

## Rescue Han Solo in this Star Wars LEGO science experiment

### Materials we used

- Ice cube tray
- Baking soda
- Vinegar
- Water
- Lego Star Wars minifigures
- Angry Birds Star Wars figures
- Optional: Jello powder for color/scent

### Directions

1. Mix 3 parts baking soda with 1 part water. If desired, add Jello powder to scent and color the mixture.\*
2. Pour a small amount of the mixture into the bottom of the ice cube tray.
3. Place one Star Wars toy into each section.
4. Cover each toy up with more of the baking soda and water mixture.
5. Place the ice cube tray into the freezer for a few hours.
6. Remove the “carbonite”-encased figures and place in containers.
7. Add vinegar to save Han Solo and his Star Wars buddies.
