GPS:45:93 REGIONAL TRANSPORTATION

Interstate 35 connects two of the State’s largest metropolitan areas, Duluth-Superior with the Twin Cities and the GPS:45:93 region is ideally located along this route. This interstate runs the full length of the United States, its south terminus at Laredo, TX. Two international airports serve this region, on either end, as well as a robust freight rail system, and North America’s largest inland seaport. East Central Minnesota has a transportation network that brings goods to market around the world.

“We have a high expectation of growth for Imperial Plastics over the next several years, and our Mora team and plant will play critical roles in achieving our goals. We know the custom molding, assembly and finishing we do in Mora is in high demand and look forward to continuing our investments in people and equipment to capitalize on the opportunity.”
