

FENCES

Placement of fence:

Generally a fence may be located in an interior side yard and a rear yard. These fences must be located completely within your property lines. Only natural (vegetative) or split rail fences up to 4'0" high and set back 10' from the curb or street are permitted in front yard and side lots facing streets.

Type of fence:

Chain link, open picket and shadow box (alternating pickets) are permitted open type fences. Solid and other privacy type fencing is only allowed when the fence placement is set back a minimum of five (5) feet from the property line and in the immediate boundaries of patio or terrace. Barbed wire and electric fence is prohibited.

Height of fence: Six (6) feet maximum

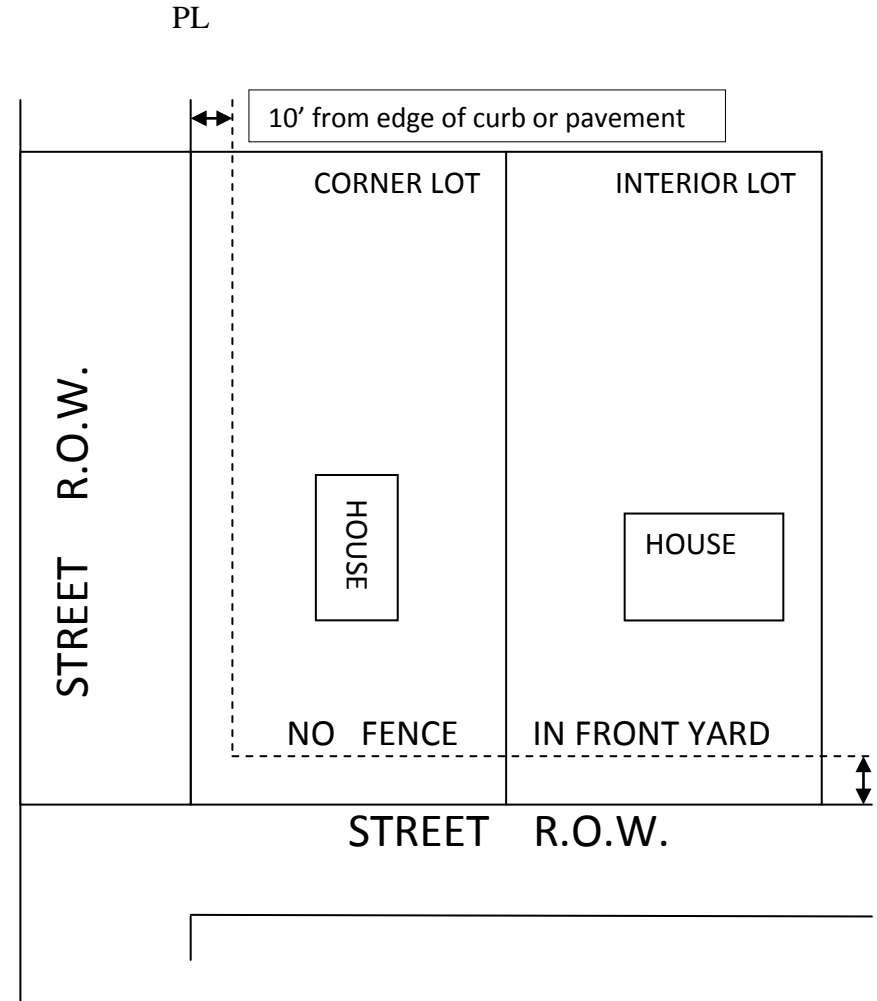

A building permit is required for the installation of a fence. We will need the following information to process your request:

1. Building permit application
2. Site plan showing fence placement
3. Plat of survey
4. Description of type and height of fence

Call J.U.L.I.E. at 1-800-892-0123 before you dig.

Inspection:

A rough post hole and final inspection will be required. Arrangements for scheduling an inspection can be made by calling the Village Hall at least 24 hours in advance. For information or inspections, call (847) 639-3170.

Note:

This is general information only and should not be construed as total compliance with all Codes of the Village of Fox River Grove. Please review specific code requirements and/or your property deed for any covenants concerning your particular lot. For additional requirements or information, please contact the Building and Zoning Department.
