Construction/Change of Use Application for Evaluation of Existing Well and Septic

The following must be evaluated: any building additions or renovations that include potential increased load on the septic systems (i.e. increased number of bedrooms); the addition may encroach on isolation requirements; a new home where an older home was demolished and on-site sewage system remains; and any addition to a dwelling within 500 ft of a waterway.

All non-residential [commercial/business] buildings with proposed change of building/property use or potential increased load on the septic system, and residential properties with proposed commercial/non-residential use must be evaluated.

PROPERTY TAX ID# _____ SECT _____ LOT/PARCEL _____
