OWTS Permit

OWTS-024918-2022	OWTS Permit	New	142 Amherst Rd Gypsum Area, CO	Town of Gypsum	\$0.00	08/01/2022	08/02/2022
<i>Description: Install the new system exactly as depicted in the LKP Inc design dated, stamped and signed on July 26th, 2022 by Luiza Petrovska, PE. This system is designed to accommodate the maximum daily flows for a 4 bedroom residence.</i>							
<i>The OWTS consists of two sewer lines, one from the shop that will connect to the plumbing in the main residence and one exiting the residence. A 1,500 gallon Valley Precast two-compartment concrete septic tank with an effluent filter in the outlet tee will be used. The STA will consist of 4 shallow trenches with 22 Infiltrator Quick4 Plus Standard chambers for a total of 88.</i>							
<i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system.</i>							
OWTS-024943-2022	OWTS Permit	New	1971 Red Sky Rd Wolcott Area, CO	Wolcott area	\$2,800,000.00	08/02/2022	08/26/2022
<i>Description: Install the OWTS exactly as depicted in the Eliminite design dated July 13, 2022, stamped and signed by Thomas J. Kallenbach, PE. The system is designed to serve a maximum daily flow for the proposed five bedroom single family residence.</i>							
<i>The OWTS consists of a 1,500 septic tank with an effluent filter on the outlet tee of the second tank followed in series by an Eliminite 120 Treatment System and a 1000 gallon dose tank, equipped with a recirculation pump and transfer floats set to circulated effluent back to the primary treatment tank. The final compartment of the dosing tank is equipped with a Liberty LEH150 high head pump with floats set as shown in the design to pressure dose effluent over a 2,100 square ft soil treatment area consisting of eight shallow trenches, each 100' in length and equipped with chambers. Be sure to stake and maintain all setback features, including the proposed location of the water line.</i>							
<i>Distribution lateral details, along with orifice size, spacing and orientation are on the design drawing. The contractor must verify that all electrical components and inspections are covered under the electrical permit associated with the control panel and pump connections. The alarm must be connected to a separate circuit. Additional pump details are on the design drawing.</i>							
<i>Please note that a soil profile test pit is required prior to installation of the OWTS, that is immediately adjacent to and down gradient from the proposed soil treatment area, to confirm adequate vertical separation from limiting layers such as fractured bedrock observed in nearby soil test pits.</i>							
<i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i>							
OWTS-024944-2022	OWTS Permit	New	116 Juniper Trl Wolcott Area, CO	Wolcott area	\$0.00	08/02/2022	08/02/2022

PERMITS APPLIED BY TYPE (08/01/2022 TO 08/05/2022)

Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
<p><i>Description: Install exactly as depicted in the Eliminite Inc design, dated XXXX, with requested ECEH edits on May 21, 2021, stamped and signed by Thomas J. Kallenbach, PE. The OWTS is designed to serve a 5 bedroom single family residence. This system connects to the common drainfield referred to as Lower Aspen Bluffs, permit 2112-01IS.</i></p> <p><i>The Eliminite Biological Nutrient Removal System to be installed consists of a 1,530 gallon primary treatment tank followed by the Eliminite 120 treatment tank equipped with a Liberty 280 internal recirculation pump, and a Liberty FL-51M discharge pump, with floats set to deliver effluent to the Aspen Bluff Cluster drainfield dosing tank on demand, by connection to an existing stubbed out sewer line.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i></p>
