APPENDIX E

Waste Reduction Goal Sheet

WASTE REDUCTION GOAL SHEET**NC LOCAL GOVERNMENT TEN YEAR SOLID WASTE MANAGEMENT PLAN**Local Government Name: Lee County Planning AreaPreviously established waste reduction goal: 10 %

After considering your government's current and projected solid waste activities, resources, population, and economic growth have you reached your previously established goal?

☒ Yes ☐ NoEstablish a new waste reduction goal: 25 %**WASTE REDUCTION CALCULATION**

To provide 10 years of solid waste management planning, as per G.S. 130A-309.09A(b), waste reduction goals need to be updated. Use the following chart to determine the tonnage needed to be diverted from landfills in order to reach the new waste reduction goal.

CALCULATION**FY 2021-22**

1. Baseline year per capita disposal rate (FY 1991-1992 unless alternate approved by Section)	1.16
2. Percent waste reduction goal	25 %
3. Targeted per capita disposal rate (Subtract line 2 from 1.0 and multiply result by line 1)	0.87
4. Estimated population in the new waste reduction goal year (Available at Office of State Budget and Management website: Projected Annual County Population Totals 2010-2019)	71,483
5. Projected tonnage for disposal at baseline disposal rate (Multiply line 1 by line 4)	82,921
6. Targeted annual tonnage for disposal (Multiply line 3 by line 4)	62,190
7. Targeted annual tonnage to reduce (Subtract line 6 from line 5)	20,731

Population Link: http://www.osbm.state.nc.us/ncosbm/facts_and_figures/socioeconomic_data/population_estimates/demog/cpa2010p.html**WASTE REDUCTION PLAN**

Given the targeted annual tonnage amount to be reduced, explain how you plan to reach the goal:

1,686 tons by increasing residential recycling
2,400 tons by increasing C-I-I sector recycling and waste reduction
40 tons by increasing source reduction
37 tons by promoting backyard composting
