

THINGS TO DO AT-HOME

Suggested by: Ms. Kara

Kennedy Elementary

1. Go on A Nature Walk. Get outside in the fresh air and explore the area around you.

2. Make Slime:

2 - 4oz bottles of White School Glue

2 drops Food Coloring

1 tsp Baking Soda

2-3 Tbls Saline Solution

Pour the glue into a mixing bowl. Add the food coloring. Mix until desired color. Add the baking soda. Mix well. Slowly add the saline while mixing. The slime will form. Once it gets too hard to mix with a spoon, take it out and knead it with your hands! Enjoy!

3. Play a Board Game. From rolling the dice to counting your moves, there is math in everything we do. Have fun while sharpening your skills.

4. Cook at Home. Cooking and baking are a wonderful way to learn measurements, time, and chemistry in a fun and delicious way!

5. Building Block Challenges. Use those building blocks to build something new! Can you build the tallest tower? Can you build a structure that cannot be knocked down? Challenge the whole family!
