

# THINGS TO DO AT-HOME

Suggested by: Ms. Donna

Davis Thayer Elementary

## 1. Magic Milk Experiment:

- Begin by lining a shallow pan or container with whole milk or half-and-half.
- Add a drop of peppermint extract to the milk if scent is desired.
- Then, add a few drops of food coloring the outer perimeter of the dish.
- Next, take a craft stick or cotton swab and dip it into dish soap. Then, place that end right into the center of the milk.
- As soon as the dish soap hits the milk it will magically come to life right before your eyes!

2. Tape Games – By putting painters tape on the floor in a variety of lines, you can create a quick and easy obstacle course for your children! You can also make a track for their toy cars or trucks.

3. DIY Paintbrushes – Place miscellaneous supplies in a clothes pin and start painting. Look at the new patterns you can create!
