

Let's Play Cookie Face!

Challenge: Use your facial muscles to move a cookie from your forehead to your mouth without using your hands!

- Sit in a chair and lean your head back. Place a cookie in the center of your forehead, not touching the eyebrows.
- Use only your face to move the cookie from your forehead to your mouth. The cookie must remain in contact with your face, so you can't try to toss it from your forehead and catch it in your mouth.
