AGENDA

Pursuant to Bill S.2475 Extending Certain COVID-19 Measures Adopted During the State of Emergency, this meeting of the Greenfield Conservation Commission will be conducted via remote participation to the greatest extent possible. Specific information and the general guidelines for remote participation by members of the public and/or parties with a right and/or requirement to attend this meeting can be found below. Every effort will be made to ensure that the public can adequately access the proceedings in real time, via technological means. In the event that we are unable to do so, despite best efforts, we will post on the City of Greenfield website an audio or video recording, transcript, or other comprehensive record of proceedings as soon as possible after the meeting.

*Should any technical interruption to the meeting occur and the meeting is suddenly ended, it will not be resumed and all items will be automatically continued to the next scheduled meeting date.
Contact the Conservation Agent for more information.*

- Call to Order
 - Approval of Meeting Minutes: January 24, 2023
- ### Schedule of Public Meetings & Hearings

- **Public Meeting: Request for Determination of Applicability: Building addition at 139 Silvio O Conte Drive; (Map: R05, Lot: 24H)**

Summit Ice intends to put an addition onto the back of the building. This addition will be approximately 5,000 square feet and primarily be additional freezer space. It will have a small section for loading and unloading delivery vehicles. The new addition will be placed in an existing paved area that is now used as the loading area for delivery trucks. There are two loading docks in the existing area. Additionally, next to the loading dock area, there is a storage area for ice merchandisers that will be removed. This area is also paved. Behind the new addition there will be an access space/drive that will be wide enough for a truck to drive around as to access a bay door. The new building will have a raised concrete foundation. The height will be determined by the existing building as to have seamless access to the new section. The building will be a pre-fabrication metal structure. The interior will have a pre-fabricated modular freezer installed with ceiling heights of approximately 20 feet.

- **Public Hearing: Notice of Intent: Building addition and parking area construction at 15 Greenfield Street; (Map: R05, Lot: 28/28C) DEP #168-0353**

The proposed project is for the construction of an addition which will connect the two existing on-site buildings, the construction of a new parking area, the expansion of the existing parking area, the construction of a mitigation area, and appurtenances. A portion of the work is proposed within the wetland system located between the two existing buildings.

- **Public Hearing: Notice of Intent: Cell tower installation; (Map: R24, Lot: 11) DEP #168-0352**

The project is for the construction of a cellular tower with associated equipment and fencing and a new driveway with access off Fairview Street West. The project will construct a 170-foot tall monopole, electric and telco equipment backboard, equipment cabinet, and generator within a 50 x 50 foot compound consisting of an 8-foot-tall chain link fence topped with barbed wire. The equipment cabinet and diesel generator will sit on proposed 8 x 8 ft and 4 x 8 ft concrete pads, respectively. The project will also construct a gravel access driveway approximately 10 to 12 feet wide and 170 feet long to the compound following existing paths where feasible. Proposed electric and telephone utilities will run from an existing utility pole on Fairview Street West to a proposed utility pole within the parcel, and then underground parallel to the access drive into the compound.

- **Public Hearing: Notice of Intent: Supermarket construction at 208 Mohawk Trail; (Map: 37, Lot: 5) DEP #168-0354**

The proposed work will consist of the construction of an approximately 19,432 square foot supermarket building and a parking area. The proposed building will be supported by a parking area for passenger vehicle, a small loading area, access roads, sidewalks, and curbing. Work will also include installation of stormwater management system and underground propane tanks, grading, and landscaping. Any existing stormwater management facilities left from the former motel will be removed. The proposed facility is anticipated to be served by modifying tie-ins and replacing on-site water, sewer, and telephone/data connections from the former Candlelight Motel.
