
Storm Water Division • 300 Roosevelt Road • Machesney Park, IL 61115

Erosion and Sediment Control Certification Statement

Disposal of concrete washout water, construction debris and other waste:

Per village ordinance 14.201, "It shall be unlawful to any person to allow garbage, or debris to be located upon his property". Concrete washout water and construction debris shall be considered 'Rubbish' under this ordinance and as such, waste materials from construction jobsites regardless of size shall comply with the requirements of this ordinance.

Any concrete washout water shall be contained and properly disposed of. It is generally recommended that cured and dried concrete washout water be considered Clean Construction and Demolition Debris and disposed of as such.

Any violation of this ordinance will be fined not less than \$50 and is punishable up to \$200 per occurrence plus the cost of court.

Migration of soils and sediments off site:

Per village ordinance 8.13, any soil or sediment which leaves private property and enters public property is considered 'Encroachment' and is unlawful in the Village of Machesney Park. All soil erosion must be managed and captured on projects which cause the disturbance of soils.

It is strongly recommended that projects disturbing soil be contained with silt fence, ditch checks, vegetative barriers or other filtration devices to proactively prevent the migration of soil onto adjacent property.

Any violation of this ordinance will be fined not less than \$100 and is punishable up to \$500 per occurrence plus the cost of court.

Use of Storm Sewer for Disposal of Waste Products:

Per village ordinance 8.14, no material other than storm water may enter the village storm water system including pipes, inlets, manholes, ditches, and creeks. Dumping of material into the storm water system is punishable by a fine of not less than \$250 and up to \$750 per occurrence.

Permit Application Certification:

I certify that I have read and understand the above information regarding best management practices for my project in relation to storm water quality. I acknowledge that my project must comply with all village ordinances and should my project be cause for any violations, I may be subject to a fine.
