PERMITS APPLIED BY TYPE (09/26/2022 TO 09/30/2022)

Permit #	Type	Workclass	Main Address	District	Valuation	App Date	Issue Date
<p><i>Description: Install the OWTS exactly as depicted in the Eliminite design dated August 15, 2022, stamped and signed by Thomas J. Kallenbach, PE. The system is designed to serve a maximum daily flow for the proposed four bedroom single family residence.</i></p> <p><i>The OWTS consists of a 1,530 septic tank with an effluent filter on the outlet tee of the second compartment followed in series by an Eliminite 120 Treatment System and a 1060 gallon dose tank, equipped with a recirculation pump and transfer floats set to circulated effluent back to the primary treatment tank. The final compartment of the dosing tank is equipped with two Liberty LE100 high head pumps with floats set as shown in the design to pressure dose effluent over a 2,100 square ft soil treatment area distributed between of two drain fields, noted as North and South as shown on the design drawing. Be sure to stake and maintain all setback features, including the proposed location of the water line.</i></p> <p><i>Distribution lateral details, along with orifice size, spacing and orientation are on the design drawing. The contractor must verify that all electrical components and inspections are covered under the electrical permit associated with the control panel and pump connections. The alarm must be connected to a separate circuit. Additional pump details are on the design drawing.</i></p> <p><i>Contact Eagle County Environmental Health and the design engineer well in advance of requesting inspections prior to backfilling any component of the OWTS. The design engineer is responsible for conducting all inspections necessary to certify the installation and assure the functionality of the system. System certification, along with photos and a record drawing is required to be submitted to and approved by Eagle County Environmental Health prior to the use of the system or occupancy of the dwelling.</i></p>
