To Whom It May Concern:

We support the Town of Red Cliff's streetscape improvement project. As a governing body for the County in which Red Cliff is located, we are aware of the need to make improvements to the the Town's infrastructure. Safety is our primary objective in supporting this project.

Red Cliff is nestled in a picturesque valley west of Vail Pass, alongside the Top of the Rockies Scenic Byway, making this area of special interest to the County's residents and visitors. However, Red Cliff's roads have long been in disrepair, posing safety risks for pedestrians, bicyclists, and motorists. The proposed streetscape project, funded in part by this grant, offers a much-needed solution to address these infrastructure challenges.

Improving Red Cliff's streetscape will not only enhance safety but also stimulate economic growth and vitality. Upgrading sidewalks, installing lighted crosswalks, and replacing deteriorating pavement with asphalt will undoubtedly make Red Cliff more attractive to tourists, encouraging them to linger, explore, and support local businesses.

Additionally, a portion of this project upgrades the existing stormwater system which has proved to be less than adequate. The proposed stormwater system will not only help with current flooding problems but add an additional component to filter water prior to reentering the streams that provide water throughout the County.

We fully endorse the Town of Red Cliff's application for the streetscape improvement project. This investment will not only enhance the quality of life for residents but also promote economic development and environmental stewardship in our beloved community.

Thank you for considering Red Cliff's application. Should you require any further information, please contact our office.

Sincerely,

Matt Scherr
