

Bubble Snake Maker

Materials:

- Bottle
- Scissors *
- Elastic band
- Flannel, face cloth or an old sock
- Bubble mixture and water
- Food coloring (optional)

How to:

BUBBLE SNAKE MAKER

- Using a pair of scissors or a craft knife (and *adult supervision), help your child by cutting the bottom off the plastic bottle.
- With your kids, cover the open end of your bottle with a piece of fabric that is similar to a washcloth or cotton sock. We used a flannel and cut it into a circle shape (to keep the ends from dipping into your bubble mixture).
- Secure with a rubber band to keep the fabric in place. No elastic band then don't worry just wrap it in tape.
- Place your bubble mix into a shallow bowl or plate.
- We decided to add some color to the bubble snakes with food coloring. The kids dropped the food coloring onto the fabric covered end. It was a bit messy, but the kids loved it. You could also use liquid watercolors too.
- Dip the fabric in the bubble solution and give the bottle a blow. Blowing slowly produces the longest snakes. We had a lot of wind and it kept blowing our snakes away!
