLIED BY TYPE (01/13/2020 TO 01/17/2020)

Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
<i>Description: RUTH RESIDENCE MECHANICAL SYSTEM UPGRADE</i>							
<p><i>1. House Heating Boilers Replacement & System Upgrade</i> -Remove & recycle existing house heating boilers and indirect-fired water maker. -Furnish & install new: (2) natural gas-fired, condensing, stainless steel Lochinvar Knight KHN285 285,000 BTU/hr boilers (high efficiency 95% AFUE, fully modulating 10:1 turndown ratio per boiler for a 20:1 turndown on heating system); boiler circulation pumps; expansion tank; air elimination package; and (1) Lochinvar Squire 119. -Use (connect into) existing heating piping & piping systems, gas line, line voltage and electrical. Each boiler will be newly vented in 4" PVC piping up through the roof (chase/access provided by builder). New 4" PVC intake air piping will be connected to existing mechanical room outside air duct.</p> <p><i>2. New Nortec RH Sterile Steam Humidification Systems - (1) to serve upper level system and (1) to serve Master Suite</i> -Furnish & install new (2) Nortec RH Sterile Steam Humidifiers in conjunction with forced air AHU and duct work. Each systems includes: (1) steam nozzle and hose; (1) drain line, drain pan and emergency wet switch, air-flow proving switch, duct-mounted humid-stat and low voltage control wiring. (Not included: line voltage by license electrician; cold-water supply line to humidifier and new P-trap for drain connection by licensed plumber)</p> <p><i>3. New Ductless AC System to serve Main Level Office</i> Furnish & install new: (1) Mitsubishi Ductless Split single-zone system; (1) Mitsubishi outdoor condenser to be placed on manufacturer condensing pad and located on North side of home; (1) indoor cooling unit mounted in ceiling of office area; and, (1) line set connecting indoor cooling and outdoor condensing units. (Note: Drywall and concrete coring by others - if required)</p> <p><i>4. Return Air Duct Work Modification for better operation of the Great Room Forced Air System.</i> -Remove & recycle existing return air duct work -Install new return air duct up through the new kitchen "chase" into the upper loft closet area and terminated into (1) wall grill facing the Great Room. Additional return air will run up through the kitchen "chase" and terminated over the entry closet area into the hallway area. Kitchen Venting & MUA Provide venting – connect and install new duct from kitchen hoot to roof - for (1) builder-provided installed 1200 CFM kitchen hood. (Note: Builder to provide duct routing from kitchen hood to the roof. Roof penetration and sealing by others) Furnish and install (1) 1200 CFM AHU with hot water coil inside the loft closet (aka, new mech room). New heating lines to run from heating plant to AHU and connected to the unit to provide heating tempering when MUA is calling for operation below 70 degrees. Unit will modulate discharge air temp to achieve 70 degrees during operation (no cooling to this unit included). New outside duct work will run from existing location and new supply air duct will be install to terminate into the Great Room area.</p> <p><i>Master Suite Return Air Modification</i> Extend existing return air up through Chase into attic space and terminate RA "high" on wall inside Master Sitting Area. Existing "low" return air in the sitting room will be blanked off (smaller) for a smaller grill size. Necessary duct work & (2) new return air grills installed.</p>
