Re: Backflow Preventer Annual Testing
Last test date:

Dear Customer,

The South Carolina Department of Health and Environmental Control's State Primary Drinking Water Regulation, Section 61-58 (F), requires that a test be performed annually by a certified tester on a reduced pressure or double check valve type backflow preventers, which are installed for the protection of public drinking water supply. If your meter is locked you are not required to have a test conducted until your service is unlocked for usage.

Our records indicate that your property has the following device:

Please make arrangements to have your device or devices tested. Because this testing requirement is a state law and public health is at risk, failure to comply may result in loss of water service and make you subject to a re-service charge. You may go to www.mccormickcountysc.org for a list of certified testers.

If you have any questions or need assistance with this requirement, please feel free to call.

Sincerely,

McCormick County Water and Sewer Department
