

# Slime

## What you need to make Slime

1 Cup White School Glue

2 Tbsp Water

1 tsp Baking Soda

Any color Acrylic Paint

2 Tbsp Saline Solution

Glitter/Gems/Sparkles/or other “add-in”

## How to Slime

Pour 1 cup glue into a bowl. Add 2 tablespoons water and 1 teaspoon baking soda to the glue and mix well.

Add acrylic paint to the glue. Less will make the color light, more will darken the color. Mix well.

Add 2 tablespoons of saline solution to the glue and mix well. The slime will start to form. Once it is too hard to mix with the stirring tool, remove it with your hands and start to knead it. The slime will firm up as you go.

You can now add the glitter or gems to the slime.

Enjoy!
